Symposium on Free Surface Flows A.C. King, Y.D. Shikhmurzaev, 2012-12-06 Free surface flows arise in the natural world physical and biological sciences and in some areas of modern technology and engineering Examples include the breaking of sea waves on a harbour wall the transport of sloshing fluids in partly filled containers and the design of micronozzles for high speed ink jet printing Apart from the intrinsic mathematical challenge in describing and solving the governing equations there are usually important environmental safety and engineering features which need to be analysed and controlled A rich variety of techniques has been developed over the past two decades to facilitate this analysis singular perturbations dynamical systems and the development of sophisticated numerical codes The extreme and sometimes violent nature of some free surface flows taxes these methods to the limit The work presented at the symposium addressed these limits and can be loosely classified into four areas i Axisymmetric free surface flows There are a variety of problems in the printing glass fertiliser and fine chemical industries in which threads of fluid are made and controlled Presentations were made in the areas of pinch off for inviscid and viscous threads of fluid recoil effects after droplet formation and the control of instability by forced vibration ii Dynamic wetting The motion of three phase contact lines which are formed at the junction between two fluids and a solid plays an important role in fluid mechanics **Popular Photography**, 2006-11 [Federal Register](#)

Microtime: Selected Writings On Flash Photolysis, Free Radicals, And The Excited State George Porter, 1997-04-01

This volume contains a selection of the pioneering papers by Nobel Laureate George Porter. It outlines his work on fast reactions occurring in times from milliseconds to femtoseconds in photochemistry, photosynthesis and solar energy and includes the papers which led to the award of the Nobel Prize in Chemistry in 1967 for his work on flash photolysis. Lord Porter, President of the Royal Society from 1985 to 1990, is Chairman of the Centre for Photomolecular Sciences, Imperial College and Emeritus Professor of Chemistry of the Royal Institution of Great Britain. This book is divided into 11 chapters, each covering an area of Lord Porter's work. Each chapter will contain an introduction by Lord Porter, a selection of his most important papers in that field and a list of his other relevant papers.

Efficient Information Searching on the Web

Jonas Fransson, 2010-05 Information searching on the Web has become part of our everyday life. Efficient Information Searching on the Web deals with different aspects which are important to become a better searcher. To search for information is one of the most common occupations on the Web. We do it for work, for studies and in our spare time. We search for information about illnesses, far away countries or spare parts for the car. The Web is an important source of information, no matter if you are a journalist, a student, a university researcher or a teacher. Everybody can become more effective when it comes to searching for information. Central matters of the book are: How does a search engine work? How may the search services be used more efficiently? What is the invisible Web? How can the information be managed once it is found?

Digital Photography for Next to Nothing John Lewell, 2011-08-26 Take photos like a pro without breaking the bank by using FREE and nearly FREE software and hardware explained in this book. Learn how to use older lenses on modern digital cameras and make your own macro lens, lens hoods, flash diffusers, flash concentrators, decorative Bokeh effect lenses and more. Use dozens of FREE and low cost photo applications for processing, viewing, cataloguing, editing, creating HDR and photo stitching. Build powerful photography processing and editing suites with free software and plugins that go head to head with expensive tools like Adobe Photoshop and Lightroom.

Graphic Design

Valerie Colston, 2019-01-29 Librarians have always been responsible for creating graphic designs, but in the digital age the need for visual communication skills has multiplied significantly. The quantity of graphic design tasks has increased, so has the demand and expectation of the quality of the products that are produced. *Graphic Design: A Practical Guide for Librarians* gives librarians the help they need. Written by an artist and graphic design instructor, the book has the tools and information librarians want and need to know to make their job easier and to give them confidence in creating professional looking designs. Valerie Colston makes graphic design easy to understand and fun to learn. The book outlines what you need to know as a librarian designer in a simple way and provides an abundance of resources and examples of good design models. This book addresses the lack of training that many librarians feel and strives to empower them with confidence and practical skills. Librarians will learn the language of design, discover resources and where to find them, explore line, color, shape, texture.
