The fire below is bright orange and yellow, with thick smoke rising. The overall scene is dramatic and suggests a combat or rescue operation.

Sexual Exploitation of Teenagers Jennifer Ann Drobac, 2016-02-02 When we consider the concept of sexual abuse and harassment our minds tend to jump either towards adults caught in unhealthy relationships or criminals who take advantage of children But the millions of maturing teenagers who also deal with sexual harassment can

fall between the cracks When it comes to sexual relationships adolescents pose a particular problem Few teenagers possess all of the emotional and intellectual tools needed to navigate these threats including the all too real advances made by supervisors teachers and mentors In *Sexual Exploitation of Teenagers* Jennifer Drobac explores the shockingly common problem of maturing adolescents who are harassed and exploited by adults in their lives Reviewing the neuroscience and psychosocial evidence of adolescent development she explains why teens are so vulnerable to adult harassers Even today in an age of increasing public awareness criminal and civil law regarding the sexual abuse of minors remains tragically inept and irregular from state to state Drobac uses six recent cases of teens suffering sexual harassment to illuminate the flaws and contradictions of this system skillfully showing how our current laws fail to protect youths and offering an array of imaginative legal reforms that could achieve increased justice for adolescent victims of sexual coercion

Performance in a Militarized Culture Sara Brady,Lindsey Mantoan,2017-09-13 The long cultural moment that arose in the wake of 9 11 and the conflict in the Middle East has fostered a global wave of surveillance and counterinsurgency *Performance in a Militarized Culture* explores the ways in which we experience this new status quo Addressing the most commonplace of everyday interactions from mobile phone calls to traffic cameras this edited collection considers How militarization appropriates and deploys performance techniques How performing arts practices can confront militarization The long and complex history of militarization How the war on terror has transformed into a values system that prioritizes the military The ways in which performance can be used to secure and maintain power across social strata *Performance in a Militarized Culture* draws on performances from North Central and South America Europe the Middle East and Asia to chronicle a range of experience from those who live under a daily threat of terrorism to others who live with a distant imagined fear of such danger

Masculinities at the Margins Amanda Chisholm,Joanna Tidy,2020-05-18 Across a rich terrain of empirical and theoretical trajectories the concept of military masculinity now understood in its plural as military masculinities has been a significant conceptual tool in both feminist international relations IR and in critical men and masculinities studies scholarship The concept has helped us to unpack the relationships between gender war and militarism including how military standards function in the production of wider normative hegemonic manliness As such military masculinities has been a rewarding tool for many scholars who take a critical approach to the study of war and the military This edited volume advances an emerging curiosity within accounts of military masculinities This curiosity concerns the silences within and disruptions to our well established and perhaps too comfortable understandings of and empirical focal points for military masculinities gender and war The contributors to this volume trouble the ease with which we might be tempted to synonymize militaries war and a neat hegemonic masculinity Taking the disruptions the asides and the silences seriously challenges the common wisdoms of military masculinities gender and war in productive and necessary ways Doing so necessitates a reorientation of where to whom and for what we look to understand the operation of gendered military power The chapters were originally published

in a special issue of Critical Military Studies **Criminologies of the Military** Ben Wadham, Andrew Goldsmith, 2018-06-28

This innovative collection offers one of the first analyses of criminologies of the military from an interdisciplinary perspective. While some criminologists have examined the military in relation to the area of war crimes, this collection considers a range of other important but less explored aspects such as private military actors, insurgents, paramilitary groups, and the role of military forces in tackling transnational crime. Drawing upon insights from criminology, this book's editors also consider the ways the military institution harbours criminal activity within its ranks and deals with prisoners of war. The contributions by leading experts in the field have a broad reach and take a truly global approach to the subject. *Taiwan in Dynamic*

Transition Ryan Dunch, Ashley Esarey, 2020-02-28 Following a remarkable transition from authoritarian rule to robust democracy, Taiwan has grown into a prosperous but widely unrecognized nation state for which no uncontested sovereign space exists. Increasingly vigorous assertions of Taiwanese identity expose the fragility of relationships between the United States and other great powers that assume Taiwan will eventually unite with China. Perhaps because of their precarious international position, the Taiwanese have embraced cosmopolitan culture and democratic institutions. The 2014 Sunflower Movement thrust Taiwan's politics into the global media spotlight, as did the resounding electoral victory of the once illegal Democratic Progressive Party in 2016. *Taiwan in Dynamic Transition* provides an up-to-date assessment of contemporary Taiwan, highlighting Taiwan's emergent nationhood and its significance for world politics. Taiwan's path has important implications for broader themes and preoccupations in contemporary thought, such as consideration of why political transitions in the aftermath of the Arab Spring have sputtered or failed, while Taiwan has evolved into a stable and prosperous democratic society. Taiwan serves as a test case for nation and state building, the formation of national identity, and the emergence of democratic norms in real time. **Counter-Recruitment and the Campaign to Demilitarize**

