UTILIZATION AND MAINTAINING THE SPIRIT OF MOTIVATIONAL INTERVIEWING IN SAGEPLUS LIFESTYLE INTERVENTIONS Joan Y. Grotewold, 2011 Utilizing a descriptive quantitative design to guide data collection and analysis 11 of the 14 clinics in the State of Minnesota that

participate in the SagePlus program were selected by the Minnesota Department of Health MDH to participate in this study. The population for this study was the 22 healthcare professionals who were providing the lifestyle interventions in those clinics. The purpose of this study was to determine if the SagePlus healthcare professionals who are providing lifestyle counseling interventions were using Motivational Interviewing MI with SagePlus clients and if the healthcare professionals were maintaining the spirit of MI throughout these interactions. The Behavior Change Counseling Index BECCI tool was utilized to assess the healthcare professional's competency in using MI techniques. While all of the healthcare professionals providing demographic information for the study reported that they used MI when providing lifestyle counseling, only one healthcare professional spoke for less than half of the time and only 50% of the participants had a score reflecting competency. This indicates that the healthcare professionals do not fully adhere to the principles of MI. MI is more about listening than telling about evoking rather than instilling and empowering the client to make the change. Rollnick, Miller, Butler 2007 p 3. The information gained from this study can be used to improve the effectiveness of MI based interventions to guide lifestyle behavior changes in the clients of the MDH's SagePlus program. In addition, study findings can be used to provide ongoing support, feedback, and continuing education necessary to promote effective Motivational Interviewing by the healthcare professionals who are providing SagePlus lifestyle counseling.

Lifestyle Medicine, Third Edition James M. Rippe, 2019-04-17. The field of lifestyle medicine, which is the study of how daily habits and actions impact on both short and long-term health and quality of life, continues to expand globally. The scientific and medical literature that supports the success of these lifestyle habits and actions is now overwhelming. Thousands of studies provide evidence that regular physical activity, maintenance of a healthy body weight, following sound nutritional practices, stress reduction, and other good practices all profoundly impact both health and quality of life. Following its predecessors, *Lifestyle Medicine Third Edition* is edited by lifestyle medicine pioneer cardiologist Dr. James Rippe. This edition has been thoroughly updated and represents the expert opinions of 20 section editors as well as more than 150 expert chapter authors whose knowledge spans all aspects of this emerging discipline. Topics cover lifestyle medicine practices including regular physical activity, proper nutrition, and weight management. These principles are applied to the prevention and/or treatment of a wide variety of chronic conditions ranging from heart disease and diabetes to cancer, mental health, addiction, and injury prevention. This book serves as an evidence base for individuals who wish to practice lifestyle medicine or incorporate some of its principles into either general medicine or subspecialty practice. It provides valuable information to healthcare workers in the fields of nutrition, exercise physiology, psychology, behavioral medicine, health promotion, and public policy, where lifestyle medicine principles play an ever-increasing role.
