

The MONARCH gave land to the tenants-in-chief, who paid rent in the form of continuing loyalty and military support.

The TENANTS-IN-CHIEF (lords and bishops):

- provided fully equipped knights to serve 40 days per year in the monarch's army
- provided the king with money, advice and prayers as appropriate.

The SUB-TENANTS (knights and lesser clergy) received land from the tenants-in-chief in return for:

- fighting wars for the king or praying for his success
- guarding and protecting the person and property of the chief tenant.

The sub-tenants allocated spare land to the PEASANTRY, who paid for the use of this land by:

- working the knight's or the lord's land as well as their own
- paying taxes in the form of crops.

Peasants In Complex Society:

Peasants in Complex Society Frederick C. Gamst, 1974 *Anthropology of Complex Society* Gaya Pandey, 2021-01-01

The book *Anthropology of Complex Society* deals with characteristics of complex society and simple society. It also describes anthropological approaches to the study of complex society, folk urban continuum, peasant culture, urban culture, impact of urbanisation and industrialisation. Institutions like marriage, family, kinship, religion, and network system of Complex Society have found significant place in the book. Studies on peasant societies, castes, urban and industrial places by different scholars have been reviewed and analysed to know their main features. Town planning and its various aspects have also been highlighted.

The Little Community and Peasant Society and Culture Robert Redfield, 1989-03-15 This volume combines two classic works of anthropology. *The Little Community* draws on the author's own notable studies of the villages of Tepoztlan and Chan Kom to explore the means by which scientists try to understand human communities. It contains what Margaret Mead wrote the essence of Robert Redfield's multifaceted contributions to the place of community studies in social science. *Peasant Society and Culture* outlines a speculative foundation for the emergence of anthropology from the study of isolated primitive tribes.

Peasant Wars of the Twentieth Century Eric R. Wolf, 1999 *Peasant Wars of the Twentieth Century* provides a good short course in the major popular revolutions of our century in Russia, Mexico, China, Algeria, Cuba, and Viet Nam, not from the perspective of governments or parties or leaders but from the perspective of the peasant peoples whose lives and ways of living were destroyed by the depredations of the imperial powers, including American imperial power. *New York Times Book Review* Eric Wolf's study of the six great peasant-based revolutions of the century demonstrates a mastery of his field and the methods required to negotiate it that evokes respect and admiration. In six crisp essays and a brilliant conclusion, he extends our understanding of the nature of peasant reactions to social change appreciably by his skill in isolating and analyzing those factors which by a magnification of the anthropologist's techniques can be shown to be crucial in linking local grievances and protest to larger movements of political transformation. *American Political Science Review* An intellectual tour de force. *Comparative Politics*

Peasants In Transition Ted Lewellen, 2019-06-10 The book is an important demonstration of the viability of General Systems Theory for anthropology. Among the surprising findings directly deriving from this approach is that the Aymara transition is a response not to inputs from the industrial sector but to instabilities within the traditional Aymara economic system itself. The Systems Theory principle of the adaptive value of deviance is the basis for an in-depth analysis of the emergence of the Seventh Day Adventists as a power elite in many Aymara communities.

The Transformation of Civil Society William Noll, 2023-05-15 The catastrophic terror Soviet power unleashed on the Ukrainian countryside in the early 1930s altered every aspect of village life. Based on extensive interviews with villagers throughout Ukraine, *The Transformation of Civil Society* provides an oral history of the material and cultural destruction sustained in rural Ukraine throughout the Stalinist era. Beginning with wholesale deportations and

evictions followed by the process of collectivization in Ukraine the Soviet state's impact on peasant life extended deep into the fabric of society Targeting the cultural life of these Ukrainians the 1930s began with the physical repression of religious institutions and personnel the repression of church ritual and later the repression of entertainment and expressive culture such as music making By bringing to light the experiences of more than four hundred Ukrainians who witnessed the terror of the Stalinist era William Noll privileges villagers points of view on the near total destruction of their world and preserves the memory of their civil society Almost twenty five years after its Ukrainian publication *The Transformation of Civil Society* makes this classic available in English for the first time

Capital, Saving and Credit in Peasant Societies A. H.

