**Information Resources in Toxicology, Volume 1: Background, Resources, and Tools**, 2020-05-16. This new fifth edition of *Information Resources in Toxicology* offers a consolidated entry portal for the study, research, and practice of toxicology. Both volumes represent a unique, wide-ranging, curated international annotated bibliography and directory of major resources in toxicology and allied fields such as environmental and occupational health, chemical safety, and risk assessment. The editors and authors are among the leaders of the profession, sharing their cumulative wisdom in toxicology's subdisciplines. This edition keeps pace with the digital world in directing and linking readers to relevant websites and other online tools. Due to the increasing size of the hardcopy publication, the current edition has been divided into two volumes to make it easier to handle and consult. Volume 1: Background, Resources, and Tools, arranged in 5 parts, begins with chapters on the science of toxicology, its history, and its informatics framework in Part 1. Part 2 continues with chapters organized by more specific subject such as cancer, clinical toxicology, genetic toxicology, etc. The categorization of chapters by resource format, for example, journals and newsletters, technical reports, organizations, constitutes Part 3. Part 4 further considers toxicology's presence via the Internet, databases, and software tools. Among the miscellaneous topics in the concluding Part 5 are laws and regulations, professional education, grants and funding, and patents. Volume 2: The Global Arena offers contributed chapters focusing on the toxicology contributions of over 40 countries, followed by a glossary of toxicological terms and an appendix of popular quotations related to the field. The book, offered in both print and electronic formats, is carefully structured, indexed, and cross-referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge they were not originally aware they needed. Among the many timely topics receiving increased emphasis are disaster preparedness, nanotechnology, omics, risk assessment, societal implications such as ethics and the precautionary principle, climate change, and children's environmental health. Introductory chapters provide a backdrop to the science of toxicology, its history, the origin and status of toxicoinformatics, and starting points for identifying resources. Offers an extensive array of chapters organized by subject, each highlighting resources such as journals, databases, organizations, and review articles. Includes chapters with an emphasis on format such as government reports, general interest publications, blogs, and audiovisuals. Explores recent internet trends, web-based databases, and software tools in a section on the online environment. Concludes with a miscellany of special topics such as laws and regulations, chemical hazard communication, resources, careers.

and professional education K 12 resources funding poison control centers and patents Paired with Volume Two which focuses on global resources this set offers the most comprehensive compendium of print digital and organizational resources in the toxicological sciences with over 120 chapters contributions by experts and leaders in the field **Asbestos** Michele Carbone, Ronald Dodson, Harvey Pass, Haining Yang, 2024-08-21 **Asbestos Risk Assessment Epidemiology and Health Effects** offers a key text on the evolving information regarding asbestos and human health Now in its third edition this bestseller explores the pathological complexities of asbestos related disease and examines how asbestos induces diseases in biological systems The book also discusses the types of instruments and methods available for evaluation of the content of asbestiform minerals in products air water surface areas and tissue It explains the relevance of each of these applications and gives readers the tools to evaluate data in the future Edited by leading authorities on the subject and with contributions from a team of international experts this book takes a cross disciplinary approach and an authoritative review of the history pathology epidemiology sampling and analysis of asbestos Backed up with photos and numerous diagrams tables and photographs it features case studies methodologies and sampling analytical schemes that put learning into context Fully up to date and featuring four brand new chapters covering asbestosis and immunity asbestos litigation and surgical and non surgical management of mesothelioma this book remains the most comprehensive source of information on asbestos and the only guide the reader will ever need to own This essential text will appeal to any professional at any level who requires the latest expertise in dealing with asbestos It suits researchers and practitioners alike as well as those in the fields of law health education hospitality emergency response building management and maintenance construction safety insurance and industrial hygiene **Occupational Cancers** Sisko Anttila, Paolo Boffetta, 2020-02-10 This revised and updated new edition of a successful book is a multidisciplinary comprehensive guide to occupational factors of malignant diseases Building on the first edition new research discoveries and their consequences in our understanding on carcinogenic mechanisms diagnosis and attribution of occupational cancers are discussed Examples of such discoveries are germline and acquired mutations of BAP1 in malignant mesothelioma which have led to changes in diagnostic criteria and carcinogen specific genetic and epigenetic alterations in lung cancer There are several new chapters including gastrointestinal cancers epidemiology of lung cancer cancer of thyroid and the role of primary health care in occupational cancer control Occupational Cancers is aimed at experienced and trainee oncologists pathologists clinicians in occupational health and pulmonologists as well as epidemiologists clinical researchers lawyers and public health officials **Health Risk Assessment for Asbestos and Other Fibrous Minerals** Andrey Korchevskiy, James Rasmuson, Eric Rasmuson, 2024-07-10 Evaluates the risks and human health impacts of asbestos and other fibrous minerals Despite continuous efforts to eliminate asbestos from commercial use it remains a serious occupational and environmental hazard Health Risk Assessment for Asbestos and Other Fibrous Minerals provides a rigorous discussion of risk assessment methodology for elongate mineral particles covering basics theory models
