Featherstone, Andy Northcott, 2020-11-16 Wandering the Wards provides a detailed and unflinching ethnographic examination of life within the contemporary hospital. It reveals the institutional and ward cultures that inform the organisation and delivery of everyday care for one of the largest populations within them: people living with dementia who require urgent unscheduled hospital care. Drawing on five years of research embedded in acute wards in the UK, the authors follow people living with dementia through their admission, shadowing hospital staff as they interact with them during and across shifts. In a major contribution to the tradition of hospital ethnography, this book provides a valuable analysis of the organisation and delivery of routine care and everyday interactions at the bedside which reveal the powerful continuities and durability of ward cultures of care and their impacts on people living with dementia. Shortlisted for the Foundation for the Sociology of Health and Illness Book Prize 2021 **Ethics, Law, and Aging Review, Volume 7** Marshall B.

Kapp, 2001-09-24 Health care and human service professionals often experience anxiety about potential adverse legal repercussions for actions taken or not taken in the course of caring for patients or clients. In this volume, professionally distinguished and diverse authors discuss both the real and perceived legal liability context within which health and human service delivery to older persons takes place. The benefits and costs of litigious legislative and regulatory interventions on the quality of care and the quality of life for recipients of geriatric services is evaluated. Most important chapters present suggestions for ways to effectively reduce or manage legal risks and anxieties while improving patient care. This volume fills a gap in the literature by providing careful and accurate analysis of legal issues rarely translated into practical and useful advice for health care and human service professionals **EBOOK: Working With Older People And Their Families**

Mike Nolan, Nolan Davies, Gordon Grant, 2001-02-16 Addressing the needs of older people and their carers is an essential element of both policy and practice in the fields of health and social care. Recent developments promote a partnership and empowerment model in which the notion of person-centred care figures prominently. However, what person-centred care means and how it can be achieved is far from clear. Working with Older People and their Families combines extensive reviews of specialist literatures with new empirical data in an attempt at a synthesis of themes about making a reality of person-centred care. Uniquely, it seeks to unite the perspectives of older people, family and professional carers in promoting a genuinely holistic approach to the challenges of an ageing society. Working with Older People and their Families is recommended reading for students on health-related courses such as nursing, medicine and the therapies. It is also of relevance to students of social work and social gerontology, researchers, managers and policy makers **Foundations of Nursing - E-Book** Barbara Lauritsen Christensen, Elaine Oden Kockrow, 2013-12-27 Part of the popular LPN Threads series, this comprehensive text prepares you for safe and effective nursing practice in today's fast-paced healthcare environment.
