resources such as ten year old triplets who converse with her about dinosaurs and a Connecticut museum where portraits of her ancestors hang on the walls Through lively descriptions of these visits Hunting advances a view of history as nonlinear and full of unlikely coincidences For Want of Wings is also the carefully researched story of the least known of Yale s four expeditions into the American West led by eminent paleontologist O C Marsh the friendship between Russell s father and abolitionist John Brown a portrait of a mother and daughter evolving in self understanding and an inquiry into matters of race in American history and the author s own family In the end all these pieces converge like fragments of a fossil to form an exquisitely patterned work of historical exploration
