Moral Discourse And Practice Some Philosophical Approaches:

Moral Discourse and Practice Stephen L. Darwall, Allan Gibbard, Peter Albert Railton, 1997 What are ethical judgments about And what is their relation to practice How can ethical judgment aspire to objectivity The past two decades have witnessed a resurgence of interest in metaethics placing questions such as these about the nature and status of ethical judgment at the very center of contemporary moral philosophy **Moral Discourse and Practice Some Philosophical Approaches** is a unique anthology which collects important recent work much of which is not easily available elsewhere on core metaethical issues Naturalist moral realism once devastated by the charge of naturalistic fallacy has been reinvigorated as have versions of moral realism that insist on the discontinuity between ethics and science Irrealist expressivist programs have also developed with great subtlety encouraging the thought that a noncognivist account may actually be able to explain ethical judgments aspirations to objectivity Neo Kantian constructivist theories have flourished as well offering hope that morality can be grounded in a plausible conception of reasonable conduct Together the positions advanced in the essays collected here address these recent developments constituting a rich array of approaches to contemporary moral philosophy s most fundamental debates An extensive introduction by Darwall Gibbard and Railton is also included making this volume the most comprehensive and up to date work of its kind **Moral Discourse** is ideally suited for use in courses in contemporary ethics ethical theory and metaethics

Metaethics, Egoism, and Virtue Allan Gotthelf, James G. Lennox, 2014-07-30 Philosopher novelist Ayn Rand 1905 1982 is a cultural phenomenon Her books have sold more than twenty five million copies and countless individuals speak of her writings as having significantly influenced their lives In spite of the popular interest in her ideas or perhaps because of it Rand s work has until recently received little serious attention from academics Though best known among philosophers for her strong support of egoism in ethics and capitalism in politics there is an increasingly widespread awareness of both the range and the systematic character of Rand s philosophic thought Metaethics Egoism and Virtue examines central aspects of Ayn Rand s ethical theory Though her endorsement of ethical egoism is well known one of her most familiar essay collections is The Virtue of Selfishness the character of her egoism is not Leading Rand scholars and specialists in ethical theory address issues such as the basis of Rand s egoism in a virtue centered normative ethics her account of how moral norms in general are themselves based on a fundamental choice by an agent to value his own life and how her own approach to the foundations of ethics is to be compared and contrasted with familiar approaches in the analytic ethical tradition Philosophers interested in the objectivity of value in the way ethical theory is and is not virtue based and in acquiring a serious understanding of an egoistic moral theory worthy of attention will find much to consider here Metaethics Egoism and Virtue is the first of a new series developed in conjunction with the Ayn Rand Society to offer a fuller scholarly understanding of this highly original and influential thinker The Ayn Rand Society an affiliated group of the American Philosophical Association Eastern Division seeks to foster scholarly study by philosophers of the philosophical thought and writings of Ayn Rand

The Realm of Reason Christopher Peacocke, 2004 The Realm of Reason develops a new general theory of what it is for a thinker to be entitled to form a given belief The theory locates entitlement in the nexus of relations between truth content and understanding Peacocke formulates three principles of rationalism that articulate this conception The principles imply that all entitlement has a component that is justificationaly independent of experience The resulting position is thus a form of rationalism generalized to all kinds of content To show how these principles are realized in specific domains Peacocke applies the theory in detail to several classical problems of philosophy including the nature of perceptual entitlement induction and the status of moral thought These discussions involve an elaboration of the structure of entitlement in ways that have applications in many other areas of philosophy He also relates the theory to classical and recent rationalist

