Monocultures Of The Mind Perspectives On Biodiversity:

Monocultures of the Mind Vandana Shiva, 1993-02 Vandana Shiva has established herself as a leading independent thinker and voice for the South in that critically important nexus where questions of development strategy the environment and the position of women in society coincide In this new volume she brings together her thinking on the protection of biodiversity the implications of biotechnology and the consequences for agriculture of the global pre eminence of Western style scientific knowledge In lucid and accessible fashion she examines the current threats to the planet s biodiversity and the environmental and human consequences of its erosion and replacement by monocultural production She shows how the new Biodiversity Convention has been gravely undermined by a mixture of diplomatic dilution during the process of negotiation and Northern hi tech interests making money out of the new biotechnologies She explains what these technologies involve and gives examples of their impact in practice She questions their claims to improving natural species for the good of all and highlights the ethical and environmental problems posed Underlying her arguments is the view that the North s particular approach to scientific understanding has led to a system of monoculture in agriculture a model that is not being foisted on the South displacing its societies ecologically sounder indigenous and age old experiences of truly sustainable food cultivation forest management and animal husbandry This rapidly accelerating process of technology and system transfer is impoverishing huge numbers of people disrupting the social systems that provide them with security and dignity and will ultimately result in a sterile planet in both North and South In a policy intervention of potentially great significance she calls instead for a halt at international as well as local level to the aid and market incentives to both large scale destruction of habitats where biodiversity thrives and the introduction of centralised homogenous systems of cultivation

From Polarisation to Multispecies Relationships Janet J. McIntyre-Mills, Yvonne Corcoran-Nantes, 2021-08-05 This book explores the concept of multi species relationships and suggests critical systemic pathways to protect shared habitats This book discusses how the eradication of species as a result of rapid urbanisation places humanity at risk This book demonstrates how narrow anthropocentrism has focused on the rights of human beings at the expense of other species and the environment This book explores a priori norms and a posteriori measures and indicators to include and protect multiple species This book aims to strengthen institutional capacity and powers to address and extend the UN 2030 Sustainable Development Agenda by drawing on local wisdom but also the need to implement laws to prevent ecocide This book highlights that our fragile interdependence requires a recognition of our hybridity and interconnectedness within the web of life and suggests ways to reframe policy within and beyond the nation state to support living systems of which we are a strand

The SAGE Handbook of Intellectual Property Matthew David, Debora Halbert, 2014-11-18 This Handbook brings together scholars from around the world in addressing the global significance of controversies over and alternatives to intellectual property IP today It brings together over fifty of the leading authors in this field across the spectrum of academic disciplines from law economics geography sociology politics and anthropology This volume addresses the full spectrum of IP issues including copyright patent trademarks and trade secrets as well as parallel rights and novel applications In addition to addressing the role of IP in an increasingly information based and globalized economy and culture it also challenges the utility and viability of IP today and addresses a range of alternative futures

Beyond Western Economics Trent Schroyer, 2009-05-08 This book combines intellectual history with contemporary events to offer a critique of mainstream economic thought and its neoliberal policy incarnation in global capitalism The critique operates both theoretically at the level of metaphysics and the philosophy of science and concretely in case studies of globalization and world events Trent Schroyer provides a moral and cultural interpretation of modernity and scientism highlighting their political and economic consequences but the book's main purpose is not to criticize The author moves beyond this to offer alternative economic cultures again combining abstract theoretical analysis with concrete case studies of alternative economic formations from local self sufficiency movements to cooperatives and other anti capitalist institutional experiments These case studies exhibit an impressive range of variation from first world to third world from reformist to utopian transformative Finally Schroyer links the project to the global justice movement that opposes corporate globalization and eventually links participatory

economics and democratic politics to a new image of science as participatory social learning Environmental Resilience and Food Law Gabriela Steier,Alberto Giulio Cianci,2019-08-13 Agrobiodiversity and agroecology go hand in hand in promoting environmental resilience in international food systems as well as climate change resilient food policy This book contextualizes how various legal frameworks address agrobiodiversity and agroecology around the globe and makes it accessible for audiences of students practitioners educators and scholars Some chapters focus on the legal regulation of agroecology from a food law perspective Others are geared toward providing regulators lawmakers and attorneys with the scientific and policy background of those concepts so that they are equipped in the field of food law in everyday practice and policy Climate change dimensions of the issues are woven throughout the book *Tangled Routes* Deborah Barndt,2008 Now in a thoroughly revised and updated edition *Tangled Routes* offers a vivid interdisciplinary examination of the global food system through the journey of a corporate tomato Through case studies in the three NAFTA countries Mexico the United States and Canada Deborah Barndt examines the dynamic relationships between production and consumption work and technology biodiversity and cultural diversity and health and environment The compelling stories of women workers along the tomato trail humanize her analysis of globalization taking into account the intersections of gender race class family status and north south relations **A History of the Literature of the U.S. South: Volume 1** Harilaos Stecopoulos,2021-05-20 A History of the Literature of the U S South provides scholars with a dynamic and heterogeneous examination of southern writing from John Smith to Natasha Trethewey Eschewing a master narrative limited to predictable authors and titles the anthology adopts a variegated approach that emphasizes the cultural and political tensions crucial to the making of this regional literature Certain chapters focus on major white writers e g Thomas Jefferson William Faulkner the Agrarians Cormac McCarthy but a substantial portion of the work foregrounds the achievements of African American writers like Frederick Douglass Zora Neale Hurston and Sarah Wright to address the multiracial and transnational dimensions of this literary formation Theoretically informed and historically aware the volume s contributors collectively demonstrate how southern literature constitutes an aesthetic cultural and political field that richly repays examination from a variety of critical perspectives The Use of Biodiversity in International Law Andreas Kotsakis,2021-05-05 This book presents a legal genealogy of biodiversity of its strategic use before and after the adoption of the Convention on Biological Diversity 1993 This history of genetic gold details how with the aid of international law the idea of biodiversity has been instrumentalized towards political and economic aims A study of the strategic utility of biodiversity rather than the utility of its protection under international law the book s focus is not therefore on the sustainable or non sustainable use of biodiversity as a natural resource but rather on its historical use as an intellectual resource Although biodiversity is still not being effectively conserved nor sustainably used the Convention on Biological Diversity and its parent regime persists now after several decades of operation This book provides the comprehensive answer to the question of the convention s continued existence

The Law of Complex Earth and Outer Space Systems Elena Cirkovic, 2025-03-17

This book offers a paradigm shifting exploration of lawmaking for the complex interactions between Earth systems and outer space Drawing on complex systems science posthuman approaches and plural ontologies the author proposes a reimagining of law and governance for the cosmic age Through the cosmolegal perspective this study embraces the inherent uncertainties and complexities of Earth space interactions From Arctic methane craters to orbital debris the book weaves together scientific insights landscape architecture legal theory and doctrine to address pressing environmental challenges that span Earth and beyond While legal scholarship has increasingly engaged with Earth System Science it typically treats outer space as distinct from Earth's environment However Earth's existence and complex systems are fundamentally intertwined with and emerge from outer space This book argues that a legal framework for Earth's systems needs to include outer space At its core the book advocates for a complexification of law calling for greater epistemic humility in legal thought and practice Thoughtful and provocative this work invites readers to reconsider fundamental assumptions about law nature and agency beyond the human in an era of planetary change The cosmolegal approach aims to shift legal imagination and understanding positioning human law as just one of many actors within the cosmos This original work will appeal to scholars of legal theory and environmental law as well as those interested in posthumanism ecology and materialism
