M. LeClair, 2014-10-23 The already vibrant charitable sector in the US is in the midst of a transformation that is altering both the manner in which donations occur and the causes that are supported *Philanthropy in Transition* examines the unique role that charitable giving has played in the US from colonial times to the present The rising importance of new means of contributing particularly giving through buying or investing is considered These new models of philanthropy have expanded the ways by which ethical consumers or investors can support a cause Although these innovations represent a revolution in the structure of philanthropy they introduce significant complexity to the act of giving donors are far removed from recipients and this may weaken the impact of contributing This transformation is also likely to accelerate the rising importance of web based promotion and fund raising as traditional nonprofits compete with social market enterprises and social impact investments for funds *The Status of Religion and the Public Benefit in Charity Law* Barry W.

Bussey, 2020-02-29 *The Status of Religion and the Public Benefit in Charity Law* is an apologetic for maintaining the presumption of public benefit for the charitable category advancement of religion in democratic countries within the English common law tradition In response to growing academic and political pressure to reform charity law including recurring calls to remove tax exemptions granted to religious charities the scholars in this volume analyse the implications of legislative and legal developments in Canada the UK Australia New Zealand and South Africa In the process they also confront more fundamental sociological or philosophical questions on the very nature and role of religion in a secular society that would deny any space for religious communities outside their houses of worship In other words this book is concerned with the place of religion and religious institutions in contemporary society It represents a series of concerns about the proper role of the state in relation to the differing beliefs of citizens some of which will quite rightly manifest in actions to benefit the wider society This debate then naturally engages with broader issues related to secularism civic engagement and liberal democratic freedoms *Performing Religion in Public* J. Edelman, C. Chambers, S. du Toit, Simon du Toit, 2013-10-10

Religious life and public life are both passionately performed but often understood to exclude one another This book's array of voices investigates the publics hailed by religious performances and the challenges they offer to theories of the democratic public sphere *Facilitating Higher Education Growth through Fundraising and Philanthropy* Alphin Jr., Henry C., Lavine, Jennie, Stark, Stormy, Hocker, Adam, 2015-12-02 Many institutions facing dwindling state and government funding often rely on the patronage of others in order to establish monetary security These donations assist in the overall success and development of the institution as well as the students who attend *Facilitating Higher Education Growth through Fundraising*

and Philanthropy explores current and emergent approaches in the financial development and sustainability of higher education institutions through altruistic actions and financial assistance Featuring global perspectives on the economics of philanthropy in educational settings and subsequent growth and development within these environments this book is an exhaustive reference source for professors researchers educational administrators and politicians interested in the effects of altruism on colleges and universities

The Science of Giving Daniel M. Oppenheimer, Christopher Y. Olivola, 2011-01-19 Americans donate over 300 billion dollars a year to charity but the psychological factors that govern whether to give and how much to give are still not well understood Our understanding of charitable giving is based primarily upon the intuitions of fundraisers or correlational data which cannot establish causal relationships By contrast the chapters in this book study charity using experimental methods in which the variables of interest are experimentally manipulated As a result it becomes possible to identify the causal factors that underlie giving and to design effective intervention programs that can help increase the likelihood and amount that people contribute to a cause For charitable organizations this book examines the efficacy of fundraising strategies commonly used by nonprofits and makes concrete recommendations about how to make capital campaigns more efficient and effective Moreover a number of novel factors that influence giving are identified and explored opening the door to exciting new avenues in fundraising For researchers this book breaks novel theoretical ground in our understanding of how charitable decisions are made While the chapters focus on applications to charity the emotional social and cognitive mechanisms explored herein all have more general implications for the study of psychology and behavioral economics This book highlights some of the most intriguing surprising and enlightening experimental studies on the topic of donation behavior opening up exciting pathways to cross cutting the divide between theory and practice
