A Handbook of Globalisation and Environmental Policy, Second Edition Frank Wijen, K. Zoeteman, J. Pieters, Paul van Seters, 2012-01-01 Acclaim for the first edition This is undoubtedly a useful collection of essays for environmental policy makers and anyone interested in the relationship between national government and transnational forces the collection brings together some interesting perspectives and should prove a useful complement to the existing political sociology of the environment International Sociology Review of Books The Handbook of Globalisation and Environmental Policy is a very important book More than 40 experienced authors including some of the most important international thought leaders of our time have confronted a crucial question How can and should national governments come to grips with the need for global action on a wide range of increasingly urgent environmental challenges that exceed their authority and capability Through close examination of numerous case studies a balanced perspective that takes government business and civil society into account and fresh interdisciplinary thinking about a range of policy tools the Handbook offers a treasure trove of new concepts and new perspectives The authors conclude that by acknowledging the ongoing erosion of national sovereignty and accepting the growing need to work together in supranational forums national governments can in fact increase their capacity to shape their own destiny Lawrence Susskind Massachusetts Institute of Technology US In an increasingly interdependent world global forces affect both the design and effectiveness of environmental policy This Handbook provides an unusually creative and comprehensive guide not only to the nature of these forces and their impacts but also to how a better understanding of these forces can provide a foundation for improving the effectiveness of environmental policy Tom Tietenberg Colby College US In the current era of globalisation national governments are increasingly exposed to international influences that present new constraints and opportunities for domestic environmental policies This comprehensive revised Handbook pushes the frontiers of theoretical and empirical knowledge and provides a state of the art examination of the multifaceted effects of globalisation on environmental governance Including substantially revised as well as new contributions from leading authorities the Handbook offers an insightful overview of recent developments at the intersection of globalisation and national environmental policy It covers themes including national regimes trade rules types of goods federalism innovation standards citizen consumers developing countries policy networks partnerships and carbon trading The Handbook's depth and scope will appeal to a broad and varied readership across academics students and policy makers interested in public and private governance environmental economics international relations environmental politics and law sociology and political science

Environmental

Governance through Partnerships Ayşem Mert, 2015-04-30 Transnational partnerships have become mainstream across levels and issues of environmental governance following their endorsement by the UN in 2002 Despite apparent success their desirability as a way of governing human interactions with the planet

Social Partnerships and Responsible Business M. May Seitanidi, Andrew Crane, 2013-12-04 Cross sector partnerships are widely hailed as a critical means for addressing a wide array of social challenges such as climate change poverty education corruption and health Amid all the positive rhetoric of cross sector partnerships though critical voices point to the limited success of various initiatives in delivering genuine social change and in providing for real citizen participation This collection critically examines the motivations for processes within and expected and actual outcomes of cross sector partnerships In opening up new theoretical methodological and practical perspectives on cross sector social interactions this book reimagines partnerships in order to explore the potential to contribute to the social good A multi disciplinary perspective on partnerships adds serious value to the debate in a range of fields including management politics public management sociology development studies and international relations Contributors to the volume reflect many of these diverse perspectives enabling the book to provide an account of partnerships that is theoretically rich and methodologically varied With critical contributions from leading academics such as Barbara Gray Ans Kolk John Selsky and Sandra Waddock this book is a comprehensive resource which will increase understanding of this vital issue

Democracy and Public-Private Partnerships in Global Governance M. Bexell, U. Mörtz, 2010-08-04 There has been rapid proliferation of public private partnerships in areas of human rights environmental protection and development in global governance This book demonstrates how different forms of partnership legitimacy and accountability interact and pinpoints trade offs between democratic values in partnership operations

Sustainable Development Goals in the Republic of Korea Tae Yong Jung, 2018-05-15 This book explores the attempts of South Korea in its to achieve the UN s Sustainable Development Goals SDGs by 2030 It addresses 6 of the 17 goals clean water affordable and clean energy decent work and economic growth sustainable cities and communities climate action and partnership and defines specific national strategies For each strategy the contributors define the research indicators they selected then analyze and examine the extent to which South Korea has met the SDG concerned They draw these conclusions from national and international reports government documents and policy papers on SDGs South Korea s experience in sustainable development and green programs will contribute to the planning of long term development strategies for developing countries

