Pascals Fire Scientific Faith And Religious Understanding:

Pascal's Fire Keith Ward,2013-10-01 Groundbreaking ingenious and devastatingly clear Keith Ward s Pascal s Fire is guaranteed to reignite the timeless dispute of whether scientific advancement threatens religious belief Turning the conventional debate on its head Ward suggests that the existence of God is actually the best starting point for a number of the most famous scientific positions From quantum physics to evolution the suggestion of an ultimate mind adds a new dimension to scientific thought enhancing rather than detracting from its greatest achievements Also responding to potential criticisms that his ultimate mind is unrecognisable as the God of Abraham Ward examines our most fundamental beliefs in a new light Emerging with a conception of God that is consistent with both science and the world s major faiths this ambitious project will fascinate believers and sceptics alike

THE FANTASY OF FAITH Rogene A. Buchholz,2023-08-16 In a nutshell Christianity is one of the greatest if not the greatest hoax ever perpetuated on people in the history of the universe It is practically all fantasy of one sort or another that millions of people believe in all over the world and have done so for many centuries since Christianity began It all could have been made up out of whole cloth The Old Testament cannot be taken at face value as the creation story was most likely borrowed from other sources and adapted to fit with the author s purpose of explaining how the world began The Exodus may be entirely fiction and most certainly did not happen the way it is described in the Bible As far as the New Testament is concerned it was written decades after the crucifixion of Jesus by people who were not eyewitnesses to the events they described There may have been a prophet whose teachings drew many followers but there was certainly no virgin birth no miracles and no resurrection The purpose of all the apocalyptic writing and second coming of Christ may have been motivated by the oppression of the Roman Empire where the Jewish people felt powerless and needed to believe in something that would provide them with a feeling that in the final analysis justice would be done and they would get their revenge Thus Christianity needs to be exposed for the fraud that it is which is what this book attempts to do by looking at the history of Christianity Biblical scholarship and other aspects of Christianity along with its alternatives

The Great Partnership Jonathan Sacks,2012-09-11 National Jewish Book Awards 2012 Finalist Dorot Foundation Award for Modern Jewish Thought and Experience An impassioned erudite thoroughly researched and beautifully reasoned book from one of the most admired religious thinkers of our time that argues not only that science and religion are compatible but that they complement each other and that the world needs both Atheism deserves better than the new atheists states Rabbi Jonathan Sacks whose methodology consists of criticizing religion without understanding it quoting texts without contexts taking exceptions as the rule confusing folk belief with reflective theology abusing mocking ridiculing caricaturing and

demonizing religious faith and holding it responsible for the great crimes against humanity Religion has done harm I acknowledge that But the cure for bad religion is good religion not no religion just as the cure for bad science is good science not the abandonment of science Rabbi Sacks's counterargument is that religion and science are the two essential perspectives that allow us to see the universe in its three dimensional depth Science teaches us where we come from Religion explains to us why we are here Science is the search for explanation Religion is the search for meaning We need scientific explanation to understand nature We need meaning to understand human behavior There have been times when religion tried to dominate science And there have been times including our own when it is believed that we can learn all we need to know about meaning and relationships through biochemistry neuroscience and evolutionary psychology In this fascinating look at the interdependence of religion and science Rabbi Sacks explains why both views are tragically wrong

The Mystery of Existence John Leslie, Robert Lawrence Kuhn, 2013-04-22 This compelling study of the origins of all that exists including explanations of the entire material world traces the responses of philosophers and scientists to the most elemental and haunting question of all why is anything here or anything anywhere Why is there something rather than nothing Why not nothing It includes the thoughts of dozens of luminaries from Plato and Aristotle to Aquinas and Leibniz to modern thinkers such as physicists Stephen Hawking and Steven Weinberg philosophers Robert Nozick and Derek Parfit philosophers of religion Alvin Plantinga and Richard Swinburne and the Dalai Lama The first accessible volume to cover a wide range of possible reasons for the existence of all reality from over 50 renowned thinkers including Plato Aristotle Aquinas Descartes Leibniz Hume Bertrand Russell Stephen Hawking Steven Weinberg Robert Nozick Derek Parfit Alvin Plantinga Richard Swinburne John Polkinghorne Paul Davies and the Dalai Lama Features insights by scientists philosophers and theologians Includes informative and helpful editorial introductions to each section Provides a wealth of suggestions for further reading and research Presents material that is both comprehensive and comprehensible [Does God Roll Dice?](#)

