

Vaccines

Objectives:

- To define 'vaccine'
- To explain how a vaccine works
- To describe how a vaccine is developed
- To discuss how vaccines can help you and your community

Curriculum Links:

- *PSHE (from PSHE Association) - KS2: H10. How medicines, when used responsibly, contribute to health; that some diseases can be prevented by vaccinations and immunisations; how allergies to vaccines can be managed*

Key Vocabulary:

- Antibody
- Pathogen
- Immune system
- Vaccine
- Disease

Resources:

- PowerPoint
- Battleship grids and microbe images
- Scissors
- Glue

FAQs:

Can everyone have a vaccine?

Most vaccines are suitable for everyone. Some vaccines may not be suitable for use with children or people who have a health condition or treatment that impairs the function of their immune system. If an individual is poorly or has a fever, then their vaccination may be postponed until they are better.

What is a booster vaccine and why do we need it?

For some vaccines a further round of exposure to the vaccine is required to increase (or 'boost') immunity against the disease. Immunity against some diseases can fade over time and it is important to keep up to date with booster vaccines to ensure as good protection as possible.

One example of routine childhood vaccinations is MMR vaccine. The first dose is given at the age of **12 months** and the second dose is given at around three years and four months, before starting school. Having both doses gives long lasting protection against measles, mumps and rubella.

How long does it take to develop a vaccine?

Normally it can take around 10 years or more for a vaccine to be developed. In the case of COVID-19 this has been much quicker as scientists from around the world had made major advances in vaccine development over recent years and shared information based on existing research into other Coronaviruses. Extra funding was also made available and vaccine manufacture began at the same time that the vaccine was being tested in people – called the 'trial phase'.

Pediatric Vaccines Lesson Plan

**Carol D. Berkowitz, Leslie L.
Barton, Jane Carver, Edward M.
Barksdale Jr., Surendra Varma**

Pediatric Vaccines Lesson Plan:

Priorities for the National Vaccine Plan Institute of Medicine, Board on Population Health and Public Health Practice, Committee on Review of Priorities in the National Vaccine Plan, 2010-05-17 Vaccination is a fundamental component of preventive medicine and public health The use of vaccines to prevent infectious diseases has resulted in dramatic decreases in disease disability and death in the United States and around the world The current political economic and social environment presents both opportunities for and challenges to strengthening the U S system for developing manufacturing regulating distributing funding and administering safe and effective vaccines for all people Priorities for the National Vaccine Plan examines the extraordinarily complex vaccine enterprise from research and development of new vaccines to financing and reimbursement of immunization services Priorities for the National Vaccine Plan examines the extraordinarily complex vaccine enterprise from research and development of new vaccines to financing and reimbursement of immunization services The book makes recommendations about priority actions in the update to the National Vaccine Plan that are intended to achieve the objectives of disease prevention and enhancement of vaccine safety It is centered on the plan's five goals in the areas of vaccine development safety communication supply and use and global health *Pandemic Planning in Pediatrics, An Issue of Pediatric Clinics of North America, E-Book* Steven E. enhancement of the well being of our world Plotkin's Vaccines is a must have reference for current authoritative information in this fast moving field Contains all new chapters on COVID 19 vaccine hesitancy and non specific effects of vaccines as well as significantly revised content on new vaccine technologies such as mRNA vaccines emerging vaccines and technologies to improve immunization Presents exciting new data on evolution of adjuvants across the centuries dengue vaccines human papillomavirus vaccines respiratory syncytial virus vaccines tuberculosis vaccines and zoster vaccines Provides up to date authoritative information on vaccine production available preparations efficacy and safety and recommendations for vaccine use with rationales and data on the impact of vaccination programs on morbidity and mortality Provides complete coverage of each disease including clinical characteristics microbiology pathogenesis diagnosis and treatment as well as epidemiology and public health and regulatory issues Keeps you up to date with information on each vaccine including its stability immunogenicity efficacy duration of immunity adverse events indications contraindications precautions administration with other vaccines and disease control strategies Covers vaccine preventable diseases vaccine science and licensed vaccine products as well as product technologies and global regulatory and public health issues Analyzes the cost benefit and cost effectiveness of different vaccine options Helps you clearly visualize concepts and objective data through an abundance of tables and figures Enhanced eBook version included with purchase Your enhanced eBook allows you to access all of the text figures and references from the book on a variety of devices *Instructor Curriculum Guide for the Medical Assistant* Mary E Kinn, CPS Cma-A, Kinn, Woods, 1999-05 **Pediatric Nursing** Kathryn Rudd, Diane Kocisko, 2013-10-10 All of the field's must have information is delivered in an easy to grasp visually clear and precise design **Pediatric Nursing Care: A Concept-Based Approach** Linnard-Palmer, 2017-08-25 P Pediatric Nursing Care A Concept Based Approach teaches undergraduate nursing students the need to know information for working in a pediatric nursing environment Pediatric Nursing Care: A Concept-Based Approach with Navigate Advantage Access Luanne Linnard-Palmer, 2022-12-13 Pediatric Nursing Care A Concept Based Approach Second Edition provides pre licensed nursing students the need to know information for working as a pediatric nurse in a variety of settings The concept based perspective information on pathologies and diagnoses unique to children and focus on family centered care set it apart from other pediatric nursing textbooks The Second Edition was updated to offer the latest information on family education current research safety and pharmacology Chapters unique to this text include those focusing on symptoms assessment and management for children working and communicating in interdisciplinary teams caring for children across healthcare settings cultural care models essential safety models and pediatric specific skills Pediatric Nursing Care A Concept Based Approach Second Edition is a helpful guide and reference for attaining a deeper understanding of the unique aspects of pediatric nursing **Practical Lessons** National Symposium on Homelessness Research, United States. Department of Housing and Urban Development, 1999 *Advances in Pediatrics 2017* Carol D. Berkowitz, Leslie L. Barton, Jane Carver, Edward M. Barksdale

