Passages Beyond The Gate A Jungian Approach To Understanding American Psychology:

Passages Beyond the Gate George-Harold Jennings, 2010-08-04 In a clear and persuasive argument Jennings suggests that in order to move forward in understanding what it means to be a person American psychology must break through the barrier constructed by the big three mainstream approaches and embrace a promising fourth force which conceives of personality as entailing a transpersonal dimension Barbara Engler PhD author of *Personality Theories* 8th Edition

Passages Beyond the Gate George-Harold Jennings, 1996 Examining American psychology's development from a Jungian perspective Jennings argues that the discipline is at a point where a deeper and broader exploration of spirituality is essential in order to realize the goal of creating a complete psychology of human beings Having already developed an understanding of the person that rests upon the tenets of behavioral cognitive behavioral psychoanalytic humanistic and existential approaches many mainstream American psychologists now seem eager to embrace a growing viewpoint of the person grounded in biological psychology which draws the discipline closer to a materialistic understanding of human beings This direction in American psychology reinforces a strikingly unbalanced viewpoint of human nature that does little to reveal the fullness and purpose of human spirituality To address this deficiency Jennings encourages more American psychologists to integrate spiritual concepts readily explored in transpersonal psychology with respect to our more traditional psychological understanding of what it means to be human

Jeffreys,2010-06-21 Print CourseSmart *Individual and Contextual Factors in the English Language Classroom* Rahma Al-Mahrooqi,Christopher J. Denman,2022-03-22 This edited volume examines a number of topics related to the roles of individual and contextual factors in English as second or foreign language ESL EFL settings by presenting chapters across the three sections of theoretical and pedagogical approaches teacher and learner research and research into the roles of technology The book has a focus on practical actions and recommendations related to individual and contextual factors in ESL EFL with a specific concern with issues of cognition metacognition emotion and identity and offers perspectives from a diverse range of international education settings For teachers of ESL EFL the effective recognition and integration of individual and contextual factors into the classroom may represent a significant challenge This is often the case in those settings where native English speaking teachers work in foreign language contexts where they may have limited understanding of local cultures and languages or where language instructors have class groups that are culturally and linguistically diverse In these and similar contexts the types and extent of individual and

contextual factors impacting on language learning may challenge both learner and instructor expectations of what an effective and supportive classroom is. While such a situation offers numerous opportunities for learners and teachers to expand their knowledge of themselves and each other, it also presents the possibility for ineffective teaching and learning to occur. It is within this framework that the book presents the latest theoretical, pedagogical, and research perspectives from around the world, thereby providing a resource for all stakeholders with an interest in the roles individual and contextual factors play in the English learning process. *College Student Journal*, 2009 **Annual Review of Clinical Psychology**, 2007 **Really? You Don't Look Like an American Indian** Stephanie Ann Fryberg, 2002 **Motivation in Education** Desmond H. Elsworth, 2009. Understanding student and teacher motivation and developing strategies to foster motivation for students at all levels of performance are essential to effective teaching. Motivation in education can have several effects on how students learn and their behaviour towards subject matter. This book presents new research in the field.