Joseph A. Bracken, 2012 In *Does God Roll Dice* noted Jesuit scholar Joseph Bracken builds on his previous work in an attempt to provide an adequate metaphysical structure with which to understand the God world relationship The compatibility between faith and science depends Bracken has argued on an adequate metaphysical conception of reality In this new book he makes clear how a good understanding of the relationship between the One as a transcendent reality that serves as a necessary principle of order and intelligibility and the Many as the concrete differences between people and things at any given moment makes a significant difference in dealing with controversial issues in the field of theology and science thereby easing tensions where they need not exist **Islam and the Problem of Black Suffering** Sherman A. Jackson, 2013-04

The problem confronting theology in the black community is not simply proving that God exists but rather that God cares For the Muslim it is essential that such a theology be grounded in the Quran and Islam's theological tradition The Blackamerican Muslim meanwhile must also vindicate the protest oriented agenda of black religion These are the tasks Sherman Jackson

undertakes in this path breaking work Religious Pluralism and the Modern World S. Sugirtharajah, 2011-12-13 A fascinating collection of essays by leading scholars in the field engage with the idea of religious pluralism mooted by John Hick to offer incisive insights on religious pluralism and related themes and to address practical aspects such as interreligious spirituality and worship in a multi faith context God and Natural Order Shaun C. Henson, 2013-12-04 In *God and Natural Order* Physics Philosophy and Theology Shaun Henson brings a theological approach to bear on contemporary scientific and philosophical debates on the ordered or disordered nature of the universe Henson engages arguments for a unified theory of the laws of nature a concept with monotheistic metaphysical and theological leanings alongside the pluralistic viewpoints set out by Nancy Cartwright and other philosophers of science who contend that the nature of physical reality is intrinsically complex and irreducible to a single unifying theory Drawing on the work of theologian Wolfhart Pannenberg and his conception of the Trinitarian Christian god the author argues that a theological line of inquiry can provide a useful framework for examining controversies in physics and the philosophy of science *God and Natural Order* will raise provocative questions for theologians Pannenberg scholars and researchers working in the intersection of science and religion **The Problem of Evil and the Power of God** Atle Ottesen Søvik, 2011-05-23 This book discusses four different answers to the problem of evil provided by Richard Swinburne Keith Ward David Griffin and Johan Hygen The author suggests several improvements to these answers and concludes that there is a coherent answer to the problem of evil **Light from Light** Judith L. Corey, 2016-12-01 Cosmology and theology share a long held relationship with one another explaining as they do the constitution of the world and the interaction of forces The author explores the history of this relationship from ancient pre scientific and theological explanations through to contemporary science and philosophy In this history a particular problem is highlighted by the author the prevalence of dualism from Aristotelian philosophy to modern mechanistic conceptions many of these accounts presume a sharp absolute dichotomy between matter and spirit and the material world and the divine Increasingly dualistic conceptions are called into question by contemporary science theology and philosophy The author argues that a particular trajectory stemming from Greek Heraclitian and Platonic philosophy to non orthodox and early Christian theologies provides a fruitful resource for contemporary discussions This is the Logos theology and its attendant language of light The author brings this tradition into dialogue with contemporary science and theology to construct an integrative account **Christianity in Politics** Rogene A. Buchholz, 2021-12-01 Democracy is in peril and on the brink of extinction in the United States of America There are many reasons why it has gotten to this point but this book looks exclusively at the role Evangelical Christianity has played in the process By infusing the Republican Party with its values world view and its vision for America it has contributed to the divisiveness that has made it virtually impossible to govern Our government is hopelessly crippled because of two different world views one that is inherently racist and exclusionary where evidence doesn't matter and authoritarianism is favored and

the other that is more inclusive and progressive where evidence matters science is respected and democracy is valued It is difficult to find a common ground between these world views and get anything done for the country making alternative means of governing more attractive to people throughout the world who are watching what is happening in America

