Advances in Pasta Technology Savita Sharma, Rajan Sharma, Antima Gupta, Hanuman Bobade, 2025-06-20 Pasta is a conventional Italian product made from durum wheat semolina and characterized by high protein content firm shape and texture Extrusion technology allows incorporation of a variety of ingredients to pasta such as legumes millets pseudo cereals and others including mushrooms tubers and pigmented components to enrich conventional pasta It is a convenient popular and versatile product offering the food industry and researchers the opportunity to offer high nutritional quality by using

alternative ingredients of nutritive excellence with a high concentration of bioactive components which induce several health benefits through antioxidative pathways To deal with compromised functional properties of resultant pasta different technological interventions including use of hydrocolloids and modification of flours which are used to improve rheological and textural profile are necessary Advances in Pasta Technology documents the history of pasta and its rise from niche to mainstream The book is divided into 4 sections including an introduction that covers pasta history global market statistics traditional pasta making technology and processing along with quality characteristics Another section is dedicated to nutritive valorization of pasta including modulation in the bio functional characteristics as a function of ingredients including development of gluten free pasta micronutrient fortification approach and use of protein fibre and antioxidant rich flours as potential alternative ingredients Further sections focus on technological approaches to enhance the performance of specialty pasta including additives modification of flours and processing techniques and quality management plant project profile and cost analysis details This text highlights every aspect of pasta science technology and market control The Adoption of Agricultural Technology ,1993 *Handbook of Food Products Manufacturing, 2 Volume Set* Nirmal K. Sinha,2007-04-27 The Handbook of Food Products Manufacturing is a definitive master reference providing an overview of food manufacturing in general and then covering the processing and manufacturing of more than 100 of the most common food products With editors and contributors from 24 countries in North America Europe and Asia this guide provides international expertise and a truly global perspective on food manufacturing **Encyclopedia of Meat Sciences** Carrick Devine,M. Dikeman,2004-08-19 The Encyclopedia of Meat Sciences is an impressive and important body of work Prepared by an international team of experts this reference work covers all important aspects of meat science from stable to table including animal breeding physiology and slaughter meat preparation packaging welfare and food safety to name a few This Encyclopedia further covers important topics such as food microbiology meat in human nutrition biotechnological advances in breeding and many more The Encyclopedia of Meat Sciences is an invaluable resource to practitioners of meat science and students alike Also available online via ScienceDirect featuring extensive browsing searching and internal cross referencing between articles in the work plus dynamic linking to journal articles and abstract databases making navigation flexible and easy For more information pricing options and availability visit www.info.sciencedirect.com Foreword written by Rt Hon Helen Clark Prime Minister of New Zealand Over 200 articles covering all aspects of meat science Reading lists at the end of each article provide further information into primary literature Various figures and tables illustrating the text and a color plate section in each volume Appeals to students academics researchers and professionals working not only in meat science but also food science veterinary sciences agricultural engineering and livestock management Extensive cross referencing *Handbook of Food Science and Technology 3* Romain Jeantet,Thomas Croguennec,Pierre Schuck,G rard Brule,2016-06-20 This third volume in the Handbook of Food Science and Technology Set explains the processing of raw

materials into traditional food bread wine cheese etc The agri food industry has evolved in order to meet new market expectations of its products with the use of separation and assembly technologies food technologists and engineers now increasingly understand and control the preparation of a large diversity of ingredients using additional properties to move from the raw materials into new food products Taking into account the fundamental basis and technological specificities of the main food sectors throughout the three parts of this book the authors investigate the biological and biochemical conversions and physicochemical treatment of food from animal sources plant sources and food ingredients

Cereals Processing Technology Gavin Owens, 2001-04-12 Cereals processing is one of the oldest and most important of all food technologies Written by a distinguished international team of contributors Cereals Processing Technology reviews the range of cereal products and technologies used to produce them It is designed for all those involved in cereals processing whether raw material producers and refiners needing to match the needs of secondary processors benchmarking their operations against the best prices in their sector and across cereals processing as a whole Part 1 looks at cereal and flour production with chapters on cereal and production methods and flour milling There is also a chapter on the increasingly important and controversial area of cereal biotechnology and its application to wheat barley rice and maize Part 2 looks at how these raw materials are then processed into final products for the consumer There are chapters on rice and rice product production pasta and Asian noodle processing the manufacture of breakfast cereals malting and breadmaking Chapters look at the increasing diversity of cereal products at current best practice in manufacturing processes and emerging trends in the technologies for particular products Cereals Processing Technology provides an authoritative guide to some of the key technological developments both within particular sectors and across cereals processing as a whole

