People were immersed in and ultimately defined by promotional culture. The things they consumed had overtaken class, religion, geography or occupation as the primary form of self identity and self expression. For much of the twentieth century all forms of brand communication from political campaigning to product advertising were based on the theory of rational appeals to rational consumers. There was only one problem with this theory: it was wrong. The Persuasion Industries: The Making of Modern Britain examines developments in marketing, advertising, public relations and branding. It explores the role they played in the emergence of the consumer society. New ideas from fields of behavioural psychology and economics together with internal developments such as planning, positioning and corporate branding allowed persuasion to become the driving force within many commercial enterprises. Together these changes led to the emergence of an alternative emotional model of brand communication. A simple idea that proved so compelling it changed the world we live in. A detailed and fully illustrated account of the development of American aircraft carriers up to and during World War II. This extensively illustrated volume tells the dramatic yet successful story of U.S. aircraft carriers in World War II by class ranging from early pre-war designs to escort carriers built from destroyer hulls to the gigantic fleet carriers serving as the predecessors of modern day super carriers. Besides covering the famous great carrier battles in the Pacific, this book also tells of the equally important actions of U.S. flat tops hunting and destroying German U-boats in the Atlantic, making an enormous contribution to the elimination of the U-boat dangers and the safe arrival of transatlantic supplies so desperately needed for the launch of D-Day. Including profiles and explanatory text boxes, the concise text gives a clear overview of each ship's career, its fate and its significance in American naval history. Moreover, the reader learns about the technical evolution of U.S. carriers throughout the war and the various aircraft launched from these magnificent vessels to engage their Japanese or German foes. This volume provides an overview of preserved World War II flat tops serving as floating museums for future generations as well as a dive to the sunken U.S.S. Saratoga at Bikini Atoll. Praise for *U.S. Aircraft Carriers 1939-45* Bauernfeind brings to the reader a fitting conclusion to a superb historical portrait of these capital warships that carried naval aviation to victory in World War II. This is an exemplary work and is recommended as an introductory reference for readers not already steeped in World War II ship history. *Air Power History*. The coverage of the CVEs and CVLs coupled with the book's first-rate graphics, profuse and precisely captioned photographs, well-written text and reasonable price make it a very good choice for readers looking for an overview of U.S. carriers in World War II.
