

The MidYIS test

- MidYIS stands for Middle Years Information System and is currently operating in over 3000 secondary schools.
- Tests are designed to measure ability and aptitude for learning rather than achievement.
- Not an IQ Test, as it is designed to provide a measure of 'typical' performance which can be used to give an expected level of attainment at GCSE based on the national average results.

Learning to Teach Geography in the Secondary School Mary Biddulph, David Lambert, David Balderstone, 2015-05-20

Learning to Teach Geography in the Secondary School has become the widely recommended textbook for student and new teachers of geography. It helps you acquire a deeper understanding of the role, purpose and potential of geography within the secondary curriculum and provides the practical skills needed to design, teach and evaluate stimulating and challenging lessons. It is grounded in the notion of social justice and the idea that all students are entitled to a high quality geography education. The very practical dimension provides you with support structures through which you can begin to develop your own philosophy of teaching and debate key questions about the nature and purpose of the subject in school. Fully revised and updated in light of extensive changes to the curriculum as well as to initial teacher education, the new edition considers the current debates around what we mean by geographical knowledge and what is involved in studying at Masters level. Key chapters explore the fundamentals of teaching and learning geography, Why we teach and what to teach, Understanding and planning the curriculum, Effective pedagogy, Assessment, Developing and using resources, Fieldwork and outdoor learning, Values in school geography, Professional development. Intended as a core textbook and written with university and school based initial teacher education in mind, *Learning to Teach Geography in the Secondary School* is essential reading for all those who aspire to become effective, reflective teachers. Praise for previous editions of *Learning to Teach Geography in the Secondary School*: This is a practical and visionary book as well as being superbly optimistic. It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere. Practical activities and ideas are set within a carefully worked out, authoritative conceptual framework. The Times Educational Supplement. This is a modern, powerful, relevant and comprehensive work, a standard reference for many beginning teachers on geography initial teacher training courses. Educational Review.

[Teaching Gifted Children with Special Educational Needs](#) Diane Montgomery, 2015-06-05

Children with both giftedness and special educational needs are often found in the mainstream classrooms. This essential resource provides an overview of existing knowledge about dual and multiple exceptionality (DME), examining the needs of gifted and talented children from both the class teacher's and SENCo's perspectives. Diane Montgomery explores both the specialist interventions that some children will need at least for part of their school life as well as the general inclusive provision that every school can develop to meet the needs of all children. Focusing on evidence based identification throughout, chapters in this accessible book cover:

- An analysis of the terms giftedness and talent and the different methods that can be used for identifying them and assessing their limitations.
- Identifying and supporting a range of difficulties, syndromes and disorders such as dyslexia, dyscalculia, DCD, ASD, ADHD and SEBD.
- How to manage classroom behaviour, improve school ethos and create a DME friendly school through inclusive teaching and learning.

This invaluable resource will assist you in creating a DME friendly school, help to integrate learners with a range of difficulties and enable
