## **Patrick Geddes And Town Planning A Critical View:**

Patrick Geddes and Town Planning Noah Hysler-Rubin, 2013-12-16 Patrick Geddes is considered a forefather of the modern urban planning movement. This book studies the various and even opposing ways in which Geddes has been interpreted up to this day, providing a new reading of his life, writing, and plans. Geddes' scrutiny is presented as a case study for Town Planning as a whole. Tying together for the first time key concepts in cultural geography and colonial urbanism, the book proposes a more vigorous historiography exposing hidden narratives and past agendas still dominating the disciplinary discourse. Written by a cultural geographer and a town planner, this book offers a rounded full-length analysis of Geddes' vision and its material manifestation, functioning also as a much-needed critical tool to evaluate Modern Town Planning as an academic and practical discipline. The book also includes a long overdue model of his urban theory. The Practice of Freedom Richard J. White, Simon Springer, Marcelo Lopes de Souza, 2016-09-29 The last two decades have seen a re-birth of practices and principles that connect with the soul of left libertarianism, although they may not explicitly engage with the anarchist tradition. From practices of mapping and land use planning to local protests and transnational social movements, this book explores a variety of case studies that trace the influences of and affinities between anarchist and geographic practice. The chapters explore the vast possibilities of inventive exploratory libertarian practices from contemporary and historic contexts around the globe. They examine the ways in which various spatial practices have been compatible with left libertarian principles and explore the extent to which anarchists, neo-anarchists, and libertarian autonomists have animated these waves of protest and forms of resistance. In an age that is desperately in need of critical new directions, this volume shows that a serious re-turn toward anarchist thought and practice can challenge and inspire geographers to travel beyond their traditional frontiers of geographical praxis. **Colonial Diplomacy through Art** Moya Tönnies, 2024-12-30 Addressing Zionists in 1923, the British artist C. R. Ashbee spoke of that preposterous Balfour Declaration whose Arabic tail you people perpetually ignore but the lash of which you will some day feel. His warnings received no attention at the time nor has his radical pro-Arab/Palestinian political position been researched since. One hundred years later, this art historical study asks what possibilities individual colonial actors had to influence official colonial policy. In the example of Jerusalem under British rule, Moya Tönnies analyses how three members of the British administration, Ashbee, architect Ernest Tatham, Richmond, and governor Ronald Storrs, all three identifying with the International Arts and Crafts Movement, used art as a diplomatic sphere for their British colonial anti-Zionist interventions. *The Planning and Building of the Hebrew University, 1919-1948* Diana Dolev, 2016-03-08 Since the construction of the first Holy Temple on Mount Moriah in Jerusalem in 957 BCE, the site became one of the holiest places for Jews, Christians, and Muslims around the world. Once the Dome of the Rock was built during early Islam, the edifice replaced the temple, and for centuries pilgrims, travelers, and locals would climb up to the Mount Scopus summit for the magnificent view it afforded. Hence, planning and building an institute of national importance on Mount

Scopus could not disregard the implications of that view of the Temple Mount in terms of beauty religious sentiments and the link to a historic golden age

**The Planning and Building of the Hebrew University 1919 1948 Facing the Temple Mount** traces for the first time the history of the construction of this highly significant Zionist enterprise It follows the years of the British Mandate rule over Palestine bookended between the Ottoman Empire government and Israel's independence an era of great changes in the area Jerusalem in particular In the three decades between 1919 and 1948 five different master plans were drawn up for the university though none of them were fully implemented Only seven buildings were designed and fully completed Each plan and building presented an interpretation of a university conception that also related to prevailing styles and ideological trends Underlying each one were intricate power struggles donors wishes and architectural concerns Internationally famous town planners and architects such as Patrick Geddes and Erich Mendelsohn took part in designing the campus The book also reveals comparatively unknown architects and their contribution to the campus

