Pediatric Case Studies for the Paramedic

Stephen J. Rahm, 2006 Children are not simply adults. They commonly present with unique problems that are typically not encountered in older patients. These unique problems require the paramedic to alter to some degree his or her approach to the sick or injured child. Because a relatively small percentage of EMS calls involve a critically ill or injured child, it is common for the paramedic to experience anxiety when such a call is received. *Pediatric Case Studies for the Paramedic* contains 20 case studies representing a variety of pediatric emergencies that paramedics may encounter in the field.

Clinical Decision Making Bonita E. Broyles, 2006 Contains 40 pediatric case histories and questions based on real life client situations. Every case contains an introductory blueprint of variables that must be considered while evaluating that particular scenario, which are pertinent concerning the client, nursing protocol, and setting of care. Examples of these variables include the client's age, gender, or culture; the client with a pre-existing condition; legal issues; or communication skills.

Case Studies in Pediatric Dysphagia Jennifer J. Wilson, 2023-03-10 Through clinical cases and interviews with working professionals, *Case Studies in Pediatric Dysphagia* takes an original approach to understanding pediatric dysphagia. This text, designed to address the increased need for clinical education, covers topics such as differential diagnosis, medical terminology, and goal setting. Written with group interaction and collaboration in mind, the book provides role play scenarios, suggestions on how to delve deeper into the case studies, integrating interprofessional practice, and evidence-based treatment approaches. Each chapter includes a case study and a detailed interview with a pediatric dysphagia professional, providing a complete and thorough view of the topic in a reflective and practical way. Key Features: Provides increased opportunities for students and young professionals to gain experience with complex clients before engaging in intervention. Gives guidance for integrating interprofessional practice as it relates to pediatric dysphagia. Written to prompt the reader to shift toward implementation science, merging research and clinical practice to better serve patients with pediatric dysphagia. Informative interviews with specialists working and conducting research in the field. Offers additional resources at the end of each chapter for the reader to continue their learning on specific case areas of focus. Provides a deeper understanding of cultural considerations and how to incorporate them into practice patterns. Allows students and professionals to integrate both diagnosis and treatment choices and explores current evidence-based approaches to treatment. Both speech language pathologists and clinical educators will benefit from having this valuable resource on their bookshelves.

Case Studies in Pediatric Emergency and Critical Care Ultrasound David J. McLario, John L. Kendall, 2013-10-10 Clinician performed bedside ultrasound is an exciting new development in medicine. Numerous diagnostic and procedural applications show great promise for improving the care of children. Many pediatric providers, however, remain unaware of its potential, and ultrasound continues to be underutilized in both the investigation and management of ill and injured children. *Case Studies in Pediatric Emergency and Critical Care Ultrasound* illustrates the utility of bedside ultrasound in a variety of scenarios, including the

emergency setting and critical care unit A wide range of diagnostic and procedural applications are covered in fifty nine cases recreating real life experiences of expert practitioners The cases are concise and readable with teaching points that highlight how ultrasound can be used to expedite and focus pediatric care With hundreds of high quality images and video content accompanying many cases this text is essential reading for pediatricians emergency physicians pediatric anesthesiologists and critical care physicians
