Play and Participation in Contemporary Arts Practices Tim Stott, 2015-03-24 This book

engages debates in current art criticism concerning the turn toward participatory works of art. In particular, it analyzes ludic participation in which play and games are used organizationally so that participants actively engage with or complete the work of art through their play. Here Stott explores the complex and systematic organization of works of ludic participation showing how these correlate with social systems of communication, exhibition, and governance. At a time when the advocacy of play and participation has become widespread in our culture, he addresses the shortage of literature on the use of play and games in modern and contemporary arts practice in order to begin a play theory of organization and governance.

Handbook of Social Development Vincent B. Van Hasselt, Michel Hersen, 2013-11-11 Social development over one's lifetime is a complex area that has received considerable attention in the psychological, social psychological, and sociological literature over the years. Surprisingly, however, since 1969 when Rand McNally published Goslin's *Handbook of Socialization*, no comprehensive statement of the field has appeared in book form. Given the impressive data in this area that have been adduced over the last two decades, we trust that our handbook will serve to fill that gap. In this volume we have followed a lifespan perspective starting with the social interactions that transpire in the earliest development stages and progressing through childhood, adolescence, adulthood, and finally one's senior years. In so doing we cover a variety of issues in depth. The book contains 21 chapters and is divided into five parts: I Theoretical Perspectives; II Infants and Toddlers; III Children and Adolescents; IV Adults; and V The Elderly. Each of the parts begins with introductory material that reviews the overall issues to be considered. Many individuals have contributed to the final production of this handbook. Foremost are our eminent contributors who graciously agreed to share with us their expertise. We also thank our administrative and technical staff for their assistance in carrying out the day to day tasks necessary to complete such a project. Finally, we thank Eliot Werner, Executive Editor at Plenum, for his willingness to publish and for his tolerance for the delays inevitable in the development of a large handbook.

Volume 10 includes such topics as student experiences with child play in hospitals, ethnographic studies of preschool play, and the connection between children and animals. The primary focus of the papers in this volume is to reflect on the close relationship between play and the process of engaging and communicating with others in different contexts.
