Fitzgerald,Ashley John Moyse,2019-05-09 Modern medicine has produced many wonderful technological breakthroughs that have extended the limits of the frail human body However much of the focus of this medical research has been on the physical often reducing the human being to a biological machine to be examined understood and controlled This book begins by asking whether the modern medical milieu has overly objectified the body unwittingly or not and whether current studies in bioethics are up to the task of restoring a fuller understanding of the human person In response various authors here suggest that a more theological religious approach would be helpful or perhaps even necessary Presenting specific perspectives from Judaism Christianity and Islam the book is divided into three parts Understanding the Body Respecting the Body and The Body at the End of Life A panel of expert contributors including philosophers physicians and theologians and scholars of religion answer key questions such as What is the relationship between body and soul What are our obligations toward human bodies How should medicine respond to

Gurock,1997 **Mind over Matter: How Spirituality Changes Lives** ,2025-02-27 Mind over Matter is an interdisciplinary collection of essays exploring how spirituality changes lives in a variety of ways Unlike much philosophically rooted literature on spirituality it encourages an understanding of what can be achieved through faith belief and self confidence without reliance on specific or necessarily any religious doctrines or views From theistic non theistic or atheistic perspectives each chapter addresses a distinctive phenomenon for example spirituality and healing spirituality and art spirituality and running and spirituality as a response to disaster Not only do they integrate the results of scientific research and other intellectual investigations to illuminate accomplishments and sometimes possible sources of failure but they are also written by academics with practical experience in relevant areas or at least informed by ideas of practitioners A Cultural History of Medicine in the Middle Ages Iona McCleery,2023-02-09 The Middle Ages c 500 c 1500 are wellknown for the growth of universities and urban regulations plague pandemics increasingly sophisticated ways of causing injury in warfare and abiding frameworks for health and illness provided by religion Increasingly however archaeologists historians and literary specialists have come together to flesh out the daily lives of medieval people at all levels of society both in Christian Europe and the Islamic Mediterranean A Cultural History of Medicine in the Middle Ages follows suit but also brings new approaches and comparisons into the conversation Through the investigation of poems pottery personal letters recipes and petitions and through a breadth of topics running from street cleaning cooking and amulets to religious treatises and death rituals this volume accords new meaning and value to the period and those who lived it Its chapters confirm that the study of latrines patterns of manuscript circulation miracle narratives sermons skeletons metaphors and so on have as much to tell us about attitudes towards health and illness as do medical texts Delving within and beyond texts and focusing on the sensory the experiential the personal the body and the spirit this volume celebrates and critiques the diverse and complex cultural history of medieval health and medicine **The Medieval Islamic Hospital** Ahmed Ragab,2015-10-14 The first monograph on the history of Islamic hospitals this volume focuses on the under examined Egyptian and Levantine institutions of the twelfth to fourteenth centuries By the twelfth century hospitals serving the sick and the poor could be found in nearly every Islamic city Ahmed Ragab traces the varying origins and development of these institutions locating them in their urban environments and linking them to charity networks and patrons political projects Following the paths of patients inside hospital wards he investigates who they were and what kinds of experiences they had The Medieval Islamic Hospital explores the medical networks surrounding early hospitals and sheds light on the particular brand of practice oriented medicine they helped to develop Providing a detailed picture of the effect of religion on medieval medicine it will be essential reading for those interested in

history of medicine history of Islamic sciences or history of the Mediterranean      **Galen's Treatise Περί Ἀλυνίας (De indolentia) in Context** Caroline Petit, 2018-12-24 This collective volume arises from a Wellcome funded conference held at the University of Warwick in 2014 about the new Galen discovered in 2005 in a Greek manuscript De indolentia In the wake of the latest English translation published by Vivian Nutton in 2013 this book offers a multi disciplinary approach to the new text discussing in turn issues around Galen's literary production his medical and philosophical contribution to the theme of avoiding distress controversial topics in Roman history such as the Antonine plague and the reign of Commodus and finally the reception of the text in the Islamic world Gathering eleven contributions by recognised specialists of Galen Greek literature and Roman history it revisits the new text extensively      *Insatiable Appetite: Food as Cultural Signifier in the Middle East and Beyond* Kirill Dmitriev, Julia Hauser, Bilal Orfali, 2019-09-24 *Insatiable Appetite: Food as Cultural Signifier in the Middle East and Beyond* explores the cultural ramifications of food and foodways in the Mediterranean and Arab Muslim countries in particular The volume addresses the cultural meanings of food from a wider chronological scope from antiquity to present adopting approaches from various disciplines including classical Greek philology Arabic literature Islamic studies anthropology and history The contributions to the book are structured around six thematic parts ranging in focus from social status to religious prohibitions gender issues intoxicants vegetarianism and management of scarcity Contributors are Tarek Abu Hussein Yasmin Amin Kevin Blankinship Tylor Brand Kirill Dmitriev Eric Dursteler Anny Gaul Julia Hauser Christian Junge Danilo Marino Pedro Martins Karen Moukheiber Christian Saemannshausen Shaheed Tayob and Lola Wilhelm      *The Aesthetics of Melancholia* Luis F. López González, 2022-12-02 This book explores the intersection between medicine and literature in medieval Iberian literature and culture Its overarching argument is that thirteenth and fourteenth century Iberian authors revalorized the interconnection between the body the mind and the soul in light of the evolving epistemology of medicine Prior to the reintroduction of classical medical treatises through Arab authors into European cultures mental disorders and bodily diseases were primarily attributed to moral corruption demonic influence and superstition The introduction of novel regimens of health as well as treatises on melancholia into academic institutions and into the cultural landscape provided the tools for newly minted authors to understand that psychosomatic illnesses stemmed from malfunctions of the body's biochemical composition This book demonstrates that the earliest books written in the Iberian vernaculars contain the seeds that effect the shift from a theocentric worldview to a humanistic one The volume features close readings of multiple texts including medical treatises and religious writings and King Alfonso X's *Cantigas de Santa Maria* Juan Manuel's *Conde Lucanor* and Juan Ruiz's *Libro de buen amor* Even though these texts differ in literary genre rhetorical strategy and even purpose this study argues that they collectively employ humoral pathology and melancholic discourses as a means of underscoring the frailty and transience of human life by showing how somatic conditions sicken the body mind and soul unto death      *A Literary History of Medicine* Emilie Savage-Smith, Simon Swain, Geert Jan van