Public-private Partnerships for Sustainable Development Philipp H. Pattberg, Frank Biermann, Sander Chan, Ayşem Mert, 2012-01-01 The authors advance our understanding of the role of non state actors in global governance Not only do they empirically investigate the role of public private type 2 partnerships systematically they also critically consider their role in mitigating global governance deficits and their accountability in global governance Peter M Haas University of Massachusetts Amherst US The 2002 World Summit on Sustainable Development in Johannesburg is

remembered mainly for the promotion of a novel form of global governance the so called partnerships for sustainable development This book provides a first authoritative assessment of partnerships for sustainable development ten years after the Johannesburg Summit The extensive research builds on a unique Global Sustainability Partnerships Database and a series of in depth qualitative case studies Key questions studied in this book include the overall effectiveness and influence of partnerships their geographical functional and organizational scope and their legitimacy This unique book systematically investigates the questions of emergence influence and legitimacy which will prove invaluable for scholars and students interested in global environmental governance and sustainability public private partnerships sustainability at the UN level and environmental governance beyond international agreements and policies Handbook of Global Environmental Politics Peter Dauvergne, 2012-01-01 The second edition of this Handbook contains more than 30 new and original articles as well six essential updates by leading scholars of global environmental politics This landmark book maps the latest theoretical and empirical research in this energetic and growing field Captured here are the pioneering and lively debates over concerns for the health of the planet and how they might best be addressed The introduction explores the intellectual trends and evolving parameters in the field of global environmental politics It makes a case for an expansive definition of the field one that embraces an interdisciplinary literature on the connections between global politics and environmental change The remaining chapters are divided into four broad themes states and cooperation global governance the political economy of governance and knowledge and ethics with each section covering key emerging issues In depth explorations are given to topics such as climate change multinational corporations international agreements and UN organizations regulations and business standards trade and international finance multilevel and transnational governance and ecological citizenship Handbook of Global Environmental Politics Second Edition is a comprehensive review of the field and offers cutting edge ideas for further research As such scholars students and policymakers will find themselves looking to it for many years to come Governing the Provision of Ecosystem Services Roldan Muradian, Laura Rival, 2012-11-13 Founded on the core notion that we have reached a turning point in the governance and thus the conservation of ecosystems and the environment this edited volume features more than 20 original chapters each informed by the paradigm shift in the sector over the last decade Where once the emphasis was on strategies for conservation enacted through instruments of control such as planning and polluter pays legislation more recent developments have shown a shift towards incentive based arrangements aimed at those responsible for providing the environmental services enabled by such ecosystems Encouraging shared responsibility for watershed management developed in Costa Rica is a prime example and the various interests involved in its instauration in Java are one of the subjects examined here Forest People Interfaces Bas Arts, Séverine van Bommel, Mirjam Ros-Tonen, Gerard Verschoor, 2012-05-22 This book aims at both academics and professionals in the field of forest people interfaces It takes the reader on a journey through four major themes that have emerged since the initiation of social forestry in the 1970s non

timber forest products and agroforestry community based natural resource management biocultural diversity and forest governance In so doing the books offers a comprehensive and current review on social issues related to forests that other more specialized publications lack It is also theory rich offering both mainstream and critical perspectives and presents up to date empirical materials Reviewing these four major research themes the main conclusion of the book is that na ve optimism associated with forest people interfaces should be tempered The chapters show that economic development political empowerment and environmental aims are not easily integrated Hence local landscapes and communities are not as makeable as is often assumed Events that take place on other scales might intervene local communities might not implement policies locally and governance practices might empower governments more than communities This all shows that we should go beyond community based ideas and ideals and look at practices on the ground

South Africa and the Global Hydrogen Economy The Mapungubwe Institute for Strategic Reflection,2014-07-01 South Africa and the Global Hydrogen Economy is the publication of a MISTRA research project on the use of strategic minerals in the global putative hydrogen economy The book highlights the global significance of platinum group metals PGM and explores the strategic opportunities that arise out of South Africa s endowment of these strategic resources From their extraction to their applications in fuel cells what options are available for the country the region and the world to better leverage this endowment towards supporting growth and development objectives In view of their expanding range of applications do PGM need the hydrogen economy Conversely does the hydrogen economy need PGM Addressed to all industry stakeholders including those in the public and private sectors the options explored in this book are based on a thorough analysis of the global dynamics that should inform policy and business models related to PGM