Atheist Persona John J. Pasquini,2014-04-15 In the past as in the present science has explored the reasons for belief In recent years with the rise of categorical practical and militant atheism the scientific and philosophical community has begun studying the worldview of atheism *The Atheist Persona Causes and Consequences* is a summary of the most recent research by the best of scholars on the subject of atheism In an effort to create a more courteous dialogue between theists and atheists this book acknowledges that while there are reasons for believing in God there are also reasons for not believing in God *Atheist Persona* showcases how the worldview we choose to accept determines how we live our lives and how we influence those around us

The New Atheism, Myth, and History Nathan Johnstone,2018-06-11 This book examines the misuse of history in New Atheism and militant anti religion It looks at how episodes such as the Witch hunt the Inquisition and the Holocaust are mythologized to present religion as inescapably prone to violence and discrimination whilst the darker side of atheist history such as its involvement in Stalinism is denied At the same time another constructed history that of a perpetual and one sided conflict between religion and science rationalism is commonly used by militant atheists to suggest the innate superiority of the non religious mind In a number of detailed case studies the book traces how these myths have long been overturned by historians and argues that the New Atheism s cavalier use of history is indicative of a troubling approach to the humanities in general Nathan Johnstone engages directly with the God debate at an academic level and contributes to the emerging study of non religion as a culture and an identity

Good and Bad Religion Peter Vardy,2014-07-23 Intends to provide criteria to separate good and bad manifestations of religion found in the Western and Eastern philosophical conditions that there is a single human nature which all human beings share and certain types of attitudes and behaviour can be profoundly damaging

How Great Thou Art! Owen F. Cummings,2024-08-09 Christian thinking about the theology of creation has received new impetus in recent decades This is due to among other things a more holistic approach to Holy Scripture fresh insights from the history of Christian doctrine the stimulus afforded by contemporary philosophies and the desire to praise and thank God the Creator for the gift of creation This little volume opens up all of those areas in an informed yet accessible way

Science and Religion Rogene A. Buchholz,2023-02-15 Science and religion are two different worldviews that involve different methods of attaining truth one based on evidence using a scientific method to examine the natural world and the other based on belief in certain religious precepts often involving a supernatural dimension based on a holy book in some cases and on the authority of religious leaders This book examines the nature of religion and the role it plays in society along with unresolved problems that have existed for some time The nature of science is then discussed along with the scientific method and problems with science that have not been resolved The

origins of science and religion are then examined and the relationship of these two worldviews and the relationship of science to the supernatural Finally the future of religion is examined along with its ongoing relationship to science The real battle between science and religion involves the question of who gets to decide the truth about the world we live in and our status as human beings in this world The answer to that question is not obvious but has enormous implications for human life on a planet that is under stress and may not be able to support human life for much longer as our actions have consequences that are now becoming all too apparent

The World in the Trinity Joseph A. Bracken, S. J., 2014-09-01 Joseph A Bracken argues that the failure of theology and science to generate cohesion is the lack of an integrated system of interpretation of the Christian faith that consciously accords with the insights and discoveries of contemporary science Bracken utilizes the language and conceptual structures of systems theory as a philosophical and scientific grammar to show traditional Christian beliefs in a new light that is accessible and rationally plausible to a contemporary scientifically influenced society

Adventures in Belief Keith Ward, 2022-11-11 Keith Ward philosopher ethicist theologian Anglican priest cathedral canon and book writing addict has spent his life thinking about the big questions and what's more getting paid for it This philosophical pilgrimage led him from jobs at Glasgow and St Andrew's Universities in Scotland to Cambridge University then on to King's College London followed by Oxford University by invitation of the Queen before moving back to London at Gresham College Heythrop College and Roehampton University Along the way he became a fellow of the British Academy and of a number of academic institutions gathering up doctorates from various places and writing more books than your bookshelf can handle This sounds awfully dull but according to Keith Ward it was great fun and he experienced all these things with a feeling of slight surprise and with an irrepressible sense of humour Having retired exhausted at eighty one Ward could not resist one more book This is it a humorous account of his life and thought especially to show how he developed his own philosophy of personal idealism It is both a genuinely amusing account of the life of an English academic and a rather profound account of an anti materialistic and scientifically informed philosophy