Black, B.S. Yamey, 2017-07-12 Contemporary problems of economic and social change have obliged social scientists from different fields to learn much about each others work as well as about the specific problems they are together seeking to solve The bearing of economic conditions on the character of a social system has become more apparent to anthropologists and similarly economists have become more aware of the relevance of social factors to economic decisions This pioneering book is at the point of contact between these two disciplines presenting detailed studies from many societies of the interaction between social and economic relationships The studies in this volume all by social anthropologists focus on the formation and management of capital since this process is central to the economic functioning and growth of all societies With this central theme the essays cover a very wide geographic range and an equally wide range of social and economic structures The book begins with an essay by Firth who provides an extended outline discussion of the main problems and issues to be covered and ends with an essay by Yamey who provides summarizing comments and queries The volume will be especially useful to those concerned with the problems and prospects of economic and social change in underdeveloped areas in addition to economists and anthropologists concerned with what each can learn from the other

Maya Society under Colonial Rule Nancy Marguerite Farriss, 2021-08-10 This book traces the history of the Maya Indians of Yucatan Mexico during a four hundred year period from late preconquest times through the end of Spanish rule in 1821 Nancy Farriss combines the tools of the historian and the anthropologist to reconstruct colonial Maya society and culture as a web of interlocking systems from ecology and modes of subsistence through the corporate family and the community to the realm of the sacred She shows how the Maya adapted to Spanish domination changing in ways that embodied Maya principles as they applied their traditional collective strategies for survival to the new challenges they faced better under colonial rule than the Aztecs or Incas who lived in areas more economically attractive to the conquering Spaniards The author draws on archives and private collections in Seville Mexico City and Yucatan on linguistic evidence from native language documents and on archaeological and ethnographic data from sources that include her own fieldwork Her innovative book illuminates not only Maya history and culture but also the nature and functioning of premodern agrarian societies in general and their processes of sociocultural change especially under colonial rule

Humane Development John H. Hamer, 2010-01-04 Hamer has produced a very well written ethnographic analysis of development and change among the Sadama a Cushitic speaking people living along the Rift Valley The analysis attempts to show how traditional modes of decision making and living adapt to or are adapted to impinging forces of modernization a Hamer s emphasis on humane development is highly appropriate and his analysis is very successful a The focus on inevitable and constant change and the continuing evolution of the society makes this study a particularly useful one because the lessons of the Sadama can be generalized far beyond the boundaries of East Africa a The Sadama s particularistic history is of course unique to this group but the patterns of adaption are far more broadly applicable

OCOAcademic Library Book Review

Peasant Cooperation and Capitalist Expansion in Central Peru Norman Long, Bryan R. Roberts, 2014-11-06 This book brings together the research into regional development and social change

carried out in highland Peru by a team of British and Latin American social anthropologists and sociologists. The area studied, the Mantaro Valley of central Peru, is one of the most densely populated and economically differentiated of highland zones. It is also notable for its community-based forms of cooperation and its high level of peasant political activity. The book presents a series of case studies that examine cooperative forms of organization in relation to developments in the regional economy and to changes in national policy. The analysis attempts to avoid interpreting local processes merely as responses to externally initiated change. It stresses instead the need to consider the interplay of local and national forces because local groups and processes themselves affect the pattern of regional and national development. The case studies cover a range of political and economic topics from peasant movements to the achievements and shortcomings of government-sponsored agricultural and manufacturing cooperatives. The concluding chapter by the editors explores the theoretical implications of these studies.

A History of Anthropology as a Holistic Science Glynn Custred, 2016-04-27

A History of Anthropology as a Holistic Science defends the holistic scientific approach by examining its history, which is in part a story of adventure and its sound philosophical foundation. It shows that activism and the holistic scientific approach need not compete with one another. This book discusses how anthropology developed in the nineteenth century during what has been called the Second Scientific Revolution. It emerged in the United States in its holistic four-field form from the confluence of four lines of inquiry: the British, the French, the German, and the American. As the discipline grew and became more specialized, a tendency of divergence set in that weakened its holistic appeal. Beginning in the 1960s, a new movement arose within the discipline which called for abandoning science as anthropology's mission in order to convert it into an instrument of social change, a redefinition which weakens its effectiveness as a way of understanding humankind and which threatens to discredit the discipline.
