## **Mother Nature Maternal Instincts And How They Shape The Human Species:**

Mother Nature Sarah Blaffer Hrdy, 1999 We are tempted to think of maternal instinct as a quality a woman has or lacks But the belief that mothers instinctively nurture their offspring one of the West's most cherished ideals and a view widely accepted even in scientific circles has become increasingly controversial Mother Nature presents a radical new way of understanding how mothers act and why and how this new understanding is changing the way scientists think about how evolution works Drawing on anthropology history literature developmental psychology and animal behavior Sarah Hrdy examines the distinct biological and genetic elements that constitute maternal instinct She strips away the biases implicit in conventional stereotypes of female nature to give us very different and provocative perspectives on maternal ambivalence the links between maturity and ambition mother love and sexual love and why age old tensions between the sexes persist and are being played out today in efforts to control women's reproductive choices Combining decades of research with her own experience as a mother Hrdy makes clear in this remarkable book what it means from a historical and evolutionary perspective to be a mother and explains how this knowledge has transformed our understanding of human development and behavior *Mother Nature* Sarah Blaffer Hrdy, 2000 **Women's Reproductive Mental Health Across the Lifespan**

in risk reduction and early clinical intervention is bringing reproductive issues to the forefront of women's mental health. The scope of Women's Reproductive Mental Health across the Lifespan begins long before the childbearing years and continues well after those years have ended. Empirical findings, case examples, and dispatches from emerging areas of the field illuminate representative issues across the continuum of women's lives with the goal of more effective care benefitting women and their families. Chapter authors discuss advances in areas such as fertility treatment and contraception and present current thinking on the psychological impact of pregnancy loss, menopause, cancer, and other stressors. These expert contributors emphasize the connections between an individual's biology and psychology and cultural expectations in shaping women's mental health and the balance between a client's unique history and current clinical knowledge. Clinicians need to address disorders included in the coverage: The experience of puberty and emotional wellbeing, Body image issues and eating disorders in the childbearing years, Risk assessment and screening during pregnancy, Normal and pathological postpartum anxiety, Mood disorders and the transition to menopause, The evolution of reproductive psychiatry. A reference with an extended shelf life.