Public Schools Scott Harding, Seth Kershner, 2016-04-29 This book describes the various tactics used in counter-recruitment, drawing from the words of activists and case studies of successful organizing and advocacy. The United States is one of the only developed countries to allow a military presence in public schools, including an active role for military recruiters. In order to enlist 250,000 new recruits every year, the US military must market itself to youth by integrating itself into schools through programs such as JROTC (Junior Reserve Officers Training Corps) and spend billions of dollars annually on recruitment activities. This militarization of educational space has spawned a little-noticed grassroots resistance: the small but sophisticated counter-recruitment movement. Counter-recruiters visit schools to challenge recruiters' messages with information on non-military career options; activists work to make it harder for the military to operate in public schools; they conduct lobbying campaigns for policies that protect students' private information from military recruiters; and counter-recruiters mentor youth to become involved in these activities. While attracting little attention, counter-recruitment has nonetheless been described as the military recruiter's greatest obstacle by a Marine Corps official. Preventing War and

Promoting Peace William H. Wiist, Shelley K. White, 2017-12-14 Preventing War and Promoting Peace A Guide for Health Professionals is an interdisciplinary study of how pervasive militarism creates a propensity for war through the influence of academia economic policy the defense industry and the news media Comprising contributions by academics and practitioners from the fields of public health medicine nursing law sociology psychology political science and peace and conflict studies as well as representatives from organizations active in war prevention the book emphasizes the underlying preventable causes of war particularly militarism and focuses on the methods health professionals can use to prevent war Preventing War and Promoting Peace provides hard hitting facts about the devastating health effects of war and a broad perspective on war and health presenting a new paradigm for the proactive engagement of health professions in the prevention of war and the promotion of peace

Dictators' Endgames Aurel Croissant, David Kuehn, Tanja Eschenauer-Engler, 2024-10-14 Dictators Endgames examines the political role of the military in dictators endgames large scale nonviolent mass protests in autocracies that demand the regime leader s removal from office It addresses the question why some militaries defend an embattled autocrat by violently cracking down on the protestors whereas others side with the opposition or decide to stage a coup d tat The book introduces a systematic definition and operationalization of the dictator s endgame as a situation of non violent mass mobilization in which the dictator s political survival depends on the loyalty of the military leaders The theoretical argument proposed in this book focuses on the strategic calculations of military leaders and offers a systematic explanation why the armed forces opt for repression of the demonstrators shift their loyalty from the dictator to the opposition or remove the autocrat in a coup during the mass protests The theory s predictions are empirically tested in a multi method research design that combines statistical analyses and case studies drawing on the original Dictator s Endgame Dataset of all 40 endgames that took place between 1946 and 2014 The study identifies the conditions and processes through which militaries determine the outcome of dictators

endgames and thus affect the survival and future political development of authoritarian regimes *Education at War* Arshad Imtiaz Ali, 2018-04-10 *Education at War The Fight for Students of Color in America's Public Schools* attempts to shape educational research and practice to more explicitly consider the relationship between education capitalism and war and more specifically its impact on students of color The authors as a whole contend that the contemporary specter of war has become a central way that racism and materialism become manifested and practiced within education In particular this collection asserts that the contemporary neoliberal characterization of education and school based reform is situated within the global political economy that has facilitated a growth in the prison and military industrial complex and simultaneous divestment in education domestically within the U S *Education at War* attempts to make research relevant by bringing the tensions within young people's lives to the fore The heavy shadow cast by recent U S led wars reorganizes the sites of learning and teaching nationally as well as differentially within specific sites and upon particular communities Nonetheless the examination of this context is not enough Rather we consider how such a contemporary context can facilitate educational spaces for communities and youth to grow their vision for a different and hopefully a more humanizing future Thus the book contributors will collectively explore how resistance can produce the opportunity for rich diverse and transformative learning for marginalized students and communities The lives of People of Color are the forefront of *Education at War The Fight for Students of Color in America's Public Schools* Whereas there are many attempts to theorize about the global implications of war less attention is paid to the ways that war shapes young lives in the U S particularly in an educational context The book addresses the absence of youth centered discussions regarding education during a political context of neoliberalism and war and provides important perspectives on which to ground critical discussions among students and families education scholars and practitioners and policymakers **Children, Young People and Critical Geopolitics** Matthew C. Benwell, Peter Hopkins, 2017-05-15 Young people and in particular children have typically been marginalised in geopolitical research positioned as too young to understand or relate to the adult dominated world of international relations Integrating current debates in critical geopolitics and political geography with research in children's geographies childhood studies and youth research this book sets out an agenda for the field of children's and young people's critical geopolitics It considers diverse practices such as play activism media consumption and diplomacy to show how children's and young people's lives relate to wider regional and global geopolitical processes Engaging with contemporary concepts in human geography including ludic geopolitics affect emotional geographies intergenerationality creative diplomacy popular geopolitics and citizenship the authors draw on geopolitical research with children and young people from Europe Asia Australasia Africa and the Americas The chapters highlight the ways in which young people can be enrolled ignored dismissed empowered and represented by the state for geopolitical ends Notwithstanding this state power the research presented also shows how young people have agency and make decisions about their lives which are influenced by wider geopolitical processes The focus on the lives of

children and young people problematises and extends what it is we think of when considering the geopolitical which enriches as well as advances critical geopolitical enquiry and deserves to be taken seriously by political geographies more broadly