Jr., Surendra Varma, 2017-07-15 *Advances in Pediatrics* reviews the most current practices in pediatrics. A distinguished editorial board led by Dr Carol Berkowitz identifies key areas of major progress and controversy and invites expert pediatricians to contribute original articles devoted to these topics. These insightful overviews bring concepts to a clinical level and explore their everyday impact on patient care. Topics such as fetal diagnosis and surgical intervention updates in pharmacology and fatty liver disease are represented highlighting the most current and relevant information in the field.

Protecting the World's Children Sidsel Roalkvam, Desmond McNeill, Stuart Blume, 2013-05-09 Written by an international interdisciplinary team of experts in immunisation policy. *Protecting the World's Children* is an integrative study of immunisation policy and practice at a global, national and community level. **Pediatric Infectious Diseases Revisited** Stefan Wirth, 2007-08-08 The fifth volume of *Birkhäuser Advances in Infectious Diseases* is focused on pediatric infectious diseases. In modern medicine the discipline pediatric infectious diseases is an important medical specialty. The successful prevention of childhood diseases like diphtheria, tetanus and pertussis has made a major contribution to the improvement of public health. Understanding the biology of causative agents and the pathogenesis is an essential step in achieving control and elimination of disease. Today pediatric infectious diseases research is closely interconnected with other disciplines. This volume addresses vaccination, historical, epidemiological and socio-cultural issues as well as clinical and molecular biological aspects of pediatric infectious diseases. New insights into the pathogenesis of infection are presented and an update on diagnostics, prevention and treatment of pediatric bacterial, viral, fungal and parasitic diseases is provided. The role of emerging new pathogens is also pointed out. Finally the future perspectives of pediatric infectious diseases are highlighted. Therefore this book aims at an interdisciplinary audience of clinicians and non-clinicians, pediatricians, infectious disease researchers, virologists, microbiologists as well as public health scientists and politicians. We would like to sincerely thank the staff of Birkhäuser publishers and notably Dr Beatrice Menz for editing this volume of the *Advances in Infectious Diseases* series. Most of all we would like to thank all our colleagues who are international experts and scientists in their respective field and who generously shared their knowledge in the broad interdisciplinary area of pediatric infectious diseases with us.

Pharmacoepidemiology Brian L. Strom, Stephen E. Kimmel, Sean Hennessy, 2012-03-05 Now in its fifth edition *Pharmacoepidemiology* defines the discipline and provides the most comprehensive guidance of any book on the topic. Written by world renowned experts in the field, this valuable text surveys the research designs and sources of data available for pharmacoepidemiologic research and provides descriptions of various automated data systems along with the advantages and disadvantages of each. Incorporating perspectives from academia, industry and regulatory agencies, this book provides detailed insights into all aspects of pharmacoepidemiology. **Cumulated Index Medicus**, 1996 **Epidemiologic Studies for Vaccine Development** T. O. Anderson, 1967 **Building capacity for sickle cell disease research and healthcare** Victoria Nembaware, Obiageli Eunice Nnodu, Raphael Zozimus Sangedu, Vivian Paintsil, Gaston Kuzamunu
