The Seductiveness of Virtue John J. Fitzgerald, 2016-12-15 John J Fitzgerald addresses here one of life's enduring questions how to achieve personal fulfillment and more specifically whether we can do so through ethical conduct He focuses on two significant twentieth century theologians Rabbi Abraham Joshua Heschel and Pope John Paul II seeing both as fitting dialogue partners given the former's influence on the Second Vatican Council's deliberations on the Jews and the latter's groundbreaking overtures to the Jews in the wake of his experiences in Poland before and during World War II Fitzgerald demonstrates that Heschel and John Paul II both suggest that doing good generally leads us to growth in various components of personal fulfillment such as happiness meaning in life and freedom from selfish desires There are however some key differences between the two theologians John Paul II emphasizes more strongly the relationship between acting well and attaining eternal life whereas Heschel wrestles more openly with the possibility that religious commitment ultimately involves anxiety and sadness By examining historical and contemporary analyses including the work of the Fourteenth Dalai Lama the philosopher Peter Singer and some present day psychologists Fitzgerald builds a narrative that shows the promise and limits of Heschel's and John Paul II's views

Respect and Power Roberto Mordacci, 2025-05-30 This book presents a historically informed theoretically systematic and critically articulated theory of respect that challenges many of the presuppositions of the current debate in ethics and politics

It develops a theory of respect as the rule of power relations which draws connections between Kant's critical philosophy and Critical Theory. The concept of respect is the foundation of normative theory. Any human practice is subject to a judgment in terms of respect and a comprehensive theory is needed to critically assess our individual and social practices. This book elaborates an uncommon understanding of respect through a historical reconstruction of the practices of respect and a theoretical analysis of the limits of current theories of respect. Power is the fundamental force at work in social relations and respect is the recognition of power with a critical stance that defines how power is to be used and regulated. A close confrontation with Hannah Arendt's and Michel Foucault's conceptions of power offers the opportunity to clarify in which sense respect is the rule of power relations. This also helps to overcome the anthropocentric bias inherent in many theories of respect. It is important to recognize that living beings and nature possess power and that we must acknowledge this and understand the limitations of our power over them. Respect and Power will appeal to researchers and graduate students working in moral and political philosophy, political theory, critical theory and the social sciences.

Religious Ethics

William Schweiker, David A. Clairmont, 2020-06-02. An inclusive and innovative account of religious ethical thinking and acting in the world. Rather than merely applying existing forms of philosophical ethics, Religious Ethics defines the meaning of the field and presents a distinct and original method for ethical reflection through comparisons of world religious traditions. Written by leading scholars and educators in the field, this unique volume offers an innovative approach that reveals how religions concur and differ on moral matters and provides practical guidance on thinking and living ethically. The book's innovative method integrating descriptive, normative, practical, fundamental and metaethical dimensions of reflection enables a far more complex and nuanced exploration of religious ethics than any single philosophical language method or theory can equal. First introducing the task of religious ethics, the book moves through each of the five dimensions of reflection to compare concepts such as good and evil, perplexity and wisdom, truth and illusion and freedom and bondage in various theological contexts. Guides readers on understanding, assessing and comparing the moral teachings and practices of world religions. Applies a disciplined scholarly approach to the subject of religious ethics. Explores the distinctions between religious ethics and moral philosophy. Provides a methodology which can be applied to comparative ethics for various religions. Compares religious traditions to illuminate each of the five dimensions of ethical and moral reflection. Religious Ethics: Meaning and Method will help anyone interested in the relation between religion and ethics in the modern world, including those involved in general and comparative religion studies, religious and comparative ethics and moral theory.

years Constructing Moral Concepts of God in a Global Age Myriam Renaud, 2022-07-29 Constructing Moral Concepts of God in a Global Age focuses on what people say and think about God rather than on arguments about God's existence. It advances a theological method or step by step approach to explore and reframe personal convictions about God and the worldviews shaped by those convictions. Since a moral God is more likely to foster a moral life, this method integrates an ethical check to ensure that understandings of God and their associated worldviews are validly moral. The proposed method builds on the work of twentieth century theologian Gordon Kaufman during the Kantian phase of his work. It anticipates a person like God who hears prayers, loves without end, and comforts in times of hardship. To accommodate today's pluralistic and globalized world, the ethical check integrated in the method is a widely collaborative and vetted global ethic: the Parliament of the World's Religions Declaration Towards a Global Ethic. This volume of constructive philosophical theology is written for seminary students, educators, clergy, study groups, and anyone interested in delving more deeply and systematically into understandings of God, whether their own or those of others.
