Pascalian Meditations:

Teipen, William Maynard Hutchins, Laila Hussein Moustafa, Nathan S. French, Todd Green, Sabahat F. Adil, Kecia Ali, Phil Dorroll, Lyndall Herman, Shehnaz Haqqani, 2019-01-24 A much needed volume and a must read for educators addressing a challenging topic in a challenging time Choice How can teachers introduce the subject of Islam when daily headlines and social media disinformation can prejudice students perception of the subject Should Islam be taught differently in secular universities than in colleges with a clear faith based mission What are strategies for discussing Islam and violence without perpetuating stereotypes The contributors of Teaching Islamic Studies in the Age of ISIS Islamophobia and the Internet address these challenges head on and consider approaches to Islamic studies pedagogy Islamophobia and violence and suggestions for how to structure courses These approaches acknowledge the particular challenges faced when teaching a topic that students might initially fear or distrust Speaking from their own experience they include examples of collaborative teaching models reading and media suggestions and ideas for group assignments that encourage deeper engagement and broader thinking The contributors also share personal struggles when confronted with students including Muslim students and parents who suspected the courses might have ulterior motives In an age of stereotypes and misrepresentations of Islam this book offers a range of means by which teachers can encourage students to thoughtfully engage with the topic of Islam Abundant and useful references Highly recommended Choice **Pierre Bourdieu's Political Economy of Being** Ghassan Hage, 2025-09-05 Ghassan Hage outlines what he calls Pierre Bourdieu's political economy of being how society distributes and assigns values to ways of living and how people struggle to live a fulfilling life *Morphing Intelligence* Catherine Malabou, 2019-02-12 What is intelligence The concept crosses and blurs the boundaries between natural and artificial bridging the human brain and the cybernetic world of AI In this book the acclaimed philosopher Catherine Malabou ventures a new approach that emphasizes the intertwined networked relationships among the biological the technological and the symbolic Malabou traces the modern metamorphoses of intelligence seeking to understand how neurobiological and neurotechnological advances have transformed our view She considers three crucial developments the notion of intelligence as an empirical genetically based quality measurable by standardized tests the shift to the epigenetic paradigm with its emphasis on neural plasticity and the dawn of artificial intelligence with its potential to simulate replicate and ultimately surpass the workings of the brain Malabou concludes that a dialogue between human and cybernetic intelligence offers the

best if not the only means to build a democratic future A strikingly original exploration of our changing notions of intelligence and the human and their far reaching philosophical and political implications Morphing Intelligence is an essential analysis of the porous border between symbolic and biological life at a time when once clear distinctions between mind and machine have become uncertain Practising the Symbolic Sheena Jain,2022-10-04 A powerful theory of the symbolic embedded

within a remarkable and original theory of practice is a nodal aspect of the work of Pierre Bourdieu who was a leading social thinker of our times 1930 2002 Against the backdrop of the significance of symbolic practice in social life this book explains the intellectual warp and woof of his theory of the symbolic presents a brief excursus that explores its potential to illuminate social contexts other than those in which it was conceived examines its links with Bourdieu s role of social critic and public intellectual and engages critically with scholarly assessments of his contribution The book thus seeks to provide a comprehensive and in depth analysis and understanding of a central dimension of Bourdieu s work **Affect Theory,**

Shame, and Christian Formation Stephanie N. Arel,2016-11-08 This book addresses the eclipse of shame in Christian theology by showing how shame emerges in Christian texts and practice in ways that can be neither assimilated into a discourses of guilt nor dissociated from embodiment Stephanie N Arel argues that the traditional focus on guilt obscures shame by perpetuating the image of the lonely sinner in guilt Drawing on recent studies in affect and attachment theories to frame the theological analysis the text examines the theological anthropological writings of Augustine and Reinhold Niebuhr the interpretation of empathy by Edith Stein and moments of touch in Christian praxis Bringing the affective dynamics of shame to the forefront enables theologians and religious leaders to identify where shame emerges in language and human behavior The text expands work in trauma theory providing a multi layered theological lens for engaging shame and accompanying suffering **Sociological Amnesia** Alex Law,Eric Royal Lybeck,2016-03-03 The history of sociology

