Mothers and Daughters of Invention Autumn Stanley, 1995 Stanley traces women's inventions in five vital areas of technology worldwide agriculture medicine reproduction machines and computers **Handbook of Feminist Research** Sharlene Nagy Hesse-Biber, 2012 The second edition of the Handbook of Feminist Research Theory and Praxis presents both a theoretical and practical approach to conducting social science research on for and about women The Handbook enables readers to develop an understanding of feminist research by introducing a range of feminist epistemologies methodologies and methods that have had a significant impact on feminist research practice and women's studies scholarship The Handbook continues to provide a set of clearly defined research concepts that are devoid of as much technical language as possible It continues to engage readers with cutting edge debates in the field as well as the practical applications and issues for those whose research affects social policy and social change It also expands on the wealth of interdisciplinary understanding of feminist research praxis that is grounded in a tight link between epistemology methodology and method The second edition of this Handbook will provide researchers with the tools for excavating subjugated knowledge on women's lives and the lives of other marginalized groups with the goals of empowerment and social change Madness in the Making David Lindsay, 2005-05 A fascinating history of the unexpected intersection of science technology and show business John Steele Gordon author of Hamilton's Blessing Once upon a time American know how flourished through show how spectacular demonstrations by ever resourceful technological entrepreneurs David Lindsay brings back these glorious and sometimes infamous theatricals in a delightful witty narrative with a serious point the American inventor now relegated to endless rehearsals needs to resume a rightful place on the national center stage For admirers and critics of technology and for veteran and inspiring inventors Madness in the Making will give pleasure and inspire debate Edward Tenner Author of Why Things Bite Back **Inventing the 19th Century** Stephen van Dulken, 2001 The vivid picture of the Victorian Age unfolds as inventions from the ground breaking such as aspirin dynamite and the telephone to the everyday like blue jeans and tiddlywinks are revealed decade by decade Together they provide a vivid picture of Victorian life **BOOK JACKET The Biographical Dictionary of Women in Science: L-Z** Marilyn Bailey Ogilvie, Joy Dorothy Harvey, 2000 Volume 2 of 2 **Female Personalities in the Qur'an and Sunna** Rawand Osman, 2014-10-03 This book investigates the manner in which the Qur'an and sunna depict female personalities in their narrative literature Providing a comprehensive study of all the female personalities mentioned in the Qur'an the book is selective in the personalities of the sunna examining the three prominent women of ahl al bayt Khadija Fatima and Zaynab Analysing the major sources of Imami Shi'i Islam including the exegetical compilations of the eminent Shi'i religious authorities of the classical and modern periods as well as the authoritative books of Shi'i traditions this book finds that the varieties of female personalities are portrayed as human beings on different stages of the spiritual spectrum They display feminine qualities which are often viewed positively and are sometimes commendable

traits for men at least as far as the spiritual domain is concerned The theory particularly regarding women s humanity is then tested against the depiction of womanhood in the hadith literature with special emphasis on Nahj al Balagha Contributing a fresh perspective on classical materials this book will be of interest to students and scholars of Islamic Studies Women s Studies and Shi i Studies **Genealogy and the Librarian** Carol Smallwood,Vera Gubnitskaia,2018-06-28 Covering trends

Television Sarah Arnold, 2021-05-20 Between the nineteenth century and the mid twentieth century television transformed from an idea to an institution In *Gender and Early Television* Sarah Arnold traces women's relationship to the new medium of television across this period in the UK and USA She argues that women played a crucial role in its development both as producers and as audiences long before the golden age of television in the 1950s Beginning with the emergence of media entertainment in the mid nineteenth century and culminating in the rise of the post war television industries Arnold claims that all along the way women had a stake in television As keen consumers of media women also helped promote television to the public by performing as television girls Women worked as directors producers technical crew and announcers It seemed that television was open to women However as Arnold shows the increasing professionalisation of television resulted in the segregation of roles Production became the sphere of men and consumption the sphere of women While this binary has largely informed women's role in television through her analysis Arnold argues that it has not always been the case

Wild Science Janine Marchessault, Kim Sawchuk, 2013-10-18 *Wild Science* investigates the world wide boom in health culture While self help health books and medical dramas are popular around the globe we are bombarded with daily media images of DNA research and news reports about cloning the fight against AIDS cancer and depression With popular culture now the principal means through which the non scientific population encounters science why do certain images of science get promoted above others Contributors examine the public meanings of science revealing the frictions and contradictions within popular representations of what medicine can and should do Focusing on the visual culture of medicine they show how representations of science have a direct impact on popular perceptions of the limits of science and ultimately on health education funding and research and examine the belief that media literacy in popular representations of medicine makes an ethical public discourse on the aims

of science possible With sections addressing the new visual technologies which make the human body into a virtual territory the diagnostic and medical practices centered around women s bodies and popular debates around genetics and identity Wild Science argues that science is a practice bound in values and institutions and argues for a responsible engagement with the public cultures of science and health *Transformations of Electricity in Nineteenth-Century Literature and Science* Stella Pratt-Smith,2017-05-15 Throughout the nineteenth century practitioners of science writers of fiction and journalists wrote about electricity in ways that defied epistemological and disciplinary boundaries Revealing electricity as a site for intense and imaginative Victorian speculation Stella Pratt Smith traces the synthesis of nineteenth century electricity made possible by the powerful combination of science literature and the popular imagination With electricity resisting clear description even by those such as Michael Faraday and James Clerk Maxwell who knew it best Pratt Smith argues that electricity was both metaphorically suggestive and open to imaginative speculation Her book engages with Victorian scientific texts popular and specialist periodicals and the work of leading midcentury novelists including Charles Dickens Charlotte Bronte Emily Bronte William Makepeace Thackeray and Wilkie Collins Examining the work of William Harrison Ainsworth and Edward Bulwer Lytton Pratt Smith explores how Victorian novelists attributed magical qualities to electricity imbuing it with both the romance of the past and the thrill of the future She concludes with a case study of Benjamin Lumley s *Another World* which presents an enticing fantasy of electricity s potential based on contemporary developments Ultimately her book contends that writing and reading about electricity appropriated and expanded its imaginative scope transformed its factual origins and applications and contravened the bounds of literary genres and disciplinary constraints *Queen Anne's Lace* Susan Wittig Albert,2019-03-05 A present day ghost leads China Bayles to a secret from Pecan Springs s past in this haunting mystery from New York Times bestselling author Susan Wittig Albert While helping Ruby Wilcox clean up the loft above their shops China comes upon a box of antique handcrafted lace and old photographs Following the discovery she hears a woman humming an old Scottish ballad and smells the delicate scent of lavender Soon strange happenings start to occur in Thyme and Seasons When a customer sees a mysterious woman picking flowers nearby and then suddenly disappearing China must finally admit what Ruby has always known their building is haunted But by whom As China investigates the tragic story of a woman in one of the old photographs unfolds China delves into the century old mystery and realizes that solving it could have unimaginable repercussions in the here and now **Femininity, Mathematics and Science, 1880-1914 C.**