*New Under the Sun* Netta Cohen, 2024-04-16 *New under the Sun* explores Zionist perceptions of and responses to Palestine's climate From the rise of the Zionist movement in the late 1890s to the establishment of the State of Israel in 1948 Netta Cohen traces the production of climatic knowledge through a rich archive that draws from medicine and botany technology and economics and architecture and planning As Cohen convincingly argues this knowledge was not only shaped by Jewish settlers Eurocentric views but was also indebted to colonial practices and institutions Zionists' claims to the land were often based on the construction of Jewish settlers as natives even while this was complicated by their alienated responses to Palestine's climate *New under the Sun* offers a highly original environmental lens on the ways in which Zionism's spatial ambitions and racial fantasies transformed the lives of humans and nonhumans in Palestine

**Of Greater Dignity than Riches** Farhan Karim, 2019-03-07 Extreme poverty which intensified in India during colonial rule peaked in the 1920s after decades of imperialist exploitation famine and disease a time when architects engineers and city authorities proposed a new type of housing for India's urban poor and industrial workers As Farhan Karim argues economic scarcity became a central inspiration for architectural modernism in the subcontinent As India moved from colonial rule to independence the Indian government business entities international NGOs and intergovernmental agencies took major initiatives to modernize housing conditions and the domestic environment of the state's low income population *Of Greater Dignity than Riches* traces multiple international origins of austerity as an essential ingredient of postcolonial development By prescribing model villages communities and ideal houses for the working class this project of austerity eventually reduced poverty into a stylized architectural representation In this rich and original study Karim explains the postwar and postcolonial history of low cost housing as an intertwined process of global transferences of knowledge Cold War cultural politics postcolonial nationalism and the politics of economic development

SHORTLISTED 2024 MSA FIRST BOOK PRIZE *Topothesia* reads urban planning as a mode of speculative fiction one inextricably linked to histories of British colonialism and liberalism through a particular understanding of place The book focuses on town planning from the late nineteenth century to the present day showing how the contemporary geography of Britain sharply unequal and marked by racial division continues ideologies of place established in colonial contexts Specifically planning allows for the speculative construction of future places that are both utopian in their ability to resolve political disagreement and at the same tantalizingly realizable able to be produced in concrete reality This speculative imaginary I argue is only possible within the ideological framework of colonialism and the history of empire within which it developed *Topothesia* refers to a rhetorical device employing the vivid depiction of an often imaginary place This device Vijay shows helps us understand urban planning as a narrative genre one that even in its most mundane documents is compelled to produce elaborate fantasies of future places The book examines specific planning movements over time to understand the form and the stakes of their speculative worlds In building these worlds the book shows planners continually coopted literary critiques of the present and reveries of the future retaining literature s aesthetics while eschewing its politics At the same time Vijay shows writers and artists have dwelled within and against these colonial imaginaries to seek other means of representing place *Digital Modernism Heritage Lexicon* Cristiana Bartolomei,Alfonso Ippolito,Simone Helena Tanoue Vizioli,2021-08-11 The book investigates the theme of Modernism 1920 1960 and its epigones as an integral part of tangible and intangible cultural heritage which contains the result of a whole range of disciplines whose aim is to identify document

and preserve the memory of the past and the value of the future Including several chapters it contains research results relating to cultural heritage more specifically Modernism and current digital technologies This makes it possible to record and evaluate the changes that both undergo the first one from a material point of view the second one from the research point of view which integrates the traditional approach with an innovative one The purpose of the publication is to show the most recent studies on the modernist lexicon 100 years after its birth moving through different fields of cultural heritage from different forms of art to architecture from design to engineering from literature to history representation and restoration The book appeals to scholars and professionals who are involved in the process of understanding reading and comprehension the transformation that the places have undergone within the period under examination It will certainly foster the international exchange of knowledge that characterized Modernism

**Digital Draw Connections** Fabio Bianconi, Marco Filippucci, 2021-04-27 This book stems from the seminal work of Robert Venturi and aims at re projecting it in the current cultural debate by extending it to the scale of landscape and placing it in connection with representative issues It brings out the transdisciplinary synthesis of a necessarily interdisciplinary approach to the theme aimed at creating new models which are able to represent the complexity of a contradictory reality and to redefine the centrality of human dimension As such the volume gathers multiple experiences developed in different geographical areas which come into connection with the role of representation Composed of 43 chapters written by 81 authors from around the world with an introduction by Jim Venturi and Cezar Nicolescu the volume is divided into two parts the first one more theoretical and the other one which showcases real world applications although there is never a total split between criticism and operational experimentation of research
