The ease of reading the 16 chapters cannot be overemphasized. This notable book will amplify essential knowing for the newest to enter our profession. Quite simply, this little gem delivers. Linda Honan PhD CNS BC FAAN ANEF Professor Emerita Yale University School of Nursing. Critical thinking can be the difference between keeping patients safe and putting them in harm's way. But as a student nurse, you may find that mastering these skills is challenging and you may lack confidence in assessing a patient's health. Case studies are a common beneficial learning approach. Traditionally, they present information upfront with the patient's status predetermined. But that isn't realistic as a patient's health can often take an unexpected turn. Unfolding case studies provide new information over time, teaching you to think critically and apply what you've learned in nursing school to real-life situations you'll face on the job. Authors Kristi Maynard and Andrea Adimando created *Unfolding Health Assessment Case Studies for the Student Nurse* for pre-licensure students who need to review what they've learned earlier and practicing nurses who can apply these concepts to more complex scenarios. This book will enhance students' knowledge and skills in basic health assessment, increase readers' comfort level in analyzing patient scenarios, provide opportunities to practice and apply what students learned in health assessment courses, and develop confidence in answering NCLEX questions.