thought and to current issues in the theory of meaning reference and explanation In the course of these discussions he proposes a general theory of the a priori The focus of the work lies in the intersection of epistemology metaphysics and the theory of meaning and will be of interest both to students and researchers in these areas and to anyone concerned with the idea of rationality *The Grounds of Ethical Judgement* Christian Illies,2003 Transcendental arguments have gained a lot of attention over the past twenty years mainly in the field of theoretical reason Yet few scholars have looked at their relevance to practical reason Christian Illies argues that although this methodological avenue is not yet well paved transcendental arguments have great potential in ethics as they promise rational justification of normative judgements There are two main types of transcendental argument that have been developed for this purpose in recent years One is based on an analysis of the implications of agency mainly by Alan Gewirth the other on an analysis of reason as a discursive process with normative presuppositions Karl Otto Apel and other continental philosophers but also Onora O'Neill Illies finds that these arguments have severe limitations and argues that practical reason should involve a different analysis judgement formation must be analysed as a form of agency Once this starting point is secured by showing that it cannot rationally be denied then two things can be transcendently inferred first that there exists a categorical demand upon agents to arrive at true judgements and second that we must respect freedom of agency in general Here our ordinary notions of right and wrong find secure ground Compelling and original *The Grounds of Ethical Judgement* offers ample evidence that transcendental arguments may provide long sought foundations for morality *The Oxford Handbook of Philosophy of Emotion* Peter Goldie,2009-12-03 This Handbook presents thirty one state of the art contributions from the most notable writers on philosophy of emotion today Anyone working on the nature of emotion its history or its relation to reason self value or art whether at the level of research or advanced study will find the book an unrivalled resource and a fascinating read *Philippa Foot's Moral Thought* John Hacker-Wright,2013-08-29 Philippa Foot 1920-2010 is widely regarded as one of the most important Anglophone moral philosophers of the 20th century She pioneered a distinctive approach to philosophical treatment of ethics using the tools of analytic philosophy She defended the objectivity of moral judgment and took controversial positions on abortion and euthanasia She was also a leading figure behind the revival of Aristotelian virtue ethics in contemporary philosophy This book represents the first comprehensive and accessible introduction to Foot's work It offers a complete chronological and thematic overview emphasising the role Foot played in the development of contemporary virtue ethics It situates her thought in the context of the historical development of analytic moral philosophy and discusses the various objections to her views Foot's writings take the form of essays that take up small problems within moral philosophy Yet John Hacker-Wright argues that there is nevertheless a coherent systematic moral perspective throughout Foot's work that she does not make fully explicit This is the ideal introduction for students seeking a synthetic grasp of Foot's moral vision *The Metaethics of Constitutional Adjudication* Bosko Tripkovic,2018-01-11 In this book Bosko Tripkovic develops a theory of value

based arguments in constitutional adjudication In contrast to the standard question of constitutional theory that asks whether the courts get moral answers wrong it asks a more fundamental question of whether the courts get the morality itself wrong Tripkovic argues for an antirealist conception of value one that does not presuppose the existence of mind independent moral truths and accounts for the effect this ought to have on existing value based arguments made by constitutional courts The book identifies three dominant types of value based arguments in comparative constitutional practice arguments from constitutional identity common sentiment and universal reason and explains why they fail as self standing approaches to moral judgment It then suggests that the appropriate moral judgments emerge from the dynamics between practical confidence which denotes the inescapability of the self and the evaluative attitudes it entails and reflection which denotes the process of challenging and questioning these attitudes The book applies the notions of confidence and reflection to constitutional reasoning and maintains that the moral inquiry of the constitutional court ought to depart from the emotive intuitions of the constitutional community and then challenge these intuitions through reflective exposure to different perspectives in order to better understand and develop the underlying constitutional identity The book casts new light on common constitutional dilemmas and allows us to envisage new ways of resolving them **Metaphysics and**

Cognitive Science Alvin I. Goldman, Brian P. McLaughlin, 2019-03-27 This volume illustrates how the methodology of metaphysics can be enriched with the help of cognitive science Few philosophers nowadays would dispute the relevance of cognitive science to the metaphysics of mind but this volume mainly concerns the relevance of metaphysics to phenomena that are not themselves mental The volume is thus a departure from standard analytical metaphysics Among the issues to which results from cognitive science are brought to bear are the metaphysics of time of morality of meaning of modality of objects and of natural kinds as well as whether God exists A number of chapters address the enterprise of metaphysics in general In traditional analytical metaphysics intuitions play a prominent role in the construction of and assessment of theories Cognitive science can be brought to bear on the issue of the reliability of intuitions Some chapters point out how results from cognitive science can be deployed to debunk certain intuitions and some point out how results can be deployed to help vindicate certain intuitions Many metaphysicians have taken to heart the moral that physics should be taken into account in addressing certain metaphysical issues The overarching point of the volume is that in many instances beyond the nature of the mind itself cognitive science should also be consulted Global Journalism Ethics Stephen J.A.

