Getting Started

Weatherproof

This radio is weatherproof to IP-54 standards. It is dust/splashproof from any direction. The radio is resistant to water and rain splashes only when the battery cover and headset accessory mini-USB ports are sealed. The charging base and AC adaptor are not waterproof. Do not expose the charger to rain or snow. Charge the radio only in a dry location. Do not place wet radios into the charging base. The battery door must be tightly closed with the screw to maintain the weatherproof seal of the radio.

4. The battery icon will scroll as the battery is being charged. The scrolling icon will stop when the battery is fully charged.

Notes

- When moving between hot and cold temperatures, do not charge the NiMH battery pack until the battery temperature acclimates (usually about 20 minutes).
- For optimal battery life, remove the radio from the charger within 16 hours. Do not store the radio while connected to the charger.
- If the radio is kept on while charging, the charging time will be extended.
- Even though the charger is connected, you may not be able to transmit a message if the battery is completely empty . Allow time for the battery to charge to 1 bar before attempting to transmit a message.

MT350R Radio

After the initial charge, an empty battery (KEST-650 mAh NiMH) is fully charged within 7 hrs.