Stakeholders, Governance and Responsibility Shahla Seifi,David Crowther,2018-09-14 This book re examines the relationships between stakeholders governance and corporate social responsibility It address different aspects of these relationships from a wide international and interdisciplinary perspective

Political Ecology of Tourism Mary Mostafanezhad,Roger Norum,Eric J. Shelton,Anna Thompson-Carr,2016-01-08 Why has political ecology been assigned so little attention in tourism studies despite its broad and critical interrogation of environment and politics As the first full length treatment of a political ecology of tourism the collection addresses this lacuna and calls for the further establishment of this emerging interdisciplinary subfield Drawing on recent trends in geography anthropology and environmental and tourism studies Political Ecology of Tourism Communities Power and the Environment employs a political ecology approach to the analysis of tourism through three interrelated themes Communities and Power Conservation and Control and Development and Conflict While geographically broad in scope with chapters that span Central and South America to Africa and South Southeast and East Asia to Europe and Greenland the collection illustrates how tourism related environmental challenges are shared across prodigious geographical distances while also attending to the nuanced ways they materialize in local contexts and therefore demand the historically situated place based

and multi scalar approach of political ecology This collection advances our understanding of the role of political economic and environmental concerns in tourism practice It offers readers a political ecology framework from which to address tourism related issues and themes such as development identity politics environmental subjectivities environmental degradation land and resources conflict and indigenous ecologies Finally the collection is bookended by a pair of essays from two of the most distinguished scholars working in the subfield Rosaleen Duffy foreword and James Igoe afterword This collection will be valuable reading for scholars and practitioners alike who share a critical interest in the intersection of tourism politics and the environment

Global Environmental Governance Reconsidered Frank Biermann, Philipp H. Pattberg, 2012 Yet many of its fundamental elements remain unclear in both theory and practice *Environmental Politics and Deliberative Democracy* Karin Bäckstrand, 2010-01-01 This important new book provides an excellent critical evaluation of new modes of governance in environmental and sustainability policy The multidisciplinary team of contributors combine fresh insights from all levels of governance all around a carefully crafted conceptual framework to advance our understanding of the effectiveness and legitimacy of new types of steering including networks public private partnerships and multi stakeholder dialogues This is a crucial contribution to the field Frank Biermann VU University Amsterdam The Netherlands Can new modes of governance such as public private partnerships stakeholder consultations and networks promote effective environmental policy performance as well as increased deliberative and participatory quality This book argues that in academic inquiry and policy practice there has been a deliberative turn manifested in a revitalized interest in deliberative democracy coupled with calls for novel forms of public private governance By linking theory and practice the contributors critically examine the legitimacy and effectiveness of new modes of governance using a range of case studies on climate forestry water and food safety policies from local to global levels *Environmental Politics and Deliberative Democracy* will appeal to scholars both advanced undergraduate and postgraduate as well as researchers of environmental politics international relations environmental studies and political science It will also interest practitioners involved in the actual design and implementation of new governance modes in areas of sustainable development food safety forestry and climate change

The Emerald Handbook of Public-Private Partnerships in Developing and Emerging Economies João Leitão, Elsa Morais Sarmiento, João Aleluia, 2017-12-07 This Handbook aims to support policy makers national governments national and regional public administrations PPP officers practitioners and academia in the design implementation and assessment of appropriate responses to foster PPPs uptake in the context of developing and emerging economies

Rethinking Authority in Global Climate Governance Thomas Hickmann, 2015-10-16 In the past few years numerous authors have highlighted the emergence of transnational climate initiatives such as city networks private certification schemes and business self regulation in the policy domain of climate change While these transnational governance arrangements can surely contribute to solving the problem of climate change their development by different types of sub and non state actors

does not imply a weakening of the intergovernmental level. On the contrary, many transnational climate initiatives use the international climate regime as a point of reference and have adopted various rules and procedures from international agreements. Rethinking Authority in Global Climate Governance puts forward this argument and expands upon it using case studies which suggest that the effective operation of transnational climate initiatives strongly relies on the existence of an international regulatory framework created by nation states. Thus, this book emphasizes the centrality of the intergovernmental process clustered around the United Nations Framework Convention on Climate Change (UNFCCC) and underscores that multilateral treaty making continues to be more important than many scholars and policy makers suppose. This book will be of great interest to students and scholars of global environmental politics, climate change, and sustainable development.
