*Crossing Textual Boundaries in International Children's Literature* Lance Weldy, 2011-01-18 As the first part of the title indicates my interest

in looking at intertextuality and transformation still maintains a prominent place throughout this book as well. If we believe that no text is an island then we will understand that the relationships between and within texts across the years become a fascinating place for academic inquiry. I included the word boundaries into the title because we never get tired of voicing our opinions about texts which traverse relegated boundaries such as genre or medium. Not only am I interested in discussing what these changes across boundaries mean socially, historically and culturally but also what they mean geographically which accounts for the second part of my title. I am very excited that this book will be placing even more emphasis on children's literature in an international scene than my first book did in the sense that I have added more scholars on an international level. I hesitate to list the nationalities of all of the contributors here because quite a few have themselves crossed international boundaries in different ways by either studying abroad or finding permanent residency in foreign countries. Nevertheless the writers have lived extensively in or identify as being from Australia, Canada, England, Finland, Germany, Greece, Iceland, Ireland, Israel, Norway, Spain, Sweden, Turkey, the United States of America and Wales.

**Introduction      On the Subject of Values ... and the Value of Subjects: New thinking to guide schools through the curriculum**

Bridget Knight, 2022-12-02 Education is a values based experience. Consciously or not we are highly attuned to one another's values. We see time and again that the best schools are compelled and propelled by strong values which inspire and guide the creation of a meaningful context for learning and an aspirational ethos. However values can often be submerged, overlooked or ignored. By infusing our teaching with values both explicit and implicit learning can serve a greater purpose, nourishing us as humans and deepening our experience. Drawing on the views and inspired teaching practice of a range of contributors this book offers both the theoretical underpinning and practical examples to bring values to life in the classroom. It shows how each subject has a unique and valuable role and how a values based culture generates a powerful climate for successful learning in every subject discipline. It is a bedside book that will bring joy and practical support to the many professionals who work from the heart and wish to touch the future. It offers validation to those teachers who deeply care about the subject disciplines they teach, ultimately making a difference to children, their lives and their world. In our current educational context this work is unashamedly people orientated, futures thinking and forward facing.
