Women in Late Life Martha Holstein, 2015-03-19 Contemporary old age is fraught with contradiction and complexity women portrayed either as incompetent and cuddly grandmothers or as young women trapped in old bodies images that rarely reflect how women actually see themselves *Women in Late Life* explores the thorny issues related to gender and aging including prevailing but problematic cultural expectations body image ageism the experience of chronic illness threats to Social Security and the very possibility of a secure retirement while challenging a long term care system that disadvantages women Author Martha Holstein writes from a critical feminist perspective drawing on her many years of experience in gerontology as well as interviews and personal experience as a woman now in her seventies The book highlights how women's experience of late life is shaped by the effects of lifelong gender norms by contemporary culture from gender stereotypes to ageism and by the political context The book blends critique with proposals aimed at resisting damaging inequities resulting from being simultaneously old and a woman She focuses on changes needed on multiple levels societal cultural political and individual This interdisciplinary look at key questions around gender and aging is nuanced and beautifully written

Aging: Caring for Our Elders David N.

Weisstub,David C. Thomasma,S. Gauthier,G.F. Tomossy,2013-06-29 Caring for Our Elders is the second of three volumes on Aging conceived for the International Library of Ethics Law and the New Medicine Leading scholars from a range of disciplines address some of the major issues in elder care facing modern nations familial duties of care the future of social welfare systems housing dementia abuse and neglect Re-Imagining Old Age: Wellbeing, care and participation Marian Barnes,Beatrice Gahagan,Lizzie Ward,2018-05-15 The understanding that humans are relational beings is central to the development of an ethical perspective that is built around the significance of care in all our lives Our survival as infants is dependent on the care we receive from others And for all of us in particular in older age there are times when illness emotional or physical frailty mean that we require the care of others to enable us to deal with everyday life With this in mind this book presents the findings of a project that seeks to understand what wellbeing means to older people and to influence the practice of those who work with older people Its starting point was a shared commitment amongst researchers and an NGO collaborator to the value of working with older people in both research and practice to learn from them and be influenced by them rather than seeing them as the subjects of a research project Theoretically the authors draw upon a range of studies in critical gerontology that seek to understand how experiences of ageing are shaped by their social economic cultural and political contexts By employing a broad body of work that challenges normative assumptions of successful ageing the authors draw attention to how these assumptions have been constructed through neo liberal policies of active ageing Notably they also apply insights from feminist ethics of care which are based on a relational ontology that challenges neo liberal assumptions of autonomous individualism Influenced by relational ethics they are attentive to older people both as co researchers and research respondents By successfully applying this perspective to social care practice they facilitate the need for practitioners to reflect on personal aspects of ageing and care but also to bridge the gap between the personal and the professional Communities of Kinship Carlo Calleja,2024-03-12 In Communities of Kinship Retrieving Christian Practices of Solidarity with Lepers as a Paradigm for Overcoming Exclusion of Older People Carlo Calleja describes kinship as a moral category arguing that practicing kinship with others can cultivate virtues that shape the character of the agent Contemporary Western society tends to focus on kinship as the sharing of blood ties or genetic material On the other hand the spiritual kinship that is proposed by religions tends to be exclusive and often nominal For this reason Calleja proposes practices and structures of solidaristic kinship which involves sharing in the suffering of the other person Finding parallels between the exclusion of lepers and the efforts of Christian communities to reforge kinship bonds with them in ancient and medieval times he argues that communities of kinship with older persons can help cultivate the virtues needed for the flourishing of oneself and society **Aging and Self-Realization** Hanne Laceulle,2018-11-08 Dominant cultural narratives about later life dismiss the value senior citizens hold for society In her cultural philosophical critique Hanne Laceulle outlines counter narratives that acknowledge both potentials and vulnerabilities of later life She draws on the rich

philosophical tradition of thought about self realization and explores the significance of ethical concepts essential to the process of growing old such as autonomy authenticity and virtue These counter narratives aim to support older individuals in their search for a meaningful age identity while they make society recognize its senior members as valued participants and moral agents of their own lives

Family-making Françoise Baylis,Carolyn McLeod,2014 This volume explores the ethics of making or expanding families through adoption or technologically assisted reproduction For many people these methods are separate and distinct they can choose either adoption or assisted reproduction But for others these options blend together For example in some jurisdictions the path of assisted reproduction for same sex couples is complicated by the need for the partner who is not genetically related to the resulting child to adopt this child if she wants to become the child s legal parent The essays in this volume critically examine moral choices to pursue adoption assisted reproduction or both and highlight the social norms that can distort decision making Among these norms are those that favour people having biologically related children bionormativity or that privilege a traditional understanding of family as a heterosexual unit with one or more children where both parents are the genetic biological legal and social parents of these children As a whole the book looks at how adoption and assisted reproduction are morally distinct from one another but also emphasizes how the two are morally similar Choosing one the other or both of these approaches to family making can be complex in some respects but ought to be simple in others provided that one s main goal is to become a parent
