favorable geographical conditions in which to navigate the great oceans the Christian mandate to extend the faith the need for new trade routes and an imperial organization aspiring to global dominance The author explores new methods for approaching old historiographical problems of the Renaissance such as the discovery and conquest of America the birth of modern science and the problem of Eurocentrism now in reference to actors and regions scarcely visible in the complex history of modern Europe the ships the wind the navigators their instruments their gods saints and demons The book offers convincing evidence to incorporate the Catholic world of early modernity into the history of modern science The research is supported by the analysis of not widely studied primary sources such as the sixteenth century Iberian nautical manuals Through the use of theoretical frameworks such as the Actor Network Theory the book sheds light on the need to incorporate the role of heterogeneous human actors and artifacts ships navigation tools sails cannons natural and geographical agents ocean currents winds the sun the moon and the stars and divine entities gods daemons and saints into the political history of early modernity

The Atlantic in World History, 1490-1830 Trevor Burnard, 2019-12-12 The Atlantic in World History 1490 1830 looks at the historical connections between four continents Africa Europe North America and South America through the lens of Atlantic history It shows how the Atlantic has been more than just an ocean it has been an important site of circulation and transmission allowing exchanges and interchanges which have profoundly shaped the development of the world Divided into four thematic sections Trevor Burnard's sweeping yet concise narrative covers the period from the voyages of Columbus to the New World in the 1490s through to the end of the Age of Revolutions around 1830 It deals with key topics including the Columbian exchange Atlantic slavery and abolition war as a global phenomenon the Age of Revolution religious conversion nation building trade and commerce and intellectual movements such as the Enlightenment Rather than focusing on the rise of the West Burnard stresses the interactive nature of encounters between various parts of the world setting local case studies within his broader interconnected narrative Written by a leading historian of Atlantic history and including further reading lists images and maps as well as a companion website featuring discussion questions timelines and primary source extracts this is an essential book for students of Atlantic and world history

Colonial Counterpoint D. R. M. Irving, 2010-06-03 In this groundbreaking study D R M Irving reconnects the Philippines to current musicological discourse on the early modern Hispanic world For some two and a half centuries the Philippine Islands were firmly interlinked to Latin America and Spain through transoceanic relationships of

politics religion trade and culture The city of Manila founded in 1571 represented a vital intercultural nexus and a significant conduit for the regional diffusion of Western music Within its ethnically diverse society imported and local musics played a crucial role in the establishment of ecclesiastical hierarchies in the Philippines and in propelling the work of Roman Catholic missionaries in neighboring territories Manila's religious institutions resounded with sumptuous vocal and instrumental performances while an annual calendar of festivities brought together many musical traditions of the indigenous and immigrant populations in complex forms of artistic interaction and opposition Multiple styles and genres coexisted according to strict regulations enforced by state and ecclesiastical authorities and Irving uses the metaphors of European counterpoint and enharmony to critique musical practices within the colonial milieu He argues that the introduction and institutionalization of counterpoint acted as a powerful agent of colonialism throughout the Philippine Archipelago and that contrapuntal structures were reflected in the social and cultural reorganization of Filipino communities under Spanish rule He also contends that the active appropriation of music and dance by the indigenous population constituted a significant contribution to the process of hispanization Sustained enharmonic engagement between Filipinos and Spaniards led to the synthesis of hybrid syncretic genres and the emergence of performance styles that could contest and subvert hegemony Throwing new light on a virtually unknown area of music history this book contributes to current understanding of the globalization of music and repositions the Philippines at the frontiers of research into early modern intercultural exchange

The Indies of the Setting Sun Ricardo Padrón, 2020-07-29 Padrón reveals the evolution of Spain's imagining of the New World as a space in continuity with Asia Narratives of Europe's westward expansion often tell of how the Americas came to be known as a distinct landmass separate from Asia and uniquely positioned as new ground ripe for transatlantic colonialism But this geographic vision of the Americas was not shared by all Europeans While some imperialists imagined North and Central America as undiscovered land the Spanish pushed to define the New World as part of a larger and eminently flexible

geography that they called las Indias and that by right belonged to the Crown of Castile and León. Las Indias included all of the New World as well as East and Southeast Asia although Spain's understanding of the relationship between the two areas changed as the realities of the Pacific Rim came into sharper focus. At first the Spanish insisted that North and Central America were an extension of the continent of Asia. Eventually they came to understand East and Southeast Asia as a transpacific extension of their empire in America called las Indias del poniente or the Indies of the Setting Sun. The Indies of the Setting Sun charts the Spanish vision of a transpacific imperial expanse beginning with Balboa's discovery of the South Sea and ending almost a hundred years later with Spain's final push for control of the Pacific. Padrón traces a series of attempts both cartographic and discursive to map the space from Mexico to Malacca revealing the geopolitical imaginations at play in the quest for control of the New World and Asia.