overwhelmingly focuses on the winners from the classical canon Marx Durkheim and Weber to today s most celebrated sociologists This book strikingly demonstrates that restricting sociology in this way impoverishes it as a form of historically reflexive knowledge and obscures the processes and struggles of sociology s own making as a form of disciplinary knowledge Sociological Amnesia focuses on singular contributions to sociology that were once considered central to the discipline but are today largely neglected Chapters explore the work of illustrious predecessors such as Raymond Aron Erich Fromm and G D H Cole as well as examining exceptional cases of reputational revival as in the case of Norbert Elias or Gabriel Tarde Through understanding the obstacles of recognition faced by female sociologists like Viola Klein and Olive Schreiner and public intellectuals like Cornelius Castoriadis the volume considers the reasons why certain kinds of sociology are hailed as central to the discipline whilst others are forgotten In so doing the collection offers fresh insights into not only the work of individual sociologists but also into the discipline of sociology itself its trajectories forgotten promises and dead ends The Republican Workers Party F.H. Buckley,2018-09-04 The Republican Workers Party is the future of American presidential

politics says F H Buckley It s a socially conservative but economically middle of the road party offering a way back to the land of opportunity where our children will have it better than we did That is the American Dream and Donald Trump s promise to restore it is what brought him to the White House As a Trump speechwriter and key transition advisor Buckley has an inside view on what Make America Great Again really means how it represents a program to restore the American Dream as well as a defense of nationalism rooted in a sense of fraternity with all fellow Americans The call to greatness was a repudiation of the cruel hypocrisy of America s New Class the dominant 10 percent who deploy the language of egalitarianism while jealously guarding their own privileges The New Class talks like Jacobins but behaves like Bourbons Its members claim to support equality and social mobility but resist the very policies that promote mobility and equality a choice of good schools for everyone s children not just the well to do a sensible immigration policy that doesn t benefit elites at the expense of average Americans and regulatory reform to trim back the impediments that frustrate competitive enterprise It isn t complicated What s been lacking is political will This book pulls no punches in describing how liberals and conservatives had become indifferent to those left behind On the left identity politics offered an excuse to hate an ideological enemy On the right a tired conservatism defined itself through policies that callously ignored the welfare of the bottom 90 percent Trump told us that both Left and Right had betrayed the American people and his Republican Workers Party promises to renew the American Dream Buckley shows how it will do so *The Anthem Companion to Pierre Bourdieu* Derek Robbins,2016-08-05

The Anthem Companion to Pierre Bourdieu provides an introduction to the French sociologist s thought and an evaluation of the international significance of his work from a range of national perspectives The contributions in the companion investigate the applicability of Bourdieu s theories and concepts in diverse sociopolitical contexts and consider the ways they can be said to possess universal validity In examining Bourdieu on his own philosophical terms this companion contributes to the general debate about the effects of the transnational and transcultural transfer of concepts generated in the West

Back to the Rough Grounds of Praxis Daniel Franklin Pilario,2005 What is praxis How do we do theology from its perspective These are the main questions which this book seeks to answer As propaedeutic to theological reflection it surveys the notion of praxis in the philosophical sociological and anthropological traditions from Aristotle and Marx to contemporary theories It argues that Pierre Bourdieu s theory of practice achieves a critical synthesis of these different traditions making it a viable theological dialogue partner Bourdieu provides us with a praxeological theory to scrutinize the complexity of the social realm and an epistemological theory to understand the mystery of God s presence in these socio historical conjunctures which serve as the privileged and only locus of His Her revelation The author thus engages two theologians who take praxis practice as central to their theological methods Clodovis Boff liberation theology and John Milbank radical orthodoxy From the perspective of its appropriated framework this work attempts to avoid the limitations as well as preserves the gains achieved by these two approaches as it also explores the rudiments of a theological method

The Routledge Companion to Bourdieu's 'Distinction'

Philippe Coulangeon, Julien Duval, 2014-10-30 This edited collection explores the genesis of Bourdieu's classical book *Distinction* and its international career in contemporary Social Sciences. It includes contributions from contemporary sociologists from diverse countries who question the theoretical legacy of this book in various fields and national contexts. Invited authors review and exemplify current controversies concerning the theses promoted in *Distinction* in the sociology of culture, lifestyles, social classes and stratification with a specific attention dedicated to the emerging forms of cultural capital and the logics of distinction that occur in relation to material consumption or bodily practices. They also empirically illustrate the theoretical contribution of *Distinction* in relation with such notions as field or habitus which fruitfulness is emphasized in relation with some methodological innovations of the book. In this respect a special focus is put on the emerging stream of distinction studies and on the opportunities offered by the geometrical data analysis of social spaces.

