Budget Authorization Request United States. Congress. House. Committee on Science. Subcommittee on Energy and Environment, 2001 *Biofilm Highlights* Hans-Curt Flemming, Jost Wingender, Ulrich Szewzyk, 2011-08-02 Living in biofilms is the common way of life of microorganisms transiently immobilized in their matrix of extracellular polymeric substances EPS interacting in many ways and using the matrix as an external digestion and protection system This is how they have organized their life in the environment in the medical context and in technical systems and has helped make them the oldest most successful and ubiquitous form of life In this book hot spots in current biofilm research are presented in critical and sometimes provocative chapters This serves a twofold purpose to provide an overview and to inspire further discussions Above all the book seeks to stimulate lateral thinking **Biofilms: Extracellular Bastions of Bacteria** Alan W. Decho, 2018-10-08 This book is a printed edition of the Special Issue Biofilms Extracellular Bastions of Bacteria that was published in IJMS *Microbial Biofilms* Hilary M. Lappin-Scott, J. William Costerton, 2003-09-18 Biochemistry and ecology of biofilms from industrial medical and other viewpoints *Emerging Infectious Diseases*, 2011 **Safe Piped Water** R. G. Ainsworth, 2004-08-31 The factors affecting the presence and growth of micro organisms in piped networks are reviewed in this book as are the practices of water supply organisations that can directly or indirectly influence their presence and growth The information and conclusions are intended for policy makers and those responsible for formulating Water Safety Plans for the supply of drinking water It is also relevant to engineers and scientists who are responsible for water supply planning operations and monitoring The review shows that there are often public health reasons for adopting a more proactive approach to many of the traditional practices used in designing operating and maintaining distribution networks and to modifying the composition of the water that is fed into the network Contents include the following topics The microbiology of piped distribution systems and public health Composition of treated waters to minimise potential for microbiological changes Design and operation of distribution networks Planned maintenance and survey of distribution systems Precautions during construction and repairs Small animals in drinking water distribution systems Risk management for distribution systems **Strategic Planning of Sustainable Urban Water Management** Per-Arne Malmqvist, G. Heinicke, E. Korrman, T. A. Stenstrom, G. Svensson, 2006-06-30 The strategic planning of urban water systems is a complex task The Urban Water programme covered projects from various disciplines at 9 Swedish Universities from 1999 to 2006 The projects developed a toolbox for strategic planning of drinking waste and stormwater management covering aspects such as the environment health and hygiene financing organisation households and technical function Strategic Planning of Sustainable Urban Water Management synthesises the results and presents a comprehensive approach which includes not only the technical economic and environmental aspects but also the challenges of institutional capacity and public participation in the planning process Furthermore the experience from a number of case studies are summarised and can offer readers inspiration for their own planning situations Impact of Distribution System Water Quality on Disinfection
