Moral Ground Ethical Action For A Planet In Peril:

Moral Ground Kathleen Dean Moore, Michael P. Nelson, 2011-04-15 Moral Ground brings together the testimony of over eighty visionaries theologians and religious leaders scientists elected officials business leaders naturalists activists and writers to present a diverse and compelling call to honor our individual and collective moral responsibility to our planet In the face of environmental degradation and global climate change scientific knowledge alone does not tell us what we ought to do The missing premise of the argument and much needed center piece in the debate to date has been the need for ethical values moral guidance and principled reasons for doing the right thing for our planet its animals its plants and its people Contributors from throughout the world including North America Africa Australia Asia and Europe bring forth a rich variety of heritages and perspectives Their contributions take many forms illustrating the rich variety of ways we express our moral beliefs in letters poems economic analyses proclamations essays and stories In the end their voices affirm why we must move beyond a scientific study and response to embrace an ongoing model of repair and sustainability These writings demonstrate that scientific analysis and moral conviction can work successfully side by side This is a book that can speak to anyone regardless of his or her worldview and that also includes a section devoted to what next thinking that helps the reader put the words and ideas into action in their personal lives Thanks to generous support from numerous landmark organizations such as the Kendeda Fund and Germeshausen Foundation the book is just the starting point for a national and international discussion that will be carried out in a variety of ways from online debate to town hall meetings from essay competitions for youth to sermons from pulpits in all denominations The Moral Ground movement will result in a newly discovered or rediscovered commitment on a personal and community level to consensus about our ethical obligation to the future Contributors include Fred W Allendorf Bartholomew I Mary Catherine Bateson Thomas Berry Wendell Berry Marcus J Borg J Baird Callicott Courtney S Campbell F Stuart Chapin III Robin Morris Collin Michael M Crow Dalai Lama Alison Hawthorne Deming Brian Doyle David James Duncan Massoumeh Ebtekar Jesse M Fink Dave Foreman Thomas L Friedman James Garvey Thich Nhat Hanh Paul Hawken Bernd Heinrich Linda Hogan bell hooks Dale Jamieson Derrick Jensen John Paul II Martin S Kaplan Angayuqag Oscar Kawagley Stephen R Kellert Robin W Kimmerer Barbara Kingsolver Shepard Krech III Ursula K Le Guin Hank Lentfer Carly Lettero Oren Lyons Wangari Maathai Sallie McFague Bill McKibben Katie McShane Curt Meine Ming Xu N Scott Momaday Kathleen Dean Moore Hylton Murray Philipson Gary Paul Nabhan Seyyed Hossein Nasr Michael P Nelson Barack Obama Ernest Partridge John Perry Edwin P Pister Carl Pope Robert Michael Pyle David Quammen Daniel Quinn Kate Rawles Tri Robinson Libby Roderick Holmes Rolston III Deborah Bird Rose Jonathan F P Rose Carl Safina Scott Russell Sanders Lauret Savoy Nirmal Selvamony Ismail Serageldin Peter Singer Sulak Sivaraksa Gary Snyder James Gustave Speth Brian Swimme Bron Taylor Paul B Thompson George Tinker Joerg Chet Tremmel Quincy Troupe Mary Evelyn Tucker Jos Galizia Tundisi Brian Turner Desmond Tutu Steve Vanderheiden John A Vucetich Kimberly A Wade

Sustainable Heritage Amalia Leifeste,Barry L. Stiefel,2018-06-14 This book brings together ecological conservation theory and heritage preservation theory and shows how these two realms have common purpose Through theoretical discussion and illustrative examples Sustainable Heritage reframes the history of multiple movements within preservation and sustainable design strategies into cross disciplinary themes Through topics such as Cultural Relationships with Nature Ecology Biodiversity Energy and Resource Systems Integrating Biodiversity into the Built Environment Rehabilitation Practice Fixing the Shortcomings Within Community Design Planning and Policy Strategies for Adapting Buildings and Structures for Rising Sea Levels and Vehicles as a Microcosm of Approaching Built Environment Rehabilitation the book explores contemporary ecological and heritage ethics as a strategy for improving the livability of the built environment The authors provide a holistic critique of the challenges we face in light of climate and cultural changes occurring from the local to the global level It synthesizes the best practices offered by separate disciplines as one cohesive way forward toward sustainable design The authors consider strategies for increasing the physical and cultural longevity of the built environment why these two are so closely paired and the potential their overlap offers for sustained and meaningful inhabitation Sustainable Heritage unites students and professionals in a wide range of disciplines with one common language and more closely aligned sets of objectives for preservation and sustainable design Sustainability Principles and Practice Margaret Robertson,2021-02-09 Sustainability Principles and Practice gives an accessible and comprehensive overview of the interdisciplinary field of sustainability The focus is on furnishing solutions and equipping students with both conceptual understanding and technical skills Each chapter explores one aspect of the field first introducing concepts and presenting issues then supplying tools for working toward solutions Elements of sustainability are examined piece by piece and coverage ranges over ecosystems social equity environmental justice food energy product life cycles cities and more Techniques for management and measurement as well as case studies from around the world are provided The 3rd edition includes greater coverage of resilience and systems thinking an update on the Anthropocene as a formal geological epoch the latest research from the IPCC and a greater focus on diversity and social equity together with new details such as sustainable consumption textiles recycling microplastics and net zero concepts The coverage in this edition has been expanded to include issues solutions and new case studies from around the world including Europe Asia and the Global South Chapters include further

