Clements, Leah Fiorentino, 2004-04-30 Clements Fiorentino and their contributors focus on the right of every child to experience the joy and developmental benefits derived from play The volume brings together national and international specialists in the areas of early childhood and play leadership as well as playground manufacturers parks and recreation directors architects and landscape architects child care providers child life specialists movement and physical educators and parent advocates of play Clements and Fiorentino offer readers contemporary thoughts from more than 60 national and international specialists in the areas of early childhood and play leadership brain research and educational psychology as well as playground specialists child life specialists movement and physical educators All works reflect the contributors commitment to the belief in education through play or play for its own sake The contributors also confirm the belief that play along with the basic needs of nutrition health shelter and education is vital to the development of all children This collection is divided into five parts Part One addresses topics of special interest to parents and caregivers concerning definitions and the importance of play Part Two offers information concerning curriculum development programming and several academic teaching issues Topics reflecting the child's props playthings and play environments are blended together in Part Three Part Four offers in-depth chapters linking current research connecting brain and learning with play Part Five contains an overview of the importance and right of all children to play **Play from Birth to Twelve** Doris Pronin Fromberg, Doris Bergen, 2012-11-12 In light of recent standards based and testing movements the issue of play in childhood has taken on increased meaning for educational professionals and social scientists This second edition of Play From Birth to Twelve offers comprehensive coverage of what we now know about play its guiding principles its dynamics and importance in early learning These up to date essays written by some of the most distinguished experts in the field help students explore all aspects of play including new approaches not yet covered in the literature how teachers in various classroom situations set up and guide play to facilitate learning how play is affected by societal violence media reportage technological innovations and other contemporary issues which areas of play have been studied adequately and which require further research

Teaching Your Child to Love Learning Judy Harris Helm, 2004 **The Oxford Handbook of the Development of Play** Anthony D. Pellegrini, 2011 The role of play in human development has long been the subject of controversy Despite being championed by many of the foremost scholars of the twentieth century play has been dogged by underrepresentation

and marginalization in literature across the scientific disciplines The Oxford Handbook of the Development of Play marks the first attempt to examine the development of children's play through a rigorous and multidisciplinary approach Comprising chapters from the foremost scholars in psychology anthropology and evolutionary biology this handbook resets the landscape of developmental science and makes a compelling case for the benefits of play Edited by respected play researcher Anthony D Pellegrini The Oxford Handbook of the Development of Play is both a scientific accomplishment and a shot across the bow for parents educators and policymakers regarding the importance of children's play in both development and learning

A Blind Child's Pathway to Learning Dr. William Cavitt, Dr. Thomas Gwise, 2013-12-13 Our intention in writing this book is to provide three distinct but closely related groups with insight into the factors required to help a blind child attain his/her maximum level of cognitive abilities The first group consists of parents who face the day to day reality of helping their blind child deal with the challenges imposed by the lack of sight The second group consists of beginning and future professionals who will find themselves deeply involved with providing social psychological and educational support of these parents The third group includes friends family and others who are not and will not be on the front lines of working with blind children but who are interested in understanding the issues for their own reasons There are many articles and books available that discuss the various aspects of the development of both sighted and blind children from almost every possible perspective related to the factors that impact the learning and developmental processes of children Unfortunately the vast majority of these have been written by professionals to professionals using the jargon of the author's chosen field of study As a result people who are not part of the in groups often find these publications hard to understand boring or both In this book we do not aim to provide any new insights to established professionals or other individuals who are knowledgeable in this area Rather our purpose is to translate the knowledge provided by these professionals into ideas and concepts that can be readily understood and applied by parents teachers and other caregivers of blind children Throughout the book we will be dealing with highly specialized concepts and theories of education psychology and human development We have done our best to translate the professional and academic jargon into what most people would call simple English Throughout the text we have provided our definitions of key terms as we have come to understand and apply those terms We recognize that others may have different interpretations for the same terms and we do not dispute that their definitions serve their particular purposes