Ward, 2010-03-26 An argument for a new system of ethics in journalism that will take into account its global reach and impact

The Routledge Handbook of Metaethics Tristram McPherson, David Plunkett, 2017-08-24 This Handbook surveys the contemporary state of the burgeoning field of metaethics Forty four chapters all written exclusively for this volume provide expert introductions to the central research programs that frame metaethical discussions the central explanatory challenges resources and strategies that inform contemporary work in those research programs debates over the status of metaethics

and the appropriate methods to use in metaethical inquiry This is essential reading for anyone with a serious interest in metaethics from those coming to it for the first time to those actively pursuing research in the field

The Retrieval of Ethics Talbot Brewer, 2011-04-21 Talbot Brewer presents an invigorating new approach to ethical theory in the context of human selfhood and agency The first main theme of the book is that contemporary ethical theorists have focused too narrowly on actions and the discrete episodes of deliberation through which we choose them and that the subject matter of the field looks quite different if one looks instead at unfolding activities and the continuous forms of evaluative awareness that carry them forward and that constitute an essential element of those activities The second is that ethical reflection is itself a centrally important life activity and that philosophical ethics is an extension of this practical activity rather than a merely theoretical reflection upon it Brewer's approach is founded on a far reaching reconsideration of the notions of the nature and sources of human agency and particularly of the way in which practical thinking gives shape to activities relationships and lives He contests the usual understanding of the relationship between philosophical psychology and ethics The Retrieval of Ethics shows the need for a new contemplative vision of the point or value of human action without which we will remain unable to make optimal sense of our efforts to unify our lives around a tenable conception of how best to live them or of the yearnings that draw us to our ideals and to each other

The Normative Thought of Charles S. Peirce Cornelis De Waal, Krzysztof Piotr Skowroński, 2012-07-03 A collection of eleven essays on the moral philosophy of the American Polymath Charles S Peirce 1839-1914 The essays cover the three normative sciences that Peirce distinguishes esthetics ethics and logic and their relation to metaphysics

Handbook of Global Media Ethics Stephen J.A. Ward, 2021-09-02 This handbook is one of the first comprehensive research and teaching tools for the developing area of global media ethics The advent of new media that is global in reach and impact has created the need for a journalism ethics that is global in principles and aims For many scholars teachers and journalists the existing journalism ethics e.g. existing codes of ethics is too parochial and national It fails to provide adequate normative guidance for a media that is digital global and practiced by professional and citizen A global media ethics is being constructed to define what responsible public journalism means for a new global media era Currently scholars write texts and codes for global media teach global media ethics analyse how global issues should be covered and gather together at conferences round tables and meetings However the field lacks an authoritative handbook that presents the views of leading thinkers on the most important issues for global media ethics This handbook is a milestone in the field and a major contribution to media ethics

Dimensions of Moral Agency David Boersema, 2014-11-10 Dimensions of Moral Agency addresses and exemplifies the multi dimensionality of modern moral philosophy The book is a collection of papers originally presented at the Northwest Philosophy Conference in October 2013 The papers encompass a wide variety of topics within moral philosophy including metaethics normative ethics and applied ethics and broadly fall within the areas of the nature of moral agency and moral agency as it is played out in

particular aspects of people's lived experiences. The papers include assessments of the contributions of historical figures such as Aristotle, Epictetus, Confucius, Berkeley, and Descartes, as well as analyses of agency as it relates to individual and social moral issues like mental illness, the ethics of debt, prostitution, eco-consumerism, oppression, and species egalitarianism, among others. Also covered are concerns related to the nature of moral reasoning at the individual and social level, the relevance of love and emotion to moral agency and moral responsibility and efficacy. Interwoven with these topics and issues are concerns related to what sorts of things are or could be moral agents and what constitutes a moral good, the possibility of the existence of moral knowledge or moral facts or moral truth, and what constitutes moral motivation and how that is or is not related to questions of moral justification.