reading and discussion questions The book is supported by a companion website with online links annotated bibliography glossary white papers and additional case studies together with projects research problems and group activities all of which focus on real world problem solving of sustainability issues This textbook is designed to be used by undergraduate college and university students in sustainability degree programs and other programs in which sustainability is taught New Directions in Philosophy and Literature David Rudrum,2019-08-22 This forward thinking volume draws on new developments in philosophy including speculative realism object oriented ontology the new materialisms posthumanism analytic philosophy of language and metaphysics and ecophilosophy alongside close readings of a range of texts from the literary canon

Around the World in 80 Species Jill Atkins,Barry Atkins,2018-11-08 The world is currently experiencing a sixth period of mass species extinction and extinction of flora and fauna is caused by a variety of factors arising from industrial activity and increasing human population such as global warming climate change habitat loss pollution and use of pesticides Most causes of extinction are linked to corporate activity either directly or indirectly Around the World in 80 Species Exploring the Business of Extinction responds to the ongoing mass extinction crisis engulfing our planet by exploring the ways in which accounting business and finance can be used to prevent species extinctions From Africa to the Far East and from Europe to the Americas the authors explore species loss and how businesses can stop mass extinctions through greater transparency and through closer engagement with their investors and wildlife organisations The book concludes that global capitalism has led us to this extinction crisis and that therefore the mechanisms of capitalism namely accounting finance investment can help to pull us out Businesses must urgently address extinction before it is too late for all species including ourselves As the first book to explore corporate accounting and accountability in relation to species on the brink of extinction this book will be of great interest to both professionals and a wider audience interested in the causes and prevention of extinction

Rewriting American Identity in the Fiction and Memoirs of Isabel Allende B. Craig,2013-08-20 Moving away from territorially bound narratives toward a more kinetic conceptualization of identity this book represents the first analysis of the politics of American identity within the fiction and memoirs of Isabel Allende Craig offers a radical transformation of societal frameworks through revised notions of place temporality and space **Confronting Climate Crises through Education**

Rebecca L. Young,2018-10-15 Confronting Climate Crises through Education Reading Our Way Forward envisions the responsibility of public education to engage a citizenry more prepared to address the challenges of a changing world Young advocates a paradigm shift that positions ecopedagogy as the central organizing principle of curriculum and assessment design Each chapter outlines ways literature can serve as a cultural lens for examining the complex patterns of contexts behind our most pressing climate concerns including potential solutions these patterns may illuminate A focus on fiction and non fiction exemplars that can provide such a lens illustrates practical steps educators can take to develop instruction around the immediately relevant environmental crises we are experiencing and to inspire more ecologically conscious globally

minded problem solvers prepared to confront them

The Violence of Climate Change Kevin J. O'Brien, 2017-06-01

Climate change is viewed as a primarily scientific economic or political issue While acknowledging the legitimacy of these perspectives Kevin J O'Brien argues that we should respond to climate change first and foremost as a case of systematic and structural violence Global warming is largely caused by the carbon emissions of the affluent emissions that harm the poor first and worst Climate change is violence because it divides human beings from one another and from the earth O'Brien offers a constructive and creative response to this violence through practical examples of activism and nonviolent peacemaking providing brief biographies of five Christians in the United States John Woolman Jane Addams Dorothy Day Martin Luther King Jr and Cesar Chavez These activists idealism social commitment and political savvy offer lessons of resistance applicable to the struggle against climate change and for social justice

