**General Technical Report NE** ,1980      Terms for Endearment Jem Bendell, 2017-09-08 Business and NGOs are seen by many to be locked in a perpetual war of values and ideologies What this book demonstrates is that the war has moved on Many companies are now engaging with their stakeholders even those with which they have traditionally had antagonistic relationships as part of their strategies for improved social and environmental performance With contributions from an outstanding and diverse group of experts from business consultancy research institutes NGOs and academia Terms for Endearment investigates the how and why of these new collaborations and provides concrete examples of business working with stakeholder pressure for sustainable development The book forcibly argues the notion of organizations of civil society setting the standards for business behaviour in the 21st century For those companies that choose not to pursue high

standards of social and environmental performance confrontation with NGOs must be expected with negative consequences for sales costs and social capital i e the bottom line Terms for Endearment therefore presents business with both a threat and opportunity as we move closer to establishing a social basis for global economic activity **Corporate Social Capital and Liability** Roger Th.A.J. Leenders,Shaul M. Gabbay,2013-03-09 In studies of inter organizational relations IOR s there is a tendency to look at dyads of flrms and to consider networks as aggregates of such dyads But there are several roles for a third party a go between This chapter looks at a go between not in the sense of a middleman who intermediates in existing production or trade such as an agent wholesaler retailer and not in the sense of an entrepreneur who intermediates in the realization of new potential in connecting supply and demand It looks at a go between in the sense of a relationship counsellor for the development and maintenance of social capital providing support in setting up adapting and ending cooperative relations between others Or in yet different terms to help in the embedding of relati ons in Granovetter s 1985 sense Uzzi 1997a Such roles may be performed by middlemen or entrepreneurs but also by specialized agents who do not play a direct role in linking stages in a chain of production and distribution as middlemen and entrepreneurs typically do Indeed some of the roles require an independence that is served by not having a direct stake in the relations that need to be developed I propose that the analysis yields a perspective for looking at the roles of trade and industry associations in European business systems and of banks and trading houses in Japanese enterprise groups Kigyo Shudan