Pierre Bourdieu

Ágoston Fábry, 2025-09-12 Pierre Bourdieu is one of the most prominent figures in 20th century sociology. His influence remains substantial even after his death in 2002 and his views and findings continue to divide sociologists to this day. This book examines the issue of Bourdieu's so-called political turn, a significant topic in the French press and academic world. It explores whether the relationship between Pierre Bourdieu's increasingly visible political engagement from the mid 1990s and his earlier scientific work should be understood in terms of continuity or discontinuity. To investigate this specific issue it is essential to discuss some basic concepts and significant insights of Bourdieu's social theory. The book also considers the robustness of Bourdieu's theoretical framework and his criticisms of neoliberal capitalism from the perspective of Luc Boltanski's competing pragmatic sociology. The book concludes that although Bourdieu as a devoted left wing intellectual saw the possibility of resisting the neoliberal world order through mass mobilisation inciting masses to collective action remains problematic within his sociological and anthropological framework. Through a systematic discussion of Bourdieu's theory the book offers insights into the relationship between science and politics and hopes to provide an opportunity for a deeper understanding of his work.

Bourdieu Tony Schirato, Mary Roberts, 2020-07-28 Throughout his career French philosopher Pierre Bourdieu sought to interrogate what he described as the social unconscious, the means by which power is held and transmitted across generations. Bourdieu's work has been hugely influential in disciplines across the social sciences and humanities for decades yet Schirato and Roberts argue that few scholars are using his work to its full potential. Bourdieu's work is so wide ranging that commentary tends to focus on specific theoretical concepts he developed or his books on particular fields of inquiry. However he continued to develop these concepts in his work across his whole career and much of the richness of his thinking is lost if this isn't taken into account. Drawing on recently released lectures Schirato and Roberts offer a systematic account of Bourdieu's full body of work from his early research in Algiers to his last lectures in Paris. They show how Bourdieu continued to develop his concepts of habitus, field, capital, power and socio-cultural reproduction well into

his later years They also offer a nuanced reading of Bourdieu's thinking about education class language knowledge and culture beyond the individual books Bourdieu published on these topics This critical introduction to Bourdieu is essential reading for all Bourdieu scholars and for researchers and thinkers using Bourdieu's work in their own social and cultural analysis A terrific book which sets out a comprehensive overview of Bourdieu's oeuvre in a way that no other text I know has done Professor John Frow University of Sydney

The Obituary as Collective Memory Bridget Fowler, 2007-11-13 The first serious academic study of obituaries this book focuses on how societies remember Bridget Fowler makes great use of the theories of Pierre Bordieu arguing that obituaries are one important component in society's collective memory This book the first of its kind will find a place on every serious sociology scholar's bookshelves

The Author's Hand and the Printer's Mind Roger Chartier, 2013-12-06 In Early Modern Europe the first readers of a book were not those who bought it They were the scribes who copied the author's or translator's manuscript the censors who licensed it the publisher who decided to put this title in his catalogue the copy editor who prepared the text for the press divided it and added punctuation the typesetters who composed the pages of the book and the proof reader who corrected them The author's hand cannot be separated from the printer's mind This book is devoted to the process of publication of the works that framed their readers' representations of the past or of the world Linking cultural history textual criticism and bibliographical studies dealing with canonical works like Cervantes Don Quixote or Shakespeare's plays as well as lesser known texts Roger Chartier identifies the fundamental discontinuities that transformed the circulation of the written word between the invention of printing and the definition three centuries later of what we call literature

Pierre Bourdieu and Literacy Education James Albright, Allan Luke, 2010-04-26 In this volume scholars from around the world focus on how a Bourdieusian stance can enable a powerful sociocultural and cultural analysis of literacy education theory and practice and serve as an effective tool in analyzing relations of hierarchy and domination *Pierre Bourdieu and Literacy Education* is intended for researchers practitioners and graduate students in literacy education sociology of education and curriculum theory and as a text for advanced courses in these areas

Constructing Place Sarah Menin, 2004-02-24 This book is a cutting edge study examining the attitudes to both nature and the built environment of the designer the client and the society in which an intervention be it architecture landscape design or a piece of art is made The legacy of the Modernist view of nature and the environment is also addressed and the degree to which such ideas continue to impinge on contemporary interventions is assessed