Rheology of Biological Soft Matter Isamu Kaneda, 2016-11-16 In this book a wide range subjects in biorheology are dealt with from fundamentals to applications The inclusion of quite substantial chapters concerned with application aspects such as the latest studies on foods cosmetics personal care products and biological tissues related regenerative medicine is one of the features of the book For the fundamental aspects studies on the physicochemical characteristics of biopolymer the key substance of soft matter are listed By contrast in the application aspect although the main topic is the rheology of foods focusing on the texture of mastication or swallowing novel studies on cosmetics and personal care products concerning feeling during the lubrication by those products are also considered This book will engage both a professional and an academic audience interested in soft matter especially as related to food cosmetics and personal care products In particular this work will have a special appeal to scientists and engineers in the food and cosmetics industries and to graduate students preparing for those fields

Using Cereal Science and Technology for the Benefit of Consumers Stanley P. Cauvain, L S Young, S Salmon, 2005-01-10 The Proceedings of the 12th International Cereal and Bread Congress provide a wide ranging comprehensive and up to date review of the latest advances in cereal science and technology with contributions from leading

cereals institutes and individuals from around the world They bring together all elements of the grain chain from breeding of new wheat varieties through the milling processes and on to the conversion of flour into baked products ready for the consumer at large Evaluating and predicting wheat flour properties require new equipment and new techniques and these are covered in depth Cereals other than wheat are given due consideration The versatility of wheat flour and its conversion into food is reviewed across a whole spectrum of products There is a strong emphasis on the use of wheat flour for bread making but with consideration of applications in the manufacture of cakes cookies pastries extruded foods pasta and noodles The development process and the benefits to consumers are also addressed The Editors and the Organising Committee have assembled a collection of high quality papers which provide a showpiece for the latest developments in cereal science and technology Extensive collection of proceedings from the 12th International Cereal and Bread Congress High quality papers highlighting the most recent developments in cereal science and technology Benefits for the industry and consumers are discussed

ICC Handbook of 21st Century Cereal Science and Technology Peter R. Shewry, Hamit Koksel, John Taylor, 2023-06-30 ICC Handbook of 21st Century Cereal Science and Technology highlights the importance of cereals presenting insights into the foundational structure of cereal grains including potential contamination factors that can negatively impact cereal and grain yield Focusing on the eight major cereal crops wheat maize rice barley sorghum and millets oats rye and pseudocereals this is the only available reference to provide standardized coverage for detailed comparison Written by a global team of expert editors and contributors the book provides practical insights into the utilization of cereals grains and safety assessments This International Association for Cereal Science and Technology endorsed volume continues their commitment to international cooperation through the dissemination of knowledge conducting research and developing standard methods Provides standardized insights into cereals their grains profiles and uses Includes the 8 most utilized cereals including pseudocereals Promotes understanding of the real world use options of cereals

Durum Wheat Chemistry and Technology Michael Sissons, 2016-04-27 The most extensive and comprehensive reference on durum wheat chemistry and technology ever available this ambitious update to the first edition covers more diverse and interesting topics in a new expanded format Forty six contributors each highly experienced and recognized as world authorities on durum wheat provide the latest developments in scientific research and technology All aspects of durum wheat are covered from agronomy and the chemical composition of the grain to the latest industrial approaches to processing durum wheat as well as food safety and quality assurance issues Expanded to include new topics like functional pasta grain safety and biotechnology along with practical and applied information including a table of uses for specific carbohydrates descriptions of improved laboratory techniques and international comparisons of HACCP experiences Durum Wheat Chemistry and Technology Second Edition is a must have reference for professionals students and researchers inside and outside the field who want to learn about durum wheat technology and chemistry New and Revised Topics Include
