**With proper training to more energy and health** Gerhard J. Mandalka,2024-04-02 This book is about effective training The author explains how the body works and how to design a workout that supports personal goals It also provides information on metabolism weight loss muscle building and orthopaedic problems The book offers a well founded and understandable explanation of how the body works and how to design an effective workout The author emphasizes that effectiveness is not to be equated with fast hard or long training but rather with a conscious training that supports one s own goals The author also refutes some common myths spread on social media such as the idea that a certain exercise can help you lose fat build muscle become more agile and reduce stress He clarifies that muscle and fat build up always take place in the body at the same time and that endurance training should take place under good oxygen coverage in order to increase endurance and have more energy What is particularly positive is that the author proposes a clear order for the structure of different aspects in the body He compares this to building a house and stresses that while it is possible to start with the roof or the garden it is more meaningful and effective to start with the foundation The book also provides information on metabolism weight loss muscle building and orthopaedic problems The author explains these topics in an understandable way and gives concrete tips and advice Overall the book is a valuable resource for anyone who wants to make their training more effective It provides sound information clear explanations and practical advice I recommend it to anyone who is interested in effective training The book provides a comprehensive guide

for effective training based on sound information about the body and its functioning It refutes common myths and offers concrete tips and advice      *Psychology of Motorsport Success* Paul Castle,2008 Motorsport is a highly addictive and extremely exciting activity whether this is from the perspective of competitor or spectator At the highest levels financial backing is phenomenal technical expertise is almost beyond comprehension and pressure to succeed is immense However there is one potential weak link in the chain the human mind Race teams invest heavily in research and development in order to obtain the edge over competitors They endeavour to recruit the most suitable drivers or riders based on experience previous results and potential Awareness of the importance of physical fitness is increasing within motorsport Very few competitors are schooled in the use of psychology to develop the mental strength required to be the best of the best Younger competitors would undoubtedly benefit from elements of Psychological Skills Training while they are learning race craft This applied text aims to provide a psychological skills training package that should with practice improve a competitor s mental approach in preparing for competition The information contained here is accessible to the competitor in motorsport practitioner or student Consequently the text is organized into four distinct yet complementary sections and is written in such a way that the reader will be able to pick up the book at any chapter and make progress depending on his or her needs at the time      **Optimum Performance Training for the Health and Fitness Professional** Micheal A.
