were also encouraged to read books at school The first generation where this happened Their children the post World War II Baby Boomers continued the progression and became avid readers In those days not so long ago say between seventy and thirty years ago people wrote letters by hand It was a long but very pleasant personal experience Then the home computer email and the Internet began to spread among the masses and pen and ink gradually became replaced with message boards posting to forums and email Before this point writing had been a special event for most people thank you letters postcards birthday cards and the odd personal letter home or to a friend The home computer made it easy to dash off a quick note to someone It took far less time to write and deliver or have delivered by the post office Suddenly everyone began writing and posting to family friends strangers and even enemies A barrier had been lifted barriers of time and formality perhaps A high percentage of those Boomers compared with other generations have gone on to write some kind of book or ebook So the Boomers are the first generation of working class writers and their parents were the first working class generation of readers The generations after the Boomers have never lived without the Internet and use it even more confidently than the Boomers used a pen This is why there have never been so many writers or typists in the history of mankind Writing skills are more important now than ever before because of the proliferation of writers and therefore readers Now is not the time to slack to lower standards In fact quite the opposite Hence this booklet
