of sociological research since the 1950s The importance of this research derives from the systematic analysis of functionalist theories of industrialism Functionalist theories assume that the complementary demands of efficiency and justice result in more meritocratic societies characterized by high rates of social mobility Much of the sociological evidence has cast doubt on this optimistic if not utopian claim that reform of the education system could eliminate the influence of class gender and ethnicity on academic performance and occupational destinations. This book brings together sixteen cutting edge articles on education and social mobility It also includes an introductory essay offering a guide to the main issues and controversies addressed by authors from several countries This comprehensive volume makes an important contribution to our theoretical and empirical understanding of the changing relationship between origins education and destinations This timely collection is also relevant to policy makers as education and social mobility are firmly back on both national and global political agendas viewed as key to creating fairer societies and more competitive economies This book was originally published as a special issue of the British Journal of Sociology of Education Islamic Myths and Memories Itzchak Weismann, Mark Sedgwick, Ulrika Mårtensson, 2016-05-06 Islamic myths and collective memory are very much alive in today s localized struggles for identity and are deployed in the ongoing construction of worldwide cultural networks This book brings the theoretical perspectives of myth making and collective memory to the study of Islam and globalization and to the study of the place of the mass media in the contemporary Islamic resurgence It explores the annulment of spatial and temporal distance by globalization and by the communications revolution underlying it and how this has affected the cherished myths and memories of the Muslim community It shows how contemporary Islamic thinkers and movements respond to the challenges of globalization by preserving reviving reshaping or transforming myths and memories **Corruption and Constitutionalism** in Africa Charles M. used to press for suffrage The urgency of wartime mobilization enabled proponents to promote food production as a vital national security issue The connection between the nation s food readiness and national security resonated within the U S struggling to unite urban and rural interests grappling with the challenges presented by millions of immigrants and considering the country s global role The same message that food production is vital to national security can resonate today These World War I programs resulted in a national gardening ethos that transformed the American food system
