Conventions, Treaties And Other Responses To Global Issues - Volume II Gabriela Maria Kutting,2009-08-25 Conventions Treaties and other Responses to Global Issues is a component of Encyclopedia of Institutional and Infrastructural Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias This theme Conventions Treaties and other Responses to Global Issues deals with the issue of international resource regimes These are formal responses by states to the threats posed by trans boundary pollution or the distribution of resources In the past thirty years the number of international environmental agreements has steadily risen to reach record numbers and these

agreements have secured a firm place in the hierarchy of international affairs There is a loose assumption that this is a good thing and that this rise has resulted in a commensurable improvement in environmental protection and resource allocation But is this actually the case In fact is there a positive correlation at all Or are there negative correlations What are the connections between environmental diplomacy and environmental protection and how can environmental protection be achieved These are just a few of the questions that will be addressed in this theme whilst at the same time giving an overview of the most important international resource regimes and the most influential international organizations having an environmental impact The theme takes the following shape the first section introduces issues of international environmental law and its history showing that international law can take many different forms Here we explain what policy tools states have in drafting responses to global environmental issues The second section deals with the most prominent international environmental agreements and gives a state of the art overview of existing regimes The third and last section of this theme introduces the key actors in the international arena besides states such as international organizations and civil society actors such as pressure groups These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs

Climate-Resilient Development Astrid Carrapatoso, Edith Kürzinger, 2013-10-01 The concept of resilience currently infuses policy debates and public discourse and is promoted as a normative concept in climate policy making by governments non governmental organizations and think tanks This book critically discusses climate resilient development in the context of current deficiencies of multilateral climate management strategies and processes It analyses innovative climate policy options at national inter regional and local levels from a mainly Southern perspective thus contributing to the topical debate on alternative climate governance and resilient development models Case studies from Africa Asia and Latin America give a ground level view of how ideas from resilience could be used to inform and guide more radical development and particularly how these ideas might help to rethink the notion of progress in the light of environmental social economic and cultural changes at multiple scales from local to global It integrates theory and practice with the aim of providing practical solutions to improve complement or where necessary reasonably bypass the UNFCCC process through a bottom up approach which can effectively tap unused climate resilient development potentials at the local national and regional levels This innovative book gives students and researchers in environmental and development studies as well as policy makers and practitioners a valuable analysis of climate change mitigation and adaptation options in the absence of effective multilateral provisions

Exporting Paradise? EU Development Policy towards Africa since the End of the Cold War Tiago Faia, 2012-11-30 The central aim of this book is to define the approach of EU development policy regarding Africa since the end of the Cold War It focuses on the impact of EU development policy on the domain of international development and the objective of the EU to become a prominent international actor The book relies on Martha Finnemore's Social Constructivist research It

concentrates on the dynamics maintained by the EU with the normative basis that characterises the structure and agents of international development and assesses how it affected EU behaviour as expressed through its development policy concerning Africa. By doing so it exposes both the marked effect of EU development policy in the domain of international development and the form of paradise model of development the EU promoted in Africa. Therein the volume largely confirms the identified agents as the source of the norms that define the structure of international development and the EU as its derivative. It argues that EU development policy is currently a general projection of the normative structure of international development specifically regarding the policy orientation of its identified agents. As a result the book contends that the EU fell short of its efforts to export its form of paradise to Africa since the end of the Cold War as a corollary of its limitations to stand as a distinct and leading actor in the domain of international development. **Amaranth to Zai Holes** Laura S.

Congress. House. Committee on Education and Labor, 1967 **The Right to Development and International Economic Law** Isabella D Bunn, 2012-03-01 The United Nations is commemorating the 25th anniversary of the 1986 Declaration on the Right to Development which proclaimed the right to be an inalienable human right by virtue of which every human person and all peoples are entitled to participate in contribute to and enjoy economic social cultural and political development in which all human rights and fundamental freedoms can be realized. The UN now aims to mainstream the right into its policies and operational activities and is reviewing prospects for an internationally binding legal instrument. The evolution of the right to development however has been dominated by debates about its conceptual validity and practical ramifications. It has been hailed as the cornerstone of the entire human rights system and criticized as a distracting ideological initiative. Questions also persist about the role of the right in reforming the international economic order. This book examines the legal and moral foundations of the right to development addressing the major issues. It then considers the right to development in the global

economy noting the challenges of globalization and identifying key principles such as differential treatment of developing countries participation and accountability It relates the right to broad objectives such as the Millennium Development Goals the human rights based approach to development and environmental sustainability Implications for international economic law and policy in the areas of trade development finance and corporate responsibility are assessed The conclusion looks to the legal and ethical contributions and limitations of the right to development in this new context With an academic and professional background in international law human rights and moral theology the author brings a unique interdisciplinary focus to this timely project **Oversight Hearings on Comprehensive Employment and Training Act** United States.
