least in part on a basic emotional sensibility that is found in young children and perhaps even some non human animal species As a result this book comprises a unique comparative perspective on the study of emotion A number of chapters consider emotions in a variety of animal groups including fish birds and mammals Other chapters expand the scope of the book to humans and robots Specific topics covered in these chapters run the gamut from lower level emotional activity such as emotional expression to higher level emotional activity such as altruism love and aesthetics Taken as a whole the book presents manifold perspectives on emotion and provides a solid foundation for future multidisciplinary research on the nature of emotions

Reading the Hebrew Bible with Animal Studies Ken Stone, 2023-05-25 An excellent introduction to the field of animal studies the applications of these ideas to biblical passages illuminate the text in new ways Brandon R Grafius Horizons in Biblical Theology Animal studies may be a recent academic development but our fascination with animals is nothing new Surviving cave paintings are of animal forms and closer to us as Ken Stone points out animals populate biblical literature from beginning to end This book explores the significance of animal studies for the interpretation of the Hebrew Bible Combined with biblical scholarship animal studies sheds useful light on animals animal symbolism and the relations among animals humans and God not only for those who study biblical literature and its ancient context but for contemporary readers concerned with environmental social and animal ethics Without the presence of domesticated and wild animals neither biblical traditions nor the religions that make use of the Bible would exist in their current forms Although parts of the Bible draw a clear line between humans and animals other passages complicate that line in multiple ways and challenge our assumptions about the roles animals play therein

Engaging influential thinkers including Jacques Derrida Donna Haraway and other experts in animal and ecological studies Reading the Hebrew Bible with Animal Studies shows how prehumanist texts reveal unexpectedly relevant dynamics and themes for our posthumanist age Stone s ecological sensibilities theoretical acumen and incisive exegetical arguments open up fresh perspectives Stephen D Moore The Theological School Drew University This monograph is poised to become a key work in the field Anne L tourneau Reading Religion Groundbreaking Carol J Dempsey OP Horizons **Animals and Society** Margo DeMello,2012 This textbook provides a full overview of human animal studies It focuses on the conceptual construction of animals in American culture and the way in which it reinforces and perpetuates hierarchical human relationships rooted in racism sexism and class privilege Animal Ethics in the Age of Humans Bernice Bovenkerk,Jozef Keulartz,2016-09-21 This book provides reflection on the increasingly blurry boundaries that characterize the human animal relationship In the Anthropocene humans and animals have come closer together and this asks for rethinking old divisions Firstly new scientific insights and technological advances lead to a blurring of the boundaries between animals and humans Secondly our increasing influence on nature leads to a rethinking of the old distinction between individual animal ethics and collectivist environmental ethics Thirdly ongoing urbanization and destruction of animal habitats leads to a blurring between the categories of wild and domesticated animals Finally globalization and global climate change have led to the fragmentation of natural habitats blurring the old distinction between in situ and ex situ conservation In this book researchers at the cutting edge of their fields systematically examine the broad field of human animal relations dealing with wild liminal and domestic animals with conservation and zoos and with technologies such as biomimicry This book is timely in that it explores the new directions in which our thinking about the human animal relationship are developing While the target audience primarily consists of animal studies scholars coming from a wide range of disciplines including philosophy sociology psychology ethology literature and film studies many of the topics that are discussed have relevance beyond a purely theoretical one as such the book also aims to inspire for example biologists conservationists and zoo keepers to reflect on their relationship with animals Constructing a Relational Cosmology Paul O. Ingram,2006-08-01 This collection of five essays is both a dialogical engagement with and critical assessment of Nancy R Howell s book Constructing a Relational Cosmology The collection includes three essays written from a Whiteheadian process perspective by Marit A Trelstad Kathryn A Breazeale and Marjorie Hewitt Suchocki one from the perspective of narrative theology Lisa Stenmark and one from the Soto Zen Buddhist perspective Stephanie Kaza Howell responding as a Whiteheadian feminist philosopher of religion takes the critiques and suggestions of her dialogical partners with the utmost seriousness as her foundation for suggesting new directions for ecofeminist thought an example of what Whiteheadians call the process of creative transformation Animal Suffering: Philosophy and Culture E. William J. Long, 2005-08-23 The classic and original text that first explored the telepathic methods of communication of wild animals Based on years of detailed field observations first published in 1919 Written by the famous American naturalist who was the first to study telepathy in the wild Forewords by biologists Rupert Sheldrake who has spent 15 years researching the unexplained powers of animals and Marc Bekoff the editor of the three volume Encyclopedia of Animal Behavior Many sources have commented on the silent communication abilities of pets but never before and not since the first publication of this book in 1919 has the subject of animal telepathy in the wild been so fully researched How Animals Talk explores the phenomenon of vocal silent and even motionless communication among animals From crow talk to instant herd communication author William J Long theorizes that animals are much more intelligent emotional and moral than we have traditionally thought and that their ability to sense the presence of other living beings is an innate ability shared by humans as well Based on many years of field observations this classic text contains numerous examples of animal behavior that defy conventional explanation Long believed in the importance and validity of anecdotal evidence He recognized the dangers of conventional research in reducing animals to mere numbers and how the cold third person prose of scientific study can objectify animals distancing us from them His findings on the impact of our presence on animal life and the cost that we pay in separating ourselves from animals who help define our place in the natural world may be more relevant today than ever before Veganism, Archives, and Animals Catherine Oliver, 2021-08-12 This book explores the growing significance of veganism It brings together important theoretical and empirical insights to offer a historical and contemporary analysis of
