Person-Centered Communication with Older Adults Timothy A. Storlie, 2015-06-01 Providers serving older adults face a growing problem Older adults are becoming increasingly dissatisfied with service quality citing deficits in provider communication and relationship skills The author argues this dissatisfaction is largely related to three widespread issues ageism use of professional jargon and age related changes in the older adult To address these concerns Dr Storlie advocates adoption of an evidence based person centered approach to communication The benefits of person centered communication are many They can increase older adult satisfaction with provider services enhance mutual respect and understanding improve accuracy of information exchanged positively impact service outcomes increase compliance with provider recommendations and reduce the frustration and stress often experienced by both provider and older adult Rare to this genre readers are introduced to several under explored topics within the field of communication along with methods for applying concepts from research findings into these topics to enhance the quality of interpersonal communication Topics include the role of mental imagery in the communication process the influence of neurocardiology on relationships and controversial findings from research into quantum physics The book concludes by highlighting progress made in narrowing the interpersonal communication gap and forecasts how communications oriented technological advances might improve quality of life for 21st century older adults and the providers who serve them Utilizing interdisciplinary case studies to illustrate common problematic situations this book provides detailed exercises that explain how providers can integrate person centered communication into their practices to improve provider older adult interactions Written in a style designed to maximize learning it helps providers find the information they need understand what they read and apply what they've learned to improve professional communication Person Centered

Communication with Older Adults is an essential guide for today's healthcare professionals and other aging services providers and also for the educators who help to prepare the providers of tomorrow. Presents a conceptual framework for understanding respect-based person-centered communication. Teaches specific communication skills to aging services providers and educators to assist in effectively communicating with older adults. Includes numerous case studies to help in identifying common problematic situations and describing practical ways to integrate positive communication. One of the first books to integrate scientific evidence-based findings with a personal approach that includes important new information on neurocardiology.

The Role of the Pharmacist in Patient Care Abdul Kader Mohiuddin, 2020. The goal of a high quality cost-effective and accessible health care for patients is achieved through constructing a team-based and patient-centered health care delivery system. The expanded role of pharmacists uplifts them to patient care from dispensing and manufacturing or marketing of drugs. Along with doctors and allied health professionals, pharmacists are increasingly recognized as an integral part of the patient care team. Furthermore, colleges of pharmacy need to revise and update their curricula to accommodate the progressively increasing development in the pharmaceutical education and the evolving new roles of practicing pharmacists in patient care settings. This book focuses on the expanded role of the pharmacists in total patient care including prescribing, dispensing, compounding, administering, and monitoring of drugs at home, hospital, community hospice, critical care, changeover, and other care settings. The sector is emerging in both developed and underdeveloped countries. Overburdened by patient loads and the explosion of new drugs, physicians turned to pharmacists more and more for drug information, especially within institutional settings. And today's patient care pharmacists are taking more interests in medication review and reconciliation, patient education and counseling, creating drug therapy regimen, and monitoring compliance. The purpose of this book is to guide the pharmacists in their daily interactions with patients and to ensure collaboration with other health professionals. The contents are mostly based on recently published articles related to patient care with most recent ideas and activities followed by the patient care pharmacists around the globe. However, a pharmacist implements the care plan in collaboration with other health care professionals and the patient or caregiver. Along with professional guidelines, the book discusses the concepts and best practices of patient interaction, patient rights, and ethical decision making for the professional pharmacist, apprentice, and student. In every chapter, the role of pharmacists in that chapter-specific issues are detailed explicitly so that a professional pharmacist or a student can figure out his or her do's and don'ts in that specific situation. Moreover, further reading references are listed as future recommendations. So the book is an archive of potential references too. Among so many books about patient care, either doctors or nurses' roles are highlighted. The proposed book highlights the pharmacists' roles and responsibilities to the most separated from those of doctors and nurses with the most recent information obtained from most publications in several journals, books, bulletins, newsletter, magazines, etc.

Psychological Perspectives in HIV Care Michelle Croston, Sarah Rutter, 2020-07-29. The care paradigm for

people with HIV has shifted from managing progressive illness with a poor prognosis to managing a chronic condition. Despite this improvement, people living with HIV continue to experience considerable stresses, so promoting their holistic wellbeing is a key aspect of long-term care. This book provides an accessible introduction for healthcare professionals who work with people living with HIV. It is designed to help readers understand how care in practice can be more person-centred and psychologically focused whilst promoting compassion, health and wellbeing. Topics covered include self-awareness, attachment theories and communication, as well as key aspects of providing care for people living with HIV, such as stigma in young adults, neurocognitive issues, the sexualized use of drugs, managing neuropathic pain and the needs of older adults living with HIV. Invaluable reading for health professionals working within multidisciplinary teams that provide care for people living with HIV, this book is also a core text for those studying in the area.

Portable Health Records in a Mobile Society Egondur R. Onyejekwe, Jon Rokne, Cory L. Hall, 2019-09-06. This book details how electronic health records (EHRs) and medical records (EMRs) can be optimized to enable meaningful interactions between provider and patient to enhance quality of care in this new era of mHealth. As the technologies evolve to provide greater opportunities for mHealth applications, so do the challenges. This book addresses the issues of interoperability, limitations, data processing errors and patient data privacy while providing instruction on how blockchain-like processes can potentially ensure the integrity of an externally maintained EHR. **Portable Health Records in a Mobile Society** identifies important issues and promising solutions to create a truly portable EHR. It is a valuable resource for all informaticians and healthcare providers seeking an up-to-date resource on how to improve the availability, reliability, integrity and sustainability of these revolutionary developments in healthcare management.
