**Motor Racing** Konemann,2001-04-01      THE EARLY YEARS OF THE 20th CENTURY Ruben Ygua,2025-04-08

**THE FAILURE OF THE BALANCE POWER THEORY** The French Revolution and the Napoleonic Wars had spread the concept of democracy throughout most of the European continent thus spreading the idea that populations sharing an ethnic origin a language and the same political ideals had the right to form independent states However the principle of national self determination was totally ignored by the dynastic and reactionary forces that decided the fate of European affairs at the Congress of Vienna in 1815 Many of the peoples who wanted their autonomy were subjected to local dynasties or other nations For example the German states integrated into the German Confederation were divided into numerous ducats principalities and kingdoms according to the terms of the Vienna Congress Italy was also divided into several political units some of which were under foreign control the Flemish and French Belgians of the Austrian Netherlands were subordinated to Dutch rule by decision of Congress The revolutions and strong nationalist movements of the 19th century succeeded in annulling much of the reactionary impositions agreed in Vienna Belgium gained independence from the Netherlands in 1830 the unification of Italy was completed in 1861 and that of Germany in 1871 However nationalist conflicts remained unresolved in other areas of Europe at the beginning of the 20th century causing tensions within the regions involved and between various European nations One of the most important nationalist currents Pan Slavism played a fundamental role in the events that preceded the war The nationalist spirit was also evident in the economic field The Industrial Revolution which began in Great Britain at the end of the 18th century in France at the beginning of the 19th century and in Germany from 1870 onwards led to a large increase in manufactured goods forcing these countries to seek new markets abroad The area in which the European policy of economic expansion was mainly developed was Africa where the respective colonial interests frequently came into conflict The economic rivalry over the dominance of African territory between France Germany and Great Britain was on the verge from 1898 to 1914 of provoking a war in Europe on several occasions As a result of international tensions European nations took both domestic and foreign policy measures between 1871 and 1914 that in turn increased the danger of conflict maintained numerous permanent armies which they constantly expanded through peacetime recruitments and built larger ships Great Britain influenced by the development of the German Navy which began in 1900 and by the course of the Russo Japanese War modernized its fleet under the direction of Admiral Sir John Fisher The war between Russia and Japan had demonstrated the effectiveness of long range naval armament Advances in other areas of military technology and organization stimulated the formation of staffs capable of drawing up very precise mobilization and attack plans often integrated into programs that could not be cancelled once initiated Leaders in all countries became aware that rising expenditures on armaments would eventually lead to national bankruptcies or war for this reason attempts were made to promote global disarmament on several occasions notably at the Hague Conferences of 1899 and 1907 However

international rivalry had reached such a point that no effective agreement could be reached to decide on international disarmament **Iona** Michael Traynor,2004-11 **A History of the First Ten Years of Automobilmism** John Walter Edward Douglas-Scott-Montagu baron Montagu,1906 *The Early Days of ESPN* Peter Fox,2024-06-04 The tales of early ESPN people who gambled their careers while critics carped that all sports television will never work are full of guile luck fear fun and unbridled optimism As ESPN s founding executive producer Peter Fox was privy to some spectacular professional efforts by a cadre of Connecticut locals who made the dream real The first 300 days of the fledgling network were filled with mayhem on air gaffes and the slowest instant replay in television What started as a humble idea in the late spring of 1978 to capitalize on the brand new mania for UConn men s basketball soon morphed into ESPN and a plan to begin airing a series of test broadcasts in the fall This is the story of the early days at ESPN told by one on the network s launching pad and how a conversation over a couple of martinis in 1978 led to the creation of a broadcast juggernaut

**Motor Boat** ,1910 Grand Prix Cars Denis Jenkinson,2015-10-02 In compiling this brief history of Grand Prix racing along with descriptions of the more successful cars I have limited myself to the period since World War II as the present day Grand Prix cars are mostly derived from the development and design of the early post war years Although many ideas were taking shape in the period of the mid thirties such as the use of De Dion rear axle layouts independent front suspension systems and hydraulic brakes the main interest lay in engine design under a free ruling on capacity It was not until about 1950 that a renaissance began in chassis design for Grand Prix cars and from then on a great deal of knowledge was gained enough in fact to enable roadholding to become a very exact science rather than a hit and miss affair This development in the chassis and the search for improved road holding and higher cornering power was accentuated by the beginning of the era of unsupercharged racing when power outputs were severely curtailed and speed had to be found by other means 1959 Denis Jenkinson *Illustrated Sporting & Dramatic News* ,1907 The Legend of the First Super Speedway Mark
