This diagram illustrates the internal injuries of a person involved in a car crash. On the left, a translucent blue figure shows the skeletal and internal organ systems. Red highlights indicate areas of injury: the head, neck, chest, and lower back. On the right, a more detailed anatomical model shows the muscles and skin of a person in a car seat, with their head tilted back. This model is also highlighted with red areas on the head, neck, and back, corresponding to the injuries shown in the translucent figure. Four callout boxes with lines pointing to these areas provide descriptions of the injuries.

**Whiplash injuries**, and damage to the neck from seemingly little impact.

**Back injuries**, herniated disks, and especially damage to the lumbar spine.

**Broken bones and fractures** all over the body, depending on the circumstances of the crash.
