This text includes not only content related to developmental and counseling theories but also information on evidence-based practices across the continuum of care, diagnosis, and treatment of youth and current trends such as integrated care, mindfulness, and neuroscience. Unique to this book are sections on both the instructional and behavioral Response to Intervention (RtI) model and PBIS, examples of evidence-based practices used across settings such as Student Success Skills, Check, Connect, and trauma-focused CBT, and a review of common mental health-related disorders most often seen in youth and treatment recommendations.
