Managing Modern Healthcare Mike Bresnen,Damian Hodgson,Simon Bailey,Paula Hyde,John Hassard,2017-02-10

Until now research has given us only a limited understanding of how managers actually make sense of and apply management knowledge how networks of interaction amongst managers help or hinder processes of knowledge diffusion and the sharing of best practice and how these processes are all influenced both by the organisations in which managers act and by the professional communities of practice they belong to Managing Modern Healthcare fills these important gaps in our understanding by drawing upon an in depth study of management networks and practice in three healthcare organisations in the UK It draws from the primary research a number of important and grounded lessons about how management networks develop and influence the spread of management knowledge and practice how management training and development relates to the needs of managers facing challenging conditions and how those conditions are themselves shaping the nature of management in healthcare This book reveals how managers in practice are responding to the many contemporary challenges facing healthcare and the NHS in particular and how they are able or not to effectively exploit sources of knowledge learning and best practice through the networks of practice they engage in to improve healthcare delivery and healthcare organisational performance Managing Modern Healthcare makes a number of important theoretical contributions as well as practical recommendations The theoretical and empirical contributions the book makes relate to wider work on networks and networking management knowledge situated learning communities of practice professionalization professional identity and healthcare management more generally The practical contribution comes in the form of recommendations for healthcare management practitioners and policy makers that are intended to impact upon and help enhance healthcare management delivery and performance Masters Abstracts International ,1994 The Country Gentleman ,1926 The Emergence of Organizations and Markets John F. Padgett,Walter W. Powell,2012-10-14 A dynamic framework for studying social emergence The social sciences have sophisticated models of choice and equilibrium but little understanding of the emergence of novelty Where do new alternatives new organizational forms and new types of people come from Combining biochemical insights about the origin of life with innovative and historically oriented social network analyses John Padgett

and Walter Powell develop a theory about the emergence of organizational market and biographical novelty from the coevolution of multiple social networks They demonstrate that novelty arises from spillovers across intertwined networks in different domains In the short run actors make relations but in the long run relations make actors This theory of novelty emerging from intersecting production and biographical flows is developed through formal deductive modeling and through a wide range of original historical case studies Padgett and Powell build on the biochemical concept of autocatalysis the chemical definition of life and then extend this autocatalytic reasoning to social processes of production and communication Padgett and Powell along with other colleagues analyze a very wide range of cases of emergence They look at the emergence of organizational novelty in early capitalism and state formation they examine the transformation of communism and they analyze with detailed network data contemporary science based capitalism the biotechnology industry regional high tech clusters and the open source community
