Richards,Chuck Sandy,2015-07-16 *Brilliant Activities for Reading Comprehension Year 2* Charlotte Makhoul,2015-12-02 The importance of being able to read for meaning should never be underestimated The ability to decode text is not enough It is vital that children understand what they are reading More importantly it is fundamental that they enjoy what they are reading so that they grow up to become lifelong readers The passages in the Brilliant Activities for Reading Comprehension series are designed to do just that They provide children with a variety of engaging enjoyable

texts that will grab their attention and indeed their teacher's attention as well. The types of comprehension passages range from newspaper articles and dialogues to plays, stories and poems. They gradually increase in difficulty as you progress through the book and through the series, encouraging children to develop their ability to read for meaning and use a range of strategies to engage with the text. Tasks range from simple factual recall and vocabulary work to more open-ended questions enabling the reader to provide a more personal response. The cross-curricular activities provide a wealth of ideas for extending the passages further and are ideal for fast finishers.

*Multicriteria Methodology for Decision Aiding* B.

Roy, 2013-11-11. Axiomatic results should be at the heart of such a science. Through them we should be able to enlighten and scientifically assist decision-making processes, especially by making that which is objective stand out more clearly from that which is less objective, separating robust from fragile conclusions, dissipating certain forms of misunderstanding in communication, avoiding the pitfall of illusory reasoning, emphasizing once they are understood incontrovertible results. The difficulties I encountered at the beginning of my career as an operations researcher and later as a consultant made me realize that there were some limitations on objectivity in decision aiding. In my opinion, five major aspects must be taken into consideration:

1. The borderline or frontier between what is and what is not feasible is often fuzzy. Moreover, this borderline is frequently modified in light of what is found from the study itself.
2. In many real-world problems, the decision maker  $D$  does not really exist as a person truly able to make a decision. Usually, several people, actors or stakeholders, take part in the decision process, and it is important not to confuse the one who ratifies a decision with the so-called decision maker in the decision-aiding process. This decision maker is, in fact, the person or the set of persons for whom or in the name of whom decision-aiding effort is provided.
