Pattern Recognition William Gibson:

Pattern Recognition William Gibson, 2004 Cayce is in London to work. Her pathological sensitivity to brands makes her the perfect divining rod for an ad agency that wants to test a new logo. But when she is co-opted into the search for the creator of a strangely addictive online film, Cayce wonders if she has done the right or indeed safe thing. And that's before violence, Japanese computer crazies and Russian Mafia men are in the mix. But she wants to discover the source of the film too and the truth of her father's disappearance in New York two years ago.

Novels by William Gibson Source Wikipedia, 2013-09 Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Commentary novels not included. Pages 23. Chapters Neuromancer, Pattern Recognition, Spook Country, The Difference Engine, Count Zero, All Tomorrow's Parties, Virtual Light, Idoru, Bridge trilogy, Mona Lisa Overdrive, Zero History. Excerpt: Pattern Recognition is a novel by science fiction writer William Gibson published in 2003. Set in August and September 2002, the story follows Cayce Pollard, a 32-year-old marketing consultant who has a psychological sensitivity to corporate symbols. The action takes place in London, Tokyo, and Moscow as Cayce judges the effectiveness of a proposed corporate symbol and is hired to seek the creators of film clips anonymously posted to the internet. The novel's central theme involves the examination of the human desire to detect patterns or meaning and the risks of finding patterns in meaningless data. Other themes include methods of interpretation of history, cultural familiarity with brand names, and tensions between art and commercialization. The September 11, 2001 attacks are used as a motif representing the transition to the new century. Critics identify influences in Pattern Recognition from Thomas Pynchon's postmodern detective story *The Crying of Lot 49*. Pattern Recognition is Gibson's eighth novel and his first one to be set in the contemporary world. Like his previous work, it has been classified as a science fiction and postmodern novel with the action unfolding along a thriller plot line. Critics approved of the writing but found the plot unoriginal and some of the language distracting. The book peaked at number four on the New York Times Best Seller list, was nominated for the 2003 British Science Fiction Association Award, and was shortlisted for the 2004 Arthur C. Clarke Award and Locus Awards. Before writing Pattern Recognition, the author William Gibson published seven novels.

Cyberpunk in a Transnational Context Takayuki Tatsumi, 2019-08-20 Mike Mosher's *Some Aspects of Californian Cyberpunk* vividly reminds us of the influence of West Coast counterculture on cyberpunks with special emphasis on 1960s theoretical gurus such as Timothy Leary and Marshall McLuhan who explored the frontiers of inner space as well as the global village. Frenchy Lunning's *Cyberpunk Redux* dives in the rich sight of post-Anthropocentric Visuality, examining how the heritage of Ridley Scott's techno noir film *Blade Runner* (1982) that preceded Gibson's *Neuromancer* (1984) keeps revolutionizing the art of visuality even in the age of the Anthropocene. If you read Lunning's essay along with Lidia Meras's *European Cyberpunk Cinema*, which closely analyzes major European cyberpunkish dystopian films *Renaissance* (2006) and *Metropia* (2009) and Elana Gomel's *Recycled Dystopias: Cyberpunk and the End of*

Technovisuality Helen Grace, Amy Chan Kit-Sze, Wong Kin Yuen, 2015-12-23 How should we regard the contemporary proliferation of images Today visual information is available as projected printed and on screen imagery in the forms of video games scientific data virtual environments and architectural renderings Fearful and anti visualist responses to this phenomenon abound Spread by digital technologies images are thought to threaten the word and privilege surface value over content Yet as they multiply images face unprecedented competition for attention This book explores the opportunities that can arise from the ubiquity of visual stimuli It reveals that technovisuality the fusion of digital technology with the visual can work wonders not so much dazzling audiences with special effects as reviving our enchantment with popular culture Introducing a new term for an entirely new field of academic study this book reveals the centrality of technovisuality in 21st century life

