Pastimes is the first book in English on Chinese jinshi or antiquarianism the pinnacle of traditional connoisseurship of ancient artifacts and inscriptions As a scholarly field jinshi was inaugurated in the Northern Song 960 1127 and remained popular until the early twentieth century Literally the study of inscriptions on bronze vessels and stone steles jinshi combined calligraphy and painting the collection of artifacts and philological and historical research For aficionados of Chinese art the practices of jinshi offer a fascinating glimpse into the lives of traditional Chinese scholars and artists who spent their days roaming the sometimes seamy world of the commercial art market before attending elegant antiquarian parties where they composed poetic tributes to their ancient objects of obsession And during times of political upheaval such as the nineteenth century the art and artifact studies of jinshi legitimized reform and contributed to a dynamic and progressive field of learning Indeed the paradox of jinshi is that it was nearly as venerable as the ancient artifacts themselves and yet it was also subject to continual change This was particularly true in the last decades of the Qing 1644 1911 and the first decades of the twentieth century when a diverse group of cosmopolitan and science minded scholars contributed to what was considered at the time to be a revolution in traditional linguistics These antiquarians transformed how historians used literary sources and material artifacts from the ancient past and set the stage for a new understanding of the longevity and cohesiveness of Chinese history The history of jinshi offers insights that are relevant to Chinese cultural and intellectual history art history and politics Scholars of the modern period will find the resiliency and continuing influence of jinshi to be an important counterpoint to received views on the trajectory of Chinese cultural and intellectual change We are accustomed to think that Chinese modernity originated in the great tumult of the turn of the century encounter with foreign learning The example of jinshi reveals the significance of local transformations that occurred much earlier in the nineteenth century Its combination of art and historiography reveals the full range of scholarly appreciation for the past and its artifacts and provides a unique perspective from which to define modern China and illuminate its indigenous origins **Sketch of the history of**

Baraniecka-Olszewska, 2021-10-21 This book explores the consequences of the latest political shifts in Central Eastern Europe the rise of right wing parties and among other things politics becoming more invested in history These phenomena coincide and overlap with the democratisation of history by turning the past into a hot topic persistently present in the public sphere and often evoking strong emotions Ethnographic research conducted in 2012-2016 focusing on how World War II reenactors experience the past serves as the basis to analyse the ways in which the group uses the widespread often institutionalised interest in history to on the one hand become involved in debates on World War II and the remembrance thereof and on the other to authentically experience this past The volume therefore analyses how physical the process of creating and experiencing grassroots visions of the past is and how these visions interact with the public discourse about the past Reenactors ability to marry the often contradictory orders of historical truth authenticity and representation is explored Moreover Baraniecka Olszewska analyses how the reenactors overcome various obstacles on their way towards authentic experiences performing history through their bodies
