Aligning the NWEA RIT Scale with the Nevada Criterion Referenced Assessment and the Iowa Test of Basic Skills John Cronin, Branin Bowe, 2004 Each year Nevada students in grades 3 4 5 and 7 participate in testing as part of the Nevada assessment program Students in grades 3 and 5 take the Nevada Criterion Referenced Assessment Nevada CRT while students in grades 4 and 7 take the Iowa Test of Basic Skills ITBS These tests serve as an important measure of student achievement for the state s accountability system Results from these assessments are used to make state level decisions concerning education to meet Adequate Yearly Progress AYP reporting requirements of the No Child Left Behind Act NCLB and to inform schools and school districts of their performance The Nevada Department of Education has developed scales that are used to assign students to one of four performance levels on the Nevada CRT These are from the lowest cut score to the highest developing approaches meets and exceeds For purposes of NCLB the meets level is considered the level that represents satisfactory performance Students taking the Iowa Test of Basic Skills are also assigned to one of four levels These levels simply reflect the four quartiles reported in the ITBS norms Many students who attend school in Nevada also take tests developed in cooperation with the Northwest Evaluation Association NWEA These tests report student performance on a single cross grade scale which NWEA calls the RIT scale This study investigated the relationship between the scales used for the Nevada state assessments and the RIT scales used to report performance on NWEA tests The study determined RIT score equivalents for Nevada CRT and ITBS performance levels in reading and mathematics Nevada CRT test records for more than 2 000 students were included in this study Three methods generated an estimate of RIT cut scores that could be used to project Nevada CRT performance levels Rasch SOS methods generally produced the most accurate cut score estimates Accuracy of predicting Nevada CRT passing performance was above 84% for all grades when using the best methodology Type I errors ranged from about 8% to 14% when the best methodology was employed Contains 16 tables and figures

Map Skills Grade 3 Jennifer Prior, 2003-02-15 Both teachers and parents appreciate how effectively this series helps students master skills in mathematics penmanship reading writing and grammar Each book provides activities that are great for independent work in class homework assignments or extra practice to get ahead Text practice pages are included

Map Scales , 2000 *After the Map* William

Rankin,2016-07-01 For most of the twentieth century maps were indispensable They were how governments understood managed and defended their territory and during the two world wars they were produced by the hundreds of millions Cartographers and journalists predicted the dawning of a map minded age where increasingly state of the art maps would become everyday tools By the century s end however there had been decisive shift in mapping practices as the dominant methods of land surveying and print publication were increasingly displaced by electronic navigation systems In After the Map William Rankin argues that although this shift did not render traditional maps obsolete it did radically change our experience of geographic knowledge from the God s eye view of the map to the embedded subjectivity of GPS Likewise older concerns with geographic truth and objectivity have been upstaged by a new emphasis on simplicity reliability and convenience After the Map shows how this change in geographic perspective is ultimately a transformation of the nature of territory both social and political

Map Work And Practical Geography Gopal Singh,2009-11-01 The book encompasses a wide range of topics on practical geography taught to the B A B Sc students of Indian universities Numerous examples and diagrams have been included in the text with the sole aim of enabling the students to have a comprehensive grasp of the subject Attempt has also been made to present a well balanced treatment of each topic Topics like measurement of ground areas from maps determination of class interval for choropleth maps representation of agricultural industrial and transport data choice of map projections interpretation of topo sheets etc have been included in this book and discussed in detail Books treating various aspects of practical geography need regular up dates Therefore the latest available material has been used to update this edition Guidance of learned college and university teachers has enabled the author to present the subject matter clearly and accurately It is hoped that in addition to developing a keen interest for practical geography it will form the basis for a more advanced study of the subject among the students

A Family of Complexes Associated to an Almost Alternating Map, with Applications to Residual Intersections Andrew R. Kustin,Bernd Ulrich,1992 A family D_q of complexes of free R modules is constructed for each almost alternating matrix $p \in XY$ of shape $g \times f$ over a commutative noetherian ring R In $p \in X$ is a $g \times g$ alternating matrix and Y is an arbitrary $g \times f$ matrix The complexes D_q are in many ways analogous to the Buchsbaum Rim and Eagon Northcott complexes which are associated to a generic matrix For example the complex D_q is isomorphic to the shifted dual of the complex D_{f-2q} and the complex D_q can be obtained as the mapping cone of two of the complexes which correspond to an almost alternating matrix of shape $g \times f-1$ Roughly speaking the complex D_q is obtained by pasting a graded strand of algebra K/J where K is the Koszul algebra associated to p and J is a two generated ideal of K together with a different graded strand of the same algebra The position in D_q where the two strands are patched together involves pfaffians of various sizes of the alternating map which corresponds to p If p is sufficiently general then D_q is acyclic for all $g \geq 1$ of R and $f \geq 3$ then D_0 resolves R/J where J is an f residual intersection of I In the generic case the divisor class group of R/J is the

infinite cyclic group generated by the cokernel of p and D_q resolves a representative of the class q cokerp from $C \times M \times R \times J$ for all $q \in \mathbb{Z}$. When $f = 0$ then D_q resolves the q th poset I_q of the grade three Gorenstein ideal.

Mapping Skills with Google Earth: Map the World Paul Bramley, 2013-10-01 This is the chapter slice Map the World from the full lesson plan Mapping Skills with Google Earth. Students will learn in depth how to read and create maps with our engaging resource designed for students in grades three to five. Students will expand their knowledge of the elements on a map by exploring the lines of latitude, longitude, and time zones. Then students will learn about geographical and cultural features by exploring topographic and choropleth maps. Finally, students will learn the states and provinces found in North America as well as the different countries that make up the world. Comprised of reading passages, map activities, crossword, word search, and comprehension quiz, our resource incorporates curriculum-based lessons with Google Earth so students can further understand map reading with the help of visual and interactive technology. All of our content meets the Common Core State Standards and are written to Bloom's Taxonomy.

Water Levels and Artesian Pressure in Observation Wells in the United States in 1949, 1951

The Enclosure Maps of England and Wales 1595-1918 Roger J. P. Kain, John Chapman, Richard R. Oliver, 2004-07 This book offers the first comprehensive study of the enclosure mapping of England and Wales. Enclosure maps are fundamental sources of evidence in many types of historical inquiries. Although modern historians tend to view these large-scale maps essentially as sources of data on past economies and societies, this book argues that enclosure maps had a much more active role at the time they were compiled. Seen from this perspective of their contemporary society, enclosure maps are not simply antiquarian curiosities, cultural artefacts, or useful sources for historians, but instruments of land reorganisation and control which both reflected and consolidated the power of those who commissioned them. The book is accompanied by a fully searchable descriptive and analytical web catalogue of all parliamentary and non-parliamentary enclosure maps extant in public archives and libraries and offers an essential research tool for economic, social, and local