Transnationalism, Activism, Art Kit Dobson, Áine McGlynn, 2013-01-01 Banksy is known worldwide for his politically subversive works of art but he is far from the only artist whose creations are infused with internationally relevant activist themes How else can the arts help activate citizen participation in social justice movements Moreover what is the role of culture in a globalizing world Transnationalism Activism Art goes beyond Banksy by investigating how the three complementary political social and cultural phenomena listed in the title interact in the twenty first century Renowned and emerging critics use current theory on cultural production and politics to illuminate case studies of various media including film literature visual art and performance in their multiple manifestations from electronic dance music to Wikileaks to bestselling poetry collections By addressing how these artistic media are used to enact citizen participation in social justice movements the volume makes important connections between such participation and scholarly study of globalization and transnationalism

The Ethos of Digital Environments Susanna Lindberg, Hanna-Riikka Roine, 2021-05-27 While self driving cars and autonomous weapon systems have received a great deal of attention in media and research the general requirements of ethical life in today's digitalizing reality have not been made sufficiently visible and evaluable This collection of articles from both distinguished and emerging authors working at the intersections of philosophy literary theory media and technology does not intend to fix new moral rules Instead the volume explores the ethos of digital environments asking how we can orient ourselves in them and inviting us to renewed moral reflection in the face of dilemmas they entail The authors show how contemporary digital technologies model our perception narration as well as our conceptions of truth and investigate the ethical moral and juridical consequences of making public and societal infrastructures computational They argue that we must make the structures of the digital environments visible and learn to care for them

How to Read a Moment Mathias Nilges, 2021-03-15 In *How to Read a Moment* Mathias Nilges shows that time is inseparable from the stories we tell about it demonstrating that the contemporary American novel offers new ways to make sense of the temporality that governs our present Time is a thing that grows scarcer every day observes one of Don DeLillo's characters The future is gone The Baffler argues Where's my hoverboard a meme demands Contemporary capitalism a system that insists that everything happen at once creates problems for social thought and narrative alike After all how does one tell the time of instantaneity In this moment of on demand service and instant trading it has become difficult to imagine the future The novel emerged as the art form of a rapidly changing modern world a way of telling time in its progress Nilges argues that this historical mission is renewed today through works that understand contemporaneity as a form of time shaping that props up our material world and cultural imagination But the contemporary American novel does not simply associate our present with a crisis of futurity Through analyses of works by authors such as DeLillo Jennifer Egan Charles Yu and Colson Whitehead Nilges illustrates that the novel presents ways to make sense of the temporality that controls our purportedly fully contemporary world In so doing the novel recovers a sense of possibility and hope forwarding a dazzling argument for its own importance today

show that the current context of documentation is just another step in human construction that has been ongoing for not centuries but millennia and which since the end of the 19th century has been accelerating Coined by Paul Otlet in 1934 in his *Traite de Documentation* hyperdocumentation refers to the concept of documentation that is constantly being expanded and extended in its functionalities and prerogatives While according to Otlet everything could potentially be documented in this way increasingly we find that it is our lives that are being hyperdocumented Hyperdocumentation manifests as an increase not only in the quantity of information that is processed but also in its scope as information is progressively integrated across areas that were previously poorly documented or even undocumented

Literature and Terrorism ,2012-01-01 The years following the attacks of September 11 2001 have seen the publication of a wide range of scientific analyses of terrorism Literary studies seem to lag curiously behind this general shift of academic interest The present volume sets out to fill this gap It does so in the conviction that the study of literature has much to offer to the transdisciplinary investigation of terror not only with respect to the present post 9 11 situation but also with respect to earlier historical contexts Literary texts are media of cultural self reflection and as such they have always played a crucial role in the discursive response to terror both contributing to and resisting dominant conceptions of the causes motivations dynamics and aftermath of terrorist violence By bringing together experts from various fields and by combining case studies of works from diverse periods and national literatures the volume *Literature and Terrorism* chooses a diachronic and comparative perspective It is interested in the specific cultural work performed by narrative and dramatic literature in the face of terrorism focusing on literature s ambivalent relationship to other competing modes of discourse
