Nursing Informatics Scope Standards Of Practice American Nurses Association:

Nursing Informatics Ana, 2014-05-14 Delineates the competent levels of nursing care and professional role activities expected of all informatics nurses. Its scope of practice gives the context, the underlying assumptions, characteristics, environments, and settings, education and training requirements, key issues and trends, and ethical and conceptual bases of the specialty needed to understand and use the informatics nursing standards of practice. All informatics nurses are held accountable to these standards which provide a framework for evaluating outcomes, goals, and their specialty practice. The set of specific competencies accompanying each standard serves as evidence of minimal compliance with that standard.

Nursing Informatics American Nurses Association, 2015 The second edition of *Nursing Informatics Scope and Standards of Practice* is the most comprehensive up-to-date resource available in this subject area. The book covers the full scope of nursing informatics and outlines the competency level of nursing practice and professional performance expected from all informatics nurses and nurse specialists. In addition, it details the nursing informatics competencies needed by any RN, spans all nursing careers and roles, and reflects the impact of informatics in any health care practice environment. This is a must-read for nurses as informatics touches

Scope and Standards of Nursing Informatics Practice American Nurses Association, 2001 *Scope and Standards of Nursing Informatics Practice* can be used as a primary resource in several ways.
