Montessori Math Second Grade:

Montessori Math Manipulatives and the Minnesota State Math Standards for Grade 2 Numbers and Operations: Alignment and Testing

Danielle Blehm, 2016 The Montessori methodology is becoming more prevalent in public elementary schools. Within a public school, there are many standard requirements that need to be met for students at each grade level. Today many students are being tested to assess if they are learning what is required by the State Standards. Because the Montessori methodology teaches students with differentiated and individualized instruction, many wonder if the Montessori methodology covers all State Standard requirements. Does the Montessori Math Curriculum meet the Minnesota State Math Standard requirements? This qualitative study was performed in a public Montessori school with nine second grade students learning mathematical skills that aligned with the Minnesota State Math Standard. Instruction took place through the use of Montessori manipulatives. The assessments given to the students were the same assessments that other second grade students in this district were given for this standard. Students were given Montessori lessons and manipulatives aligned with the Minnesota State Math Standard Numbers and Operations for Grade 2. In the example of the learning target, I can use fact families to understand addition and subtraction, students' pre-test score was 59.3% and increased to 77.7% in the post-instruction test. We can show if the Montessori methodology teaches students what is required by the State Standards by further aligning Montessori lessons and use of manipulatives to those standards while using assessments that traditional school use.

Content-Based Curriculum for High-Ability Learners Joyce VanTassel-Baska, 2010-07 This newly updated edition provides a solid introduction to curriculum development in gifted and talented education. Written by experts in the field of gifted education, this text uses cutting edge curriculum design techniques and aligns the core content with national and state standards. In addition to a revision of the original chapters, the second edition contains new chapters on topics such as second language learning, leadership, arts curriculum, and technology. The text identifies the basic principles of curriculum development, accelerated learning within the core content areas, use of higher order process skills, development of creative student products, and concept development and learning. These techniques are incorporated into a chapter on each core content area: language arts, mathematics, science, and social studies, as well as world languages and the arts. The final chapters focus on the roles of teachers, program coordinators, and administrators during curriculum design, including selecting resources and materials, aligning curriculum, and assessing student learning.

Amos Hatch,2025-07-31 This book aims to broaden the teaching repertoires of pre service and in service early childhood teachers so they can better meet the needs of the children they teach Covering 16 early childhood teaching strategies ranging from traditional play based approaches through direct teaching and technology assisted instruction to postmodern methods each chapter focuses on a different pedagogical approach explaining what it is why it s important and how it can be implemented in Pre K 3 classrooms Chapters conclude with detailed examples of how the strategies can be utilized to cover specific instructional objectives drawn from published standards *Diversified Teaching Strategies for Early Childhood Classrooms* is essential reading for undergraduate students studying early childhood education as well as graduate students early childhood teacher educators and any practicing Pre K Grade 3 teachers It offers readers a richer set of tools for making good decisions about how to teach real content in ways that are effective and meet the needs of young children in a complex and rapidly changing world Comprehensive Multicultural Education in the 21st Century Brandi Hinnant-Crawford,C. Spencer Platt,Christopher Newman,Adriel A. Hilton,2019-04-01 Multicultural education has become its own discipline developed on the shoulders of the work of giants who argued its merit during the attacks of opponents who believed assimilation was the purpose of state sponsored education In an age of rising populism and nationalism throughout the Western world again questioned is the merit of multicultural education In the shadows of Brexit and an America First agenda where migration patterns across the world have led to demographic shifts it is evident even in the richest countries in the world that gaps in opportunity and subsequently achievement still exist Disparities in achievement lead some to question whether multicultural education works and others to revert to old notions that ethnically and linguistically marginalized students are in fact deficient The scholars here believe in the untapped potential of all children and illuminate how educational structures have muffled the cultivation of that potential Contributors argue the goals of multicultural education have not been achieved in part due to the piecemeal application of its tenants The scholarship in this volume illustrates the state of multicultural education and articulates what educators committed to equity inclusion and a more just society must do to ensure the goals of multicultural education survive in the current age The authors of these chapters bridge foundational knowledge with contemporary understandings making the work both accessible for novices and beneficial for the authorities on multicultural education With the diverse cast of contributors and topics ranging from mathematics instruction to discipline practices this volume provides thoughtful discourse on issues of access access to curricular content access to opportunities to learn as well as impediments to access Containing chapters that speak to discipline specific pedagogical practices the structures of schooling teacher education and research methodologies the collected work encourages scholars and practitioners to not be discouraged in the age of retrenchment *Diverse Families, Desirable Schools* Mira Debs,2021-03-09 In *Diverse Families*

Desirable Schools Mira Debs offers a richly detailed study of public Montessori schools which make up the largest group of progressive schools in the public sector As public Montessori schools expand rapidly as alternatives to traditional public schools the story of these schools Debs points out is a microcosm of the broader conflicts around public school choice Drawing on historical research interviews with public Montessori educators and ethnographic case studies Debs explores the forces that pull intentionally diverse progressive schools toward elitism At the heart of Debs s book is a thoughtful analysis of the notion of fit between parents and schools an idea that is central to school choice which is often marketed as an opportunity for parents to find the perfect fit for their kids By exploring parents varied motivations in choosing these schools and observing how families experience or fail to experience a good fit after having chosen a particular school Debs makes an original contribution to the literature on school choice and sheds light on the dilemmas entailed in maintaining diversity in progressive charter and magnet schools