Actions of Their Own to Learn

, 2017-01-01 What does it mean to take actions of one's own to learn How do human beings create meaning for themselves and with others How can learners active efforts to build knowledge be encouraged and supported In this edited compilation scholars from a diverse range of academic and professional backgrounds address these questions grounded in the conviction that the ability to take effective action of one's own to learn is itself an essential form of knowledge In an era of dramatic social environmental and political change the need to access vast amounts of information to make decisions demands that learners become active agents in their own knowledge development Educators are transforming ideas about their roles as they strive to provide guidance to help learners take the lead in their own learning Learners are building new ideas about their capacities to gather and organize information while working with others No longer simply consumers of information they are beginning to see themselves as capable and effective researchers Researchers are also expanding ideas about their knowledge gathering work and identities No longer simply reporters of information researchers are seeing themselves as learners as they engage in deeper more collaborative ways with participants in their research Chapter authors describe their dedicated and often career long journeys to show the vital connections between knowledge acting to learn identity and being To engage in this work means disrupting traditional ideas about how knowledge is most effectively acquired This book will inspire researchers educators and educational planners as they build the kinds of new participative structures needed to support individual and collective actions to learn See inside the book

The Anthropocene Project Byron Williston, 2015 The evidence presented in the recently released Fifth Assessment Report AR5 of the Intergovernmental Panel on Climate Change IPCC suggests strongly that continued failure to make meaningful cuts to greenhouse gas emissions could bring about disastrous results for the human community especially for future generations Summing up the findings of AR5 Rajendra Pachauri chairman of the IPCC has stated that our persistent inaction on climate change presents a grave threat to the very social stability of human systems The Anthropocene Project attempts to make philosophical sense of this examining the reasons for the inaction highlighted by the IPCC and suggests the normative bases for overcoming it Williston identifies that

we are now in the human age the Anthropocene but he argues that this is no mere geological marker It is instead best viewed as the latest permutation of an already existing moral and political project rooted in Enlightenment values The author shows that it can be fruitful to do climate ethics with this focus because in so many aspects of our culture we already endorse broadly Enlightenment values about progress equality and the value of knowledge But these values must be robustly instantiated in the dispositions of moral agents and so we require a climate ethics emphasizing the virtues of justice truthfulness and rational hope One of the book's most original claims is that our moral failure on this issue is in large part the product of motivated irrationality on the part of the world's most prosperous people We have failed to live up to our commitments to justice and truthfulness because we are respectively morally weak and self deceived Understanding this provides the basis for the rational hope that we might yet find a way to avoid climate catastrophe

A Practical Guide to Educating for Responsibility in Management and Business Ross McDonald, 2013-08-10 What does it mean to educate for responsibility The author of this book will teach you about the new way of engaging young people with the challenge of changing their world for the better Designed for application in any educational context dealing with ethics responsibility or human development this book explains in detail how to facilitate anyone's ability to think and act in more fully responsible ways In contrast to the predominant model of teaching which is almost exclusively an intellectual education about responsibility educating for responsibility integrates emotion insight observation and action so anyone can learn the true dynamics of exercising this resilient capacity Inside educating for responsibility is explained and a template offered for a creative way of teaching that has proven to be extremely effective in practice Written particularly for those offering courses or training in social responsibility sustainability or business ethics it offers a new way of thinking about how we might better serve the interests of a generation of young people entering a rapidly changing and by all accounts rapidly destabilizing world

Teaching Climate Change to Adolescents Richard Beach, Jeff Share, Allen Webb, 2017-05-25 THE essential resource for middle and high school English language arts teachers to help their students understand and address the urgent issues and challenges facing life on Earth today this text features classroom activities written and used by teachers and a website <http://climatechangeela.pbworks.com> with additional information and links All royalties from the sale of this book are donated to Alliance for Climate Education <https://acespace.org>

Climate Actions Laurence L Delina, 2018-05-31 Climate change remains a challenge that needs to be addressed at its core particularly the rapid reduction of anthropogenic greenhouse gas emissions This book discusses strategies for climate actions by synthesizing insights from a set of international contemporary social action group's surveys Based on these Delina introduces a synthesis of mechanisms for generating change designed around 5 main themes relationships relating value based messages messaging alternatives visioning diversity webbing and communication interacting This book will be of great value to all academics and practitioners interested in the future development of our climate

Living Well Now and in the Future Randall Curren, Ellen

Metzger,2018-02-02 A philosopher and a scientist propose that sustainability can be understood as living well together without diminishing opportunity to live well in the future Most people acknowledge the profound importance of sustainability but few can define it We are ethically bound to live sustainably for the sake of future generations but what does that mean In this book Randall Curren a philosopher and Ellen Metzger a scientist clarify normative aspects of sustainability Combining their perspectives they propose that sustainability can be understood as the art of living well together without diminishing opportunity to live well in the future Curren and Metzger lay out the nature and value of sustainability survey the problems catalog the obstacles and identify the kind of efforts needed to overcome them They formulate an ethic of sustainability with lessons for government organizations and individuals and illustrate key ideas with three case studies Curren and Metzger put intergenerational justice at the heart of sustainability discuss the need for fair as opposed to coercive terms of cooperation to create norms institutions and practices conducive to sustainability formulate a framework for a fundamental ethic of sustainability derived from core components of common morality and emphasize the importance of sustainability education The three illustrative case studies focus on the management of energy water and food systems examining the 2010 Gulf of Mexico oil spill Australia's National Water Management System and patterns of food production in the Mekong region of Southeast Asia

Denying Science John Grant,2011-10-04 Is global warming just scaremongering by climatologists conspiring to protect their jobs Is evolution just a theory Is autism caused by vaccinations The answer to all of these questions is of course no The scientific evidence is now in and it's conclusive on these and many more issues that are fundamental to our knowledge and wellbeing But you'd never know this if all of your information came from the popular media or your upbringing and immediate circle of influence didn't include critical thinking and basic scientific literacy As this witty book with a very serious message shows our culture has in recent decades been characterized by a widespread antagonism toward science and the not always welcome messages it brings Large sections of the supposedly sophisticated populations in the developed nations are in an active state of denial Not only do they deny scientific evidence but they also call into question the very competence of science as a descriptor of reality In short they deny reality The author surveys the gamut of clearly unscientific ideas concerning the food we eat the medicines and potions we are either afraid of or advised to take our sex preferences and a host of other issues that are raised by various panics urban legends and a general climate of misinformation He also examines how special interests from agribusiness to pharmaceutical companies to creationists actively work to distort or suppress scientific findings While the tendency may be to laugh at some of the ridiculous notions catalogued in the author's overview of bogus ideas the overall picture he creates is anything but funny This book reminds the reader that the future of free increasingly complex societies depends on an educated citizenry that is able to think clearly and critically based on reliable information

Religious Environmental Activism Jens Köhrsen,Julia Blanc,Fabian Huber,2022-12-20 This volume explores how religious and spiritual actors engage for environmental protection and fight

against climate change Climate change and sustainability are increasingly prominent topics among religious and spiritual groups Different faith traditions have developed green theologies launched environmental protection projects and issued public statements on climate change Against this background academic scholarship has raised optimistic claims about the strong potentials of religions to address environmental challenges Taking a critical stance with regard to these claims the chapters in this volume show that religious environmentalism is an embattled terrain Tensions are an inherent part of religious environmentalism These do not necessarily manifest themselves in open clashes between different parties but in different actions views theologies ambivalences misunderstandings and sometimes mistrust Keeping below the surface these tensions can create effective barriers for religious environmentalism The chapters examine how tensions are manifested and dealt with through a range of empirical case studies in various world regions Covering different religious and spiritual traditions they reflect on intradenominational interdenominational interreligious and religious societal tensions Thereby this volume sheds new light on the problems that religions face when they seek to take an active role in today s societal challenges The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license Nature's Trust Mary Christina Wood, 2013-09-30 Environmental law has failed us all As ecosystems collapse across the globe and the climate crisis intensifies environmental agencies worldwide use their authority to permit the very harm that they are supposed to prevent Growing numbers of citizens now realize they must act before it is too late This book exposes what is wrong with environmental law and offers transformational change based on the public trust doctrine An ancient and enduring principle the trust doctrine asserts public property rights to crucial resources Its core logic compels government as trustee to protect natural inheritance such as air and water for all humanity Propelled by populist impulses and democratic imperatives the public trust surfaces at epic times in history as a manifest human right But until now it has lacked the precision necessary for citizens government employees legislators and judges to fully safeguard the natural resources we rely on for survival and prosperity The Nature s Trust approach empowers citizens worldwide to protect their inalienable ecological rights for generations to come

Unveiling the Power of Verbal Beauty: An Emotional Sojourn through **Moral Ground Ethical Action For A Planet In Peril**

In some sort of inundated with displays and the cacophony of instantaneous conversation, the profound power and emotional resonance of verbal beauty usually diminish into obscurity, eclipsed by the regular assault of sound and distractions.
